Internally Balanced (Counter Weight Off)		Externally Balanced (Counter Weight On)	
153 Tooth	168 Tooth	153 Tooth	168 Tooth
Custom	Custom	SBC 350 Late	SBC 350 Late

Please note: The counter weight comes pre installed, for engines with Internal balance (counter weight off); the counter weight will need to be removed prior installation.

How to Remove Counter Weight for Internally Balanced Applications.

The counter weight is attached to the flywheel using 2x allen head bolts; by removing these 2 bolts you will be able to remove the counter weight.

Once the counter weight is removed the bolts will not need to be reinstalled.
