Internet:

The Center will have a 5MB hardline and dedicated minimum of 100MB upload and 100MB download speed. The speed will ultimately be limited to the capacity of the switches in the building and theoretically if the switches are 1 GIG than you can get 1 GIG upload and 1 GIG download speed.

Lighting:

There are 28 light zones that can be operated independently. Main Room Lighting features 67-84 footcandles which converts to 600-900 Luxe.
