Introducing: [sideload directly from MP3.com](#)

i-drive is an internet drive: free, secure personal storage space online. It's a place to store your stuff—your resume, your MP3s, your photos—any file you want to access remotely. Best of all, i-drive makes sharing with friends easy and fun.

ABOUT US

Founded in 1998 and privately held, i-drive is an internet hard drive: personal file storage space on the web that you can access from anywhere, at any time.

i-drive's web-based location enables users to manage and distribute files as never before. Everything from file storage to retrieval, from file transfer to sharing, from point 'n click web publishing to web page clipping is executed on the backbone of the internet.

To consumers, i-drive is an extension of the desktop: access to personal and shared files from anywhere you connect to the internet. To partners, i-drive is an expansion of the internet -- a sticky platform that delivers file services wherever files are stored.

i-drive.com, combining browser and enterprise database experience, delivers a service that scales to millions of users securely and reliably from day one. Our flexible visual design encourages partners to co-brand the service and tailor its presentation to their user community.

i-drive is based in San Francisco, and soon, all over the World Wide Web.

I-DRIVE ANNOUNCES PARTNERSHIP WITH MP3.COM

i-drive is now the exclusive internet file storage provider to MP3.com, the ultimate source for digital music downloaded from the internet. MP3.com's website has more than 154,000 songs from more than 26,000 artists, making it one of the largest collections of digital music available on the internet - consumers can search, sample, and download music free of charge.

Why the partnership?

MP3.com wanted to offer its visitors an easy way to store and share MP3 files from their site. MP3.com selected i-drive because we're the bellwether in secure online storage space: simply, i-drive's technology outranks the competition's. i-drive offers you the easiest way to store your MP3's and share them with friends.
