Profile

Seasoned Product and Technology Executive. 20+ years of building technologically advanced and innovative products.

Experience

Founder / CEO Upthere — August 2011 - December 2015

Founded Upthere to build a global filesystem, for all your data in the cloud without requiring sync or conflict resolution and making heavy use of immutable data structures. Built prototype of technology and team, Raised Seed, A and B rounds and conceived the core products, Upthere Home and Upthere Camera. Upthere camera innovates on a direct sharing model. Publicly launched product and company in October 2015.

EVP Products and Technology, MongoDB (now 10Gen) — 2009–2011

Advised Venture Funds on investment on MongoDB as they were pivoting from PAAS to focus on MongoDB, their NoSQL database product. Joined and helped build West Coast presence, support and marketing organizations. Closed several significant accounts and reference customers. MongoDB quickly became the leading non-relational database offering in a crowded market.

SVP Products and Engineering, Efficient Frontier — 2006–2008

Lead engineering and product organization responsible building Efficient Frontier's core platform which applies mathematical concepts to closed loop marketing to optimize advertising spend. Efficient Frontier was acquired by Adobe.

COO / SVP Product Operations and Development, Apple Computer — 2003–2005

Responsible for all aspects of Apple's PowerSchool division. Powerschool is an ERP system which administers student performance, attendance and grades. Improved all core metrics on quality, scale and operational/support aspects of the product, led the transition to a modern architecture, and turned declining market share to significant growth. After the turnaround, PowerSchool was acquired by Pearson.

EVP Product Operations, OuterBay Technologies — 2003–2005

Lead Technology and Product. Outerbay pioneered data lifecycle management. Delivered several major and minor versions of the core products. Outerbay was acquired by HP.

Member Technical Staff - Director, Oracle Computer — 1990-2002

Started as engineer and conceived of the procedural gateway, a then novel concept of being able to call non-Oracle routines from Oracle. Responsible for the kernel engineering team that pioneered heterogeneous interoperability and distributed systems.

Board / Advisory positions

Boost - Board member, Healthy Cities Tutoring - Founding Board member
Shmoop, Infobright, Goodguide - Advisory Board

Education

BS Computer Science Hogeschool Enschede, Netherlands — 1990

During college I build a company that pioneered customizable receipts for point of sales systems in restaurants. Proceeds of that funded my college costs and provided income for 2 additional students.

Private Pilot SEL, IFR rated

Interests - several more pending

Electronics, Robotics, Large scale Distributed Systems, Music

Patents - several more pending

7,437,731	Coordinated collaboration system in an integration platform
7,401,336	Role based integrated platform
7,219,351	Multi-view conversion system and method for exchanging communications between heterogeneous applications
7,072,898	Method and apparatus for exchanging communications between heterogeneous applications
6,236,99	Apparatus and method for accessing foreign databases in a heterogeneous database system
6,226,649	Apparatus and method for transparent access of foreign databases in a heterogeneous database system
6,163,858	Diagnostic methodology for debugging integrated software
6,049,800	Mechanism and method for performing callbacks
6,041,344	Apparatus and method for passing statements to foreign databases by using a virtual package
5,987,463	Apparatus and method for calling external routines in a database
9,052,824	Full-TextContent addressable stores based on sibling groups
8,631,209	Full-TextReusable content addressable stores as building blocks for creating large scale storage infrastructures
US7219351B2	Multi-view conversion system and method for exchanging communications between heterogeneous applications
