Turkey Trouble

Kit-Required Game

STORY

Tom Turkey is in Trouble. He WAS lucky enough to receive his annual Thanksgiving pardon from the President, and to keep it safe the President locked it in the Large Breakout EDU box, leaving clues to all the combinations around the room. However, as Tom is a Turkey, he can't read or do math! He Needs your help to figure out the clues, open the box and get his Pardon out of the box. If he doesn't show up to the National Turkey Office in 45 minutes with his Presidential Pardon, he will NOT be pardoned, and well we don't even want to think what that will mean. Please help Tom Open the Box and Enjoy Thanksgiving!

COMBINATIONS & PUZZLE EXPLANATIONS

3-DIGIT LOCK: 875
Players will see that each turkey part is assigned a point value. They will also see the three partson the strip of paper. There are two eyes and each eye is 4 points, 4 x 2 = 8, there are 7 feathers at one pointeach for a total of 7, and there is 1 beak for 5 points, a total of 5.

4-DIGIT LOCK: 1863
Players will read the letter and note that 4 vegetables are mentioned. They will shine the uv flashlight onthe vegetables and read the numbers on each. They will use those numbers in the order the vegetables arelisted in the letter for the combination. The additional vegetables may be added as red herrings if youchoose.

ABC MULTILOCK: TEETH
The pumpkin pie images are the clues for the Multilock. Players will first need to figure out the question (joke) on the pie image. What's the best thing to put into a pumpkin pie? Players Will then unscramble the letters on the pieces of pie to spell your teeth. Teeth is the Multilock combination.

DIRECTIONAL MULTILOCK: UP-LEFT-RIGHT-UP-_
The turkey beak grid and the coordinates that were placed in the small box are the clues for the Direction Multilock. Players will locate each beak on the grid and use the direction the beak is facing for the combination.
