Title and Company

President, Mirror Imaging L.L.C.

NOTE: Signatures of all the applicants or patent owners of the entire interest or their representative(s) are required. If more than one signature is required, submit multiple forms, check the box below, and identify the total number of forms submitted in the blank below.

☒ A total of 1 forms are submitted.

This collection of information is required by 37 CFR 1.31, 1.32, and 1.33. The information is required to obtain or retain a benefit by the public, which is to update (and by the USPTO to process) the file of a patent or reexamination proceeding. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to take 3 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.

If you need assistance in completing the form, call 1-800-PTO-9199 and select option 2.

Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number.

STATEMENT UNDER 37 CFR 3.73(c)Applicant/Patent Owner: Mirror Imaging L.L.C.Application No./Patent No.: 9141612 Filed/Issue Date: September 22, 2015Titled: Method of Obtaining An Electronically-Stored Financial DocumentMirror Imaging L.L.C., a limited liability company

(Name of Assignee)

(Type of Assignee, e.g., corporation, partnership, university, government agency, etc.)

states that, for the patent application/patent identified above, it is (choose **one** of options 1, 2, 3 or 4 below):

1. ☒ The assignee of the entire right, title, and interest.
2. ☐ An assignee of less than the entire right, title, and interest (check applicable box):
- ☐ The extent (by percentage) of its ownership interest is _____%. Additional Statement(s) by the owners holding the balance of the interest must be submitted to account for 100% of the ownership interest.
- ☐ There are unspecified percentages of ownership. The other parties, including inventors, who together own the entire right, title and interest are:

Additional Statement(s) by the owner(s) holding the balance of the interest must be submitted to account for the entire right, title, and interest.

3. ☐ The assignee of an undivided interest in the entirety (a complete assignment from one of the joint inventors was made). The other parties, including inventors, who together own the entire right, title, and interest are:

Additional Statement(s) by the owner(s) holding the balance of the interest must be submitted to account for the entire right, title, and interest.

4. ☐ The recipient, via a court proceeding or the like (e.g., bankruptcy, probate), of an undivided interest in the entirety (a complete transfer of ownership interest was made). The certified document(s) showing the transfer is attached.

The interest identified in option 1, 2 or 3 above (not option 4) is evidenced by either (choose **one** of options A or B below):

- A. ☒ An assignment from the inventor(s) of the patent application/patent identified above. The assignment was recorded in the United States Patent and Trademark Office at Reel 031895, Frame 0565, or for which a copy thereof is attached.
- B. ☐ A chain of title from the inventor(s), of the patent application/patent identified above, to the current assignee as follows:
1. From: _____ To: _____
- The document was recorded in the United States Patent and Trademark Office at Reel _____, Frame _____, or for which a copy thereof is attached.
2. From: _____ To: _____
- The document was recorded in the United States Patent and Trademark Office at Reel _____, Frame _____, or for which a copy thereof is attached.

[Page 1 of 2]

This collection of information is required by 37 CFR 3.73(b). The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.11 and 1.14. This collection is estimated to take 12 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. **SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.**

If you need assistance in completing the form, call 1-800-PTO-9199 and select option 2.

STATEMENT UNDER 37 CFR 3.73(c)

3. From: _____ To: _____

The document was recorded in the United States Patent and Trademark Office at
 Reel _____, Frame _____, or for which a copy thereof is attached.

4. From: _____ To: _____

The document was recorded in the United States Patent and Trademark Office at
 Reel _____, Frame _____, or for which a copy thereof is attached.

5. From: _____ To: _____

The document was recorded in the United States Patent and Trademark Office at
 Reel _____, Frame _____, or for which a copy thereof is attached.

6. From: _____ To: _____

The document was recorded in the United States Patent and Trademark Office at
 Reel _____, Frame _____, or for which a copy thereof is attached.

☐ Additional documents in the chain of title are listed on a supplemental sheet(s).

As required by 37 CFR 3.73(c)(1)(i), the documentary evidence of the chain of title from the original owner to the assignee was, or concurrently is being, submitted for recordation pursuant to 37 CFR 3.11.

[NOTE: A separate copy (i.e., a true copy of the original assignment document(s)) must be submitted to Assignment Division in accordance with 37 CFR Part 3, to record the assignment in the records of the USPTO. See MPEP 302.08]

The undersigned (whose title is supplied below) is authorized to act on behalf of the assignee.

Privacy Act Statement

The **Privacy Act of 1974 (P.L. 93-579)** requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether disclosure of these records is required by the Freedom of Information Act.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (*i.e.*, GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspection or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

-------------------------------------	--------

This Acknowledgement Receipt evidences receipt on the noted date by the USPTO of the indicated documents, characterized by the applicant, and including page counts, where applicable. It serves as evidence of receipt similar to a Post Card, as described in MPEP 503.

New Applications Under 35 U.S.C. 111

If a new application is being filed and the application includes the necessary components for a filing date (see 37 CFR 1.53(b)-(d) and MPEP 506), a Filing Receipt (37 CFR 1.54) will be issued in due course and the date shown on this Acknowledgement Receipt will establish the filing date of the application.

National Stage of an International Application under 35 U.S.C. 371

If a timely submission to enter the national stage of an international application is compliant with the conditions of 35 U.S.C. 371 and other applicable requirements a Form PCT/DO/EO/903 indicating acceptance of the application as a national stage submission under 35 U.S.C. 371 will be issued in addition to the Filing Receipt, in due course.

New International Application Filed with the USPTO as a Receiving Office

If a new international application is being filed and the international application includes the necessary components for an international filing date (see PCT Article 11 and MPEP 1810), a Notification of the International Application Number and of the International Filing Date (Form PCT/RO/105) will be issued in due course, subject to prescriptions concerning national security, and the date shown on this Acknowledgement Receipt will establish the international filing date of the application.

ISSUE NOTIFICATION

The projected patent number and issue date are specified above.

Determination of Patent Term Adjustment under 35 U.S.C. 154 (b) (application filed on or after May 29, 2000)

The Patent Term Adjustment is 249 day(s). Any patent to issue from the above-identified application will include an indication of the adjustment on the front page.

If a Continued Prosecution Application (CPA) was filed in the above-identified application, the filing date that determines Patent Term Adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) WEB site (<http://pair.uspto.gov>).

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Application Assistance Unit (AAU) of the Office of Data Management (ODM) at (571)-272-4200.

APPLICANT(s) (Please see PAIR WEB site <http://pair.uspto.gov> for additional applicants):

Michael D. Schulze, Troy, MI;
Richard J. Gagnon, Grosse Pointe Farms, MI;

The United States represents the largest, most dynamic marketplace in the world and is an unparalleled location for business investment, innovation, and commercialization of new technologies. 1. Change of correspondence address or indication of "Fee Address" (37 CFR 1.363).

- ☐ Change of correspondence address (or Change of Correspondence Address form PTO/SB/122) attached.
☐ "Fee Address" indication (or "Fee Address" Indication form PTO/SB/47; Rev 03-02 or more recent) attached. Use of a Customer Number is required.

2. For printing on the patent front page, list

- (1) The names of up to 3 registered patent attorneys or agents OR, alternatively, 1 _____
(2) The name of a single firm (having as a member a registered attorney or agent) and the names of up to 2 registered patent attorneys or agents. If no name is listed, no name will be printed. 2 _____
3 _____

3. ASSIGNEE NAME AND RESIDENCE DATA TO BE PRINTED ON THE PATENT (print or type)

PLEASE NOTE: Unless an assignee is identified below, no assignee data will appear on the patent. If an assignee is identified below, the document has been filed for recordation as set forth in 37 CFR 3.111. Completion of this form is NOT a substitute for filing an assignment.

(A) NAME OF ASSIGNEE

(B) RESIDENCE: (CITY and STATE OR COUNTRY)

Mirror Imaging, LLC

Warren, Michigan

Please check the appropriate assignee category or categories (will not be printed on the patent): ☐ Individual ☒ Corporation or other private group entity ☐ Government

4a. The following fee(s) are submitted:

- ☒ Issue Fee
☐ Publication Fee (No small entity discount permitted)
☐ Advance Order - # of Copies _____

4b. Payment of Fee(s): (Please first reapply any previously paid issue fee shown above)

- ☐ A check is enclosed.
☒ Payment by credit card. Form PTO-2038 is attached.
☐ The director is hereby authorized to charge the required fee(s), any deficiency, or credits any overpayment, to Deposit Account Number _____ (enclose an extra copy of this form).

5. Change in Entity Status (from status indicated above)

- ☐ Applicant certifying micro entity status. See 37 CFR 1.29
☐ Applicant asserting small entity status. See 37 CFR 1.27
☐ Applicant changing to regular undiscounted fee status.

NOTE: Absent a valid certification of Micro Entity Status (see forms PTO/SB/15A and 15B), issue fee payment in the micro entity amount will not be accepted at the time of application abandonment.

NOTE: If the application was previously under micro entity status, checking this box will be taken to be a notification of loss of entitlement to micro entity status.

NOTE: Checking this box will be taken to be a notification of loss of entitlement to small or micro entity status, as applicable.

NOTE: This form must be signed in accordance with 37 CFR 1.41 and 1.42. See 37 CFR 1.4 for signature requirements and certifications.

In re Application of: Michael D. Schulze et al. Confirmation No: 4281
Application No. 13/840,892 Group Art Unit: 2162
Filed: March 15, 2013 Examiner: Lodhi, Andalib Ft
Title: Method Of Obtaining Electronically-Stored Financial Documents

COMMENTS ON STATEMENT OF REASONS FOR ALLOWANCE

Box Issue Fee
Assistant Commissioner for Patents
P.O. Box 1450
Alexandria, Virginia 22313-1450

Dear Sir:

Applicant thanks the Examiner for stating the reasons for allowance on page 10 of the Notice of Allowability. In addition to the comments set forth by the Examiner, Applicant offers the following information for the record.

Applicant also wishes to thank the Examiner for taking the time to conduct five telephonic interviews with the Applicant, the first on March 5, 2015, the second on April 29, 2015, the third on May 1, 2015, the forth on May 5, 2015, and the fifth on May 7, 2015. During each interview, the Examiner and Applicant discussed the claimed invention against the patent eligibility standards under: (i) 35 U.S.C. §101, (ii) the decisions of the United States Supreme Court in *Bilski v. Kappos*, *Mayo v. Prometheus*, and *Alice v. CLS Bank*; and (iii) the USPTO

2014 Interim Guidance on Subject Matter Eligibility. During the May 7, 2015 interview, the Examiner referenced that she has discussed the claimed invention with both her Supervisor and Primary Examiner regarding the patent eligibility standards discussed above.

During the Examiner Interviews and as explained in the Examiner-Initiated Interview Summary, the Examiner indicated that the claimed invention would satisfy the subject matter eligibility standards if then-pending independent claims 23, 33, and 42 (formerly claim 44, but now renumbered as claim 42) were amended to recite that the document parameter of the financial document is a “numerical sequence associated with the document parameter” and that the numerical sequence includes a “record date of the financial document” and the predetermined parameter “includes a pre-selected numerical record date”. Applicant amended independent claims 33 and 42 to recite these elements in a manner verbatim to those discussed by the Examiner and the Applicant. Accordingly, Applicant respectfully requested that the Examiner pass independent claims 33 and 42 and dependent claims 30, 32, 34-38, 40-41, and 43-49 to allowance. Applicant intends to pursue a version of independent claim 23 – now canceled, per Examiner’s suggestion, without prejudice – in a continuation application. The Examiner approved and entered the above claims into the application via an Examiner’s Amendment.

On August 7, 2015, the Applicant paid the appropriate fees and submitted the Inventor’s Oath before the Issuance Fee was paid. As such, the Inventor’s Oath is appropriately placed into the application’s file wrapper.

Respectively Submitted,

Application No. : 13/840,892

Method of Obtaining An Electronically-Stored Financial Document

(Title of the invention)

As a below named inventor, I hereby declare that:

This declaration is directed to:

☐ The attached application,

OR

☒ United States Application Number or PCT International application number 13/840,892
filed on 03/15/2013

The above-identified application was made or authorized to be made by me.

I believe I am the original inventor or an original joint inventor of a claimed invention in the application.

I hereby acknowledge that any willful false statement made in this declaration is punishable under 18 U.S.C. 1001 by fine or imprisonment of not more than five (5) years, or both.

Authorization To Permit Access To Application by Participating Office

If checked, the undersigned hereby grants the USPTO authority to provide the European Patent Office (EPO), the Japan Patent Office (JPO), the Korean Intellectual Property Office (KIPO), the World Intellectual Property Office (WIPO), and any other intellectual property offices in which a foreign application claiming priority to the above-identified patent application is filed access to the above-identified patent application. See 37 CFR 1.14(c) and (h). This box should not be checked if the applicant does not wish the EPO, JPO, KIPO, WIPO, or other intellectual property office in which a foreign application claiming priority to the above-identified patent application is filed to have access to the above-identified patent application.

In accordance with 37 CFR 1.14(h)(3), access will be provided to a copy of the above-identified patent application with respect to: 1) the above-identified patent application-as-filed; 2) any foreign application to which the above-identified patent application claims priority under 35 U.S.C. 119(a)-(d) if a copy of the foreign application that satisfies the certified copy requirement of 37 CFR 1.55 has been filed in the above-identified patent application; and 3) any U.S. application-as-filed from which benefit is sought in the above-identified patent application.

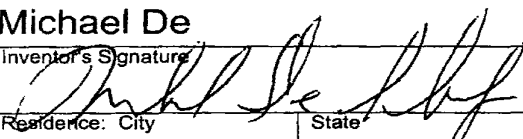

In accordance with 37 CFR 1.14(c), access may be provided to information concerning the date of filing the Authorization to Permit Access to Application by Participating Offices.

[Page 1 of 2]

This collection of information is required by 35 U.S.C. 115 and 37 CFR 1.63. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.11 and 1.14. This collection is estimated to take 21 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.

If you need assistance in completing the form, call 1-800-PTO-9199 and select option 2.

APPLN. TYPE	ENTITY STATUS	ISSUE FEE DUE	PUBLICATION FEE DUE	PREV. PAID ISSUE FEE	TOTAL FEE(S) DUE	DATE DUE
nonprovisional	UNDISCOUNTED	\$960	\$0	\$0	\$960	08/21/2015

THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. PROSECUTION ON THE MERITS IS CLOSED. THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED. SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the ENTITY STATUS shown above. If the ENTITY STATUS is shown as SMALL or MICRO, verify whether entitlement to that entity status still applies.

If the ENTITY STATUS is the same as shown above, pay the TOTAL FEE(S) DUE shown above.

If the ENTITY STATUS is changed from that shown above, on PART B - FEE(S) TRANSMITTAL, complete section number 5 titled "Change in Entity Status (from status indicated above)".

For purposes of this notice, small entity fees are 1/2 the amount of undiscounted fees, and micro entity fees are 1/2 the amount of small entity fees.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

PART B - FEE(S) TRANSMITTAL

**Complete and send this form, together with applicable fee(s), to: Mail Mail Stop ISSUE FEE
Commissioner for Patents
P.O. Box 1450
Alexandria, Virginia 22313-1450
or Fax (571)-273-2885**

INSTRUCTIONS: This form should be used for transmitting the ISSUE FEE and PUBLICATION FEE (if required). Blocks 1 through 5 should be completed where appropriate. All further correspondence including the Patent, advance orders and notification of maintenance fees will be mailed to the current correspondence address as indicated unless corrected below or directed otherwise in Block 1, by (a) specifying a new correspondence address; and/or (b) indicating a separate "FEE ADDRESS" for maintenance fee notifications.

CURRENT CORRESPONDENCE ADDRESS (Note: Use Block 1 for any change of address)

Note: A certificate of mailing can only be used for domestic mailings of the Fee(s) Transmittal. This certificate cannot be used for any other accompanying papers. Each additional paper, such as an assignment or formal drawing, must have its own certificate of mailing or transmission.

113243 7590 05/21/2015

2162

DATE MAILED: 05/21/2015

Determination of Patent Term Adjustment under 35 U.S.C. 154 (b) (Applications filed on or after May 29, 2000)

The Office has discontinued providing a Patent Term Adjustment (PTA) calculation with the Notice of Allowance.

Section 1(h)(2) of the AIA Technical Corrections Act amended 35 U.S.C. 154(b)(3)(B)(i) to eliminate the requirement that the Office provide a patent term adjustment determination with the notice of allowance. See Revisions to Patent Term Adjustment, 78 Fed. Reg. 19416, 19417 (Apr. 1, 2013). Therefore, the Office is no longer providing an initial patent term adjustment determination with the notice of allowance. The Office will continue to provide a patent term adjustment determination with the Issue Notification Letter that is mailed to applicant approximately three weeks prior to the issue date of the patent, and will include the patent term adjustment on the patent. Any request for reconsideration of the patent term adjustment determination (or reinstatement of patent term adjustment) should follow the process outlined in 37 CFR 1.705.

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at 1-(888)-786-0101 or (571)-272-4200.

OMB Clearance and PRA Burden Statement for PTOL-85 Part B

The Paperwork Reduction Act (PRA) of 1995 requires Federal agencies to obtain Office of Management and Budget approval before requesting most types of information from the public. When OMB approves an agency request to collect information from the public, OMB (i) provides a valid OMB Control Number and expiration date for the agency to display on the instrument that will be used to collect the information and (ii) requires the agency to inform the public about the OMB Control Number's legal significance in accordance with 5 CFR 1320.5(b).

The information collected by PTOL-85 Part B is required by 37 CFR 1.311. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to take 12 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, Virginia 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, Virginia 22313-1450. Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number.

Privacy Act Statement

The Privacy Act of 1974 (P.L. 93-579) requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether disclosure of these records is required by the Freedom of Information Act.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (i.e., GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspection or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

Notice of Allowability	Application No. 13/840,892	Applicant(s) SCHULZE ET AL.	
	Examiner ANDALIB LODHI	Art Unit 2162	AIA (First Inventor to File) Status No

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address--

All claims being allowable, PROSECUTION ON THE MERITS IS (OR REMAINS) CLOSED in this application. If not included herewith (or previously mailed), a Notice of Allowance (PTOL-85) or other appropriate communication will be mailed in due course. **THIS NOTICE OF ALLOWABILITY IS NOT A GRANT OF PATENT RIGHTS.** This application is subject to withdrawal from issue at the initiative of the Office or upon petition by the applicant. See 37 CFR 1.313 and MPEP 1308.

1. ☒ This communication is responsive to 06 December, 2013.
☐ A declaration(s)/affidavit(s) under **37 CFR 1.130(b)** was/were filed on _____.
2. ☐ An election was made by the applicant in response to a restriction requirement set forth during the interview on _____; the restriction requirement and election have been incorporated into this action.
3. ☒ The allowed claim(s) is/are 30, 32-38 and 40-49 (re-numbered 1-18). As a result of the allowed claim(s), you may be eligible to benefit from the **Patent Prosecution Highway** program at a participating intellectual property office for the corresponding application. For more information, please see http://www.uspto.gov/patents/init_events/pph/index.jsp or send an inquiry to PPHfeedback@uspto.gov.
4. ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).

Certified copies:

- a) ☐ All b) ☐ Some *c) ☐ None of the:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this national stage application from the International Bureau (PCT Rule 17.2(a)).

* Certified copies not received: _____.

Applicant has THREE MONTHS FROM THE "MAILING DATE" of this communication to file a reply complying with the requirements noted below. Failure to timely comply will result in ABANDONMENT of this application.

THIS THREE-MONTH PERIOD IS NOT EXTENDABLE.

5. ☐ CORRECTED DRAWINGS (as "replacement sheets") must be submitted.
☐ including changes required by the attached Examiner's Amendment / Comment or in the Office action of Paper No./Mail Date _____.
Identifying indicia such as the application number (see 37 CFR 1.84(c)) should be written on the drawings in the front (not the back) of each sheet. Replacement sheet(s) should be labeled as such in the header according to 37 CFR 1.121(d).
6. ☐ DEPOSIT OF and/or INFORMATION about the deposit of BIOLOGICAL MATERIAL must be submitted. Note the attached Examiner's comment regarding REQUIREMENT FOR THE DEPOSIT OF BIOLOGICAL MATERIAL.

Examiner
Art Unit: 2162

DETAILED ACTION

The present application is being examined under the pre-AIA first to invent provisions.

This application is a CON of 13/272,936 10/13/2011 ABN which is a CON of 12/902,973 10/12/2010 ABN which is a CON of 12/489,087 06/22/2009 PAT 7836067 which is a CON of 11/202,790 08/12/2005 PAT 7552118 which is a CON of 10/104,541 03/22/2002 PAT 6963866 which is a CON of 09/548,490 04/13/2000 PAT 6446072 which claims benefit of 60/129,021 04/13/1999.

1. The Preliminary Amendment has entered on 15 March, 2013. Claims 1-22 have been currently canceled. Claims 23-39 have been newly added. As a result, claims 23-39 are now pending in this application. There are 3 independent claims and 14 dependent claims, all of which are presented for examination by the examiner.

2. Claims 30, 32 and 33 have been amended; claims 1-29, 31 and 39 have been canceled. Claims 40-49 have been currently newly added as per Examiner amendment. As a result, claims 30, 32-38 and 40-49 (1-18) are allowed over the prior art of record.

3. Terminal disclaimer has received on 3/5/2015 and has been approved.

Oath/Declaration

4. The applicant's oath/declaration has been reviewed by the examiner and is found to conform to the requirements prescribed in **37 C.F.R. 1.63**.

Drawings

5. The applicant's drawings submitted on 03/15/2013 are acceptable for examination purposes.

Information Disclosure Statement

6. The information disclosure statement (IDS) submitted on 02 April, 2015 has been considered by the examiner.

EXAMINER'S AMENDMENT

7. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mike Schulze on 01 May, 2015.

The application has been amended as follows:

In the claims:

Please amend claims 30, 32 and 33,

Please cancel claims 1-29, 31 and 39,

Please add claims 40-49 as per examiner's amendment as follows:

Claims 1-29: (Cancelled)

Claim 30: (Currently Amended) A system as set forth in claim ~~24~~ 42 wherein storing a plurality of financial documents in a first fixed medium is further defined as electronically storing the plurality of financial documents in a first fixed electronic medium, and wherein storing a plurality of financial documents in a second fixed medium is further defined as electronically storing the plurality of financial documents in a second fixed electronic medium.

Claim 31: (Cancelled)

Claim 32: (Currently Amended) A system as set forth in claim ~~24~~ 42 wherein accessing the first and second storage systems is further defined as accessing only one of the storage systems at any one time to locate the requested financial document.

Claim 33: (Currently Amended) A method of accessing an electronically-stored financial document from one of a first storage system and a second storage system with the first and second storage systems being different from each other wherein the first and second storage systems each include a plurality of financial documents stored

Art Unit: 2162

therein and wherein each of the financial documents has an electronic image and is associated with at least one specific document parameter, said method comprising the steps of:

storing a plurality of images of the financial documents in a first fixed medium at the first storage system when the specific document parameter of the financial document is greater than a predetermined parameter, wherein the predetermined parameter includes a pre-selected numerical record date;

storing a plurality of images of the financial documents in a second fixed medium at the second storage system when the specific document parameter of the financial document is less than or equal to the predetermined parameter;

utilizing a ~~processing unit~~ processor that has access to the first and second storage systems;

receiving a request for an image of one of the stored financial documents into the ~~processing unit~~ processor;

comparing the specific document parameter of the requested financial document to the predetermined parameter to determine if the specific document parameter is greater than, less than, or equal to the predetermined parameter after the request has been received, wherein the specific document parameter of the financial document is a particular numerical sequence associated with the specific document parameter, and wherein the particular numerical sequence of the financial document includes a record date of the financial document;

accessing the first storage system when the specific document parameter is greater than the predetermined parameter and accessing the second storage system when the specific document parameter is less than or equal to the predetermined parameter; and

retrieving the image of the requested financial document from the accessed storage system as defined by the received request.

Claim 34: (Previously Presented) A method as set forth in claim 33 wherein the first and second fixed mediums are different from each other.

Claim 35: (Previously Presented) A method as set forth in claim 33 further including the step of reproducing the requested financial document after the requested financial document has been retrieved from the accessed storage system.

Claim 36: (Previously Presented) A method as set forth in claim 33 wherein the first and second storage systems are associated with the same entity.

Claim 37: (Previously Presented) A method as set forth in claim 33 wherein the first and second storage systems are associated with different entities.

Claim 38: (Previously Presented) A method as set forth in claim 33 wherein the first and second fixed mediums are the same.

Claim 39: (Cancelled)

Claim 40: (New) A method as set forth in claim 35 wherein the step of reproducing the requested financial document after the requested financial document has been retrieved from the accessed storage system includes reproducing the document onto paper.

Claim 41: (New) A method as set forth in claim 35 wherein the step of reproducing the requested financial document after the requested financial document has been retrieved from the accessed storage system includes electronically reproducing the document.

Claim 42: (New) A system for selectively storing and retrieving electronic images of financial documents, each electronic image being associated with a document parameter that includes a numerical sequence that is representative of a record date of the corresponding financial document, the system comprising:

a first storage system including a first fixed medium that stores a plurality of electronic images of corresponding financial documents, wherein the numerical sequence of the document parameter of each electronic image is greater than a numerical sequence of a predetermined parameter, wherein the predetermined parameter includes a pre-selected numerical record date;

a second storage system including a second fixed medium that stores a plurality of electronic images of corresponding financial documents, wherein the numerical sequence of the document parameter of each electronic image is less than or equal to the numerical sequence of the predetermined parameter; and

a processor that has electronic access to the first and second storage systems, wherein the processor is configured to:

receive a request to retrieve the stored electronic image corresponding to a requested financial document that includes the document parameter;

compare the numerical sequence of the document parameter associated with the electronic image of the requested financial document to the numerical sequence of the predetermined parameter, wherein the specific document parameter associated with the electronic image of the requested financial document includes a particular numerical sequence that is representative of a specific record date of the financial document;

if the numerical sequence of the document parameter of the requested financial document is greater than the numerical sequence of the predetermined parameter, then retrieve the electronic image corresponding to the requested financial document from the first storage system;

if the numerical sequence of the document parameter of the requested financial document is less than or equal to the numerical sequence of the predetermined parameter, then retrieve the electronic image corresponding to the requested financial document from the second storage system.

Art Unit: 2162

Claim 43: (New) A system as set forth in claim 42, wherein said record date of a financial document is a date on which the electronic image of the financial document is created.

Claim 44: (New) A system as set forth in claim 42 further including reproducing the requested financial document after the requested financial document has been retrieved from the accessed storage system.

Claim 45: (New) A system as set forth in claim 44 wherein the reproducing of the requested financial document after the requested financial document has been retrieved from the accessed storage system includes reproducing the document onto paper.

Claim 46: (New) A system as set forth in claim 44 wherein the reproducing of the requested financial document after the requested financial document has been retrieved from the accessed storage system includes electronically reproducing the document.

Claim 47: A system as set forth in claim 42 wherein the first and second fixed mediums are different from each other.

Claim 48: (New) A system as set forth in claim 42 wherein the first and second storage systems are associated with the same entity.

Claim 49: (New) A system as set forth in claim 42 wherein the first and second storage systems are associated with a different entity.

Reasons for Allowance

The following is an Examiner's statement of reason for allowance: Claims 30, 32-38 and 40-49 (1-18) are allowed over the prior art of record.

Reference David T. Bellinger (US 5870725 A) discloses an imaging system creates computer readable images of the front and back of several financial documents. A search and retrieval system selects, retrieves and displays financial document images using data contained in document data field, bank-generated account data field or customer-generated additional data field.

Reference Edward J. Cornelia et al. (US 6065026 A) discloses The method uses an electronic document authoring system feature that maintains a library of textual components, and displays a document including some of them in a word processor window. It responds to user input to an interface of the word processor to edit the document while displayed in the window. A database of marks is maintained identifying each component within the document displayed in the window. The system and method respond to user input to edit another document with components, and updating some of the components belonging to both documents. A second version of the documents is generated that includes the updated components.

Reference Filip Jay Yeskel (US 6115509 A) discloses The document archival method involves scanning a document to form one or more digital images and associated data that corresponding to the document and detecting anomalous conditions that may occur during the scanning and/or during subsequent image processing. Image quality parameters are defined, and a suspiciousness value is computed for each of the digital images as a function of the parameters and the detected anomalous conditions. A recommendation is made to archive based upon the suspiciousness values of the digital images, and the images and associated data are archived in memory only when an accept decision to archive has been made.

After further consideration of the prior art of record, it appears that the prior art of records fail to disclose each and every element of the Applicant's invention. Specifically, the prior art of record fails to explicitly disclose wherein *'comparing the specific document parameter of the requested financial document to the predetermined parameter to determine if the specific document parameter is greater than, less than, or equal to the predetermined parameter after the request has been received, wherein the specific document parameter of the financial document is a particular numerical sequence associated with the specific document parameter, and wherein the particular numerical sequence of the financial document includes a record date of the financial document'* as recited in independent claim 33.

Further, the prior art of record fails to explicitly disclose wherein *'compare the numerical sequence of the document parameter associated with the electronic image of*

Art Unit: 2162

the requested financial document to the numerical sequence of the predetermined parameter, wherein the specific document parameter associated with the electronic image of the requested financial document includes a particular numerical sequence that is representative of a specific record date of the financial document' as recited in independent claim 42. The preceding limitations, when combines with the rest of the claim limitations recited in claims 33 and 42 in a combination of elements that is both novel and unobvious over the prior art of record.

The dependent claims, being further limiting to the independent claims, definite and enabled by the Specification are also allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Contact Information

Any inquiry concerning this communication or earlier communications from the examiner should be directed to ANDALIB LODHI whose telephone number is (571)270-1759. The examiner can normally be reached on Monday-Friday, 10:30am-6:30pm, EST Alt Friday off.

Art Unit: 2162

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Pierre Vital can be reached on (571) 272-4215. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.

CERTIFICATION STATEMENT

Please see 37 CFR 1.97 and 1.98 to make the appropriate selection(s):

☐ That each item of information contained in the information disclosure statement was first cited in any communication from a foreign patent office in a counterpart foreign application not more than three months prior to the filing of the information disclosure statement. See 37 CFR 1.97(e)(1).

OR

☐ That no item of information contained in the information disclosure statement was cited in a communication from a foreign patent office in a counterpart foreign application, and, to the knowledge of the person signing the certification after making reasonable inquiry, no item of information contained in the information disclosure statement was known to any individual designated in 37 CFR 1.56(c) more than three months prior to the filing of the information disclosure statement. See 37 CFR 1.97(e)(2).

☐ See attached certification statement.

☐ The fee set forth in 37 CFR 1.17 (p) has been submitted herewith.

☒ A certification statement is not submitted herewith.

SIGNATURE

A signature of the applicant or representative is required in accordance with CFR 1.33, 10.18. Please see CFR 1.4(d) for the form of the signature.

Signature	/Michael De Schulze/	Date (YYYY-MM-DD)	2015-04-02
Name/Print	Michael De Schulze	Registration Number	

This collection of information is required by 37 CFR 1.97 and 1.98. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to take 1 hour to complete, including gathering, preparing and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. **SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.**

Privacy Act Statement

The Privacy Act of 1974 (P.L. 93-579) requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether the Freedom of Information Act requires disclosure of these records.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (i.e., GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspections or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

**PETITION TO MAKE SPECIAL BASED ON AGE FOR ADVANCEMENT OF EXAMINATION
UNDER 37 CFR 1.102(c)(1)**

Application Information

Application Number	13/840,892	Confirmation Number	4281	Filing Date	2013-03-15
Attorney Docket Number (optional)		Art Unit	2162	Examiner	LODHI, ANDALIB FT
First Named Inventor	Michael De Schulze				
Title of Invention	Method of Obtaining An Electronically-Stored Financial Document				

Attention: Office of Petitions

An application may be made special for advancement of examination upon filing of a petition showing that the applicant is 65 years of age, or more. No fee is required with such a petition. See 37 CFR 1.102(c)(1) and MPEP 708.02 (IV).

APPLICANT HEREBY PETITIONS TO MAKE SPECIAL FOR ADVANCEMENT OF EXAMINATION IN THIS APPLICATION UNDER 37 CFR 1.102(c)(1) and MPEP 708.02 (IV) ON THE BASIS OF THE APPLICANT'S AGE.

A grantable petition requires one of the following items:

- (1) Statement by one named inventor in the application that he/she is 65 years of age, or more; or
- (2) Certification by a registered attorney/agent having evidence such as a birth certificate, passport, driver's license, etc. showing one named inventor in the application is 65 years of age, or more.

Name of Inventor who is 65 years of age, or older

Given Name	Middle Name	Family Name	Suffix
Richard		Gagnon	

A signature of the applicant or representative is required in accordance with 37 CFR 1.33 and 10.18. Please see 37 CFR 1.4(d) for the format of the signature.

Select (1) or (2) :

- ☒ (1) I am an inventor in this application and I am 65 years of age, or more.
- ☐ (2) I am an attorney or agent registered to practice before the Patent and Trademark Office, and I certify that I am in possession of evidence, and will retain such in the application file record, showing that the inventor listed above is 65 years of age, or more.

Signature	/Richard Gagnon/	Date (YYYY-MM-DD)	2015-04-21
Name	Richard Gagnon		

Privacy Act Statement

The Privacy Act of 1974 (P.L. 93-579) requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether the Freedom of Information Act requires disclosure of these records.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (i.e., GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspections or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

In re Application of
Michael D. Schulze

Application No. 13840892

Filed: March 15, 2013

Attorney Docket No.

:
:

:DECISION ON PETITION TO MAKE SPECIAL
:UNDER 37 CFR 1.102(c)(1)
:

This is a decision on the electronic petition under 37 CFR 1.102 (c)(1), filed 22-APR-2015 to make the above-identified application special based on applicant's age as set forth in MPEP § 708.02, Section IV.

The petition is **GRANTED**.

A grantable petition to make an application special under 37 CFR 1.102(c)(1), MPEP § 708.02, Section IV: Applicant's Age must include a statement by applicant or a registered practitioner having evidence that applicant is at least 65 years of age. No fee is required.

Accordingly, the above-identified application has been accorded "special" status and will be taken up for action by the examiner upon the completion of all pre-examination processing.

Telephone inquiries concerning this electronic decision should be directed to the Electronic Business Center at 866-217-9197.

All other inquiries concerning either the examination or status of the application should be directed to the Technology Center.

Electronic Acknowledgement Receipt

EFS ID:	22140697
Application Number:	13840892
International Application Number:	
Confirmation Number:	4281
Title of Invention:	Method of Obtaining An Electronically-Stored Financial Document

Warnings:

Information:

This Acknowledgement Receipt evidences receipt on the noted date by the USPTO of the indicated documents, characterized by the applicant, and including page counts, where applicable. It serves as evidence of receipt similar to a Post Card, as described in MPEP 503.

New Applications Under 35 U.S.C. 111

If a new application is being filed and the application includes the necessary components for a filing date (see 37 CFR 1.53(b)-(d) and MPEP 506), a Filing Receipt (37 CFR 1.54) will be issued in due course and the date shown on this Acknowledgement Receipt will establish the filing date of the application.

National Stage of an International Application under 35 U.S.C. 371

If a timely submission to enter the national stage of an international application is compliant with the conditions of 35 U.S.C. 371 and other applicable requirements a Form PCT/DO/EO/903 indicating acceptance of the application as a national stage submission under 35 U.S.C. 371 will be issued in addition to the Filing Receipt, in due course.

New International Application Filed with the USPTO as a Receiving Office

If a new international application is being filed and the international application includes the necessary components for an international filing date (see PCT Article 11 and MPEP 1810), a Notification of the International Application Number and of the International Filing Date (Form PCT/RO/105) will be issued in due course, subject to prescriptions concerning national security, and the date shown on this Acknowledgement Receipt will establish the international filing date of the application.

CERTIFICATION STATEMENT

Please see 37 CFR 1.97 and 1.98 to make the appropriate selection(s):

☐ That each item of information contained in the information disclosure statement was first cited in any communication from a foreign patent office in a counterpart foreign application not more than three months prior to the filing of the information disclosure statement. See 37 CFR 1.97(e)(1).

OR

☐ That no item of information contained in the information disclosure statement was cited in a communication from a foreign patent office in a counterpart foreign application, and, to the knowledge of the person signing the certification after making reasonable inquiry, no item of information contained in the information disclosure statement was known to any individual designated in 37 CFR 1.56(c) more than three months prior to the filing of the information disclosure statement. See 37 CFR 1.97(e)(2).

☐ See attached certification statement.

☐ The fee set forth in 37 CFR 1.17 (p) has been submitted herewith.

☒ A certification statement is not submitted herewith.

SIGNATURE

A signature of the applicant or representative is required in accordance with CFR 1.33, 10.18. Please see CFR 1.4(d) for the form of the signature.

Signature	/Michael De Schulze/	Date (YYYY-MM-DD)	2015-04-02
Name/Print	Michael De Schulze	Registration Number	

This collection of information is required by 37 CFR 1.97 and 1.98. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to take 1 hour to complete, including gathering, preparing and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. **SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.**

Privacy Act Statement

The Privacy Act of 1974 (P.L. 93-579) requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether the Freedom of Information Act requires disclosure of these records.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (i.e., GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspections or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number.

This collection of information is required by 37 CFR 1.5. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.11 and 1.14. This collection is estimated to 2 hours to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. **SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.**

If you need assistance in completing the form, call 1-800-PTO-9199 and select option 2.

Privacy Act Statement

The **Privacy Act of 1974 (P.L. 93-579)** requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether disclosure of these records is required by the Freedom of Information Act.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (*i.e.*, GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspection or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

Page 96

This Acknowledgement Receipt evidences receipt on the noted date by the USPTO of the indicated documents, characterized by the applicant, and including page counts, where applicable. It serves as evidence of receipt similar to a Post Card, as described in MPEP 503.

New Applications Under 35 U.S.C. 111

If a new application is being filed and the application includes the necessary components for a filing date (see 37 CFR 1.53(b)-(d) and MPEP 506), a Filing Receipt (37 CFR 1.54) will be issued in due course and the date shown on this Acknowledgement Receipt will establish the filing date of the application.

National Stage of an International Application under 35 U.S.C. 371

If a timely submission to enter the national stage of an international application is compliant with the conditions of 35 U.S.C. 371 and other applicable requirements a Form PCT/DO/EO/903 indicating acceptance of the application as a national stage submission under 35 U.S.C. 371 will be issued in addition to the Filing Receipt, in due course.

New International Application Filed with the USPTO as a Receiving Office

If a new international application is being filed and the international application includes the necessary components for an international filing date (see PCT Article 11 and MPEP 1810), a Notification of the International Application Number and of the International Filing Date (Form PCT/RO/105) will be issued in due course, subject to prescriptions concerning national security, and the date shown on this Acknowledgement Receipt will establish the international filing date of the application.

Doc Code: DIST.E.FILE Document Description: Electronic Terminal Disclaimer - Filed		PTO/SB/26 U.S. Patent and Trademark Office Department of Commerce
Electronic Petition Request	TERMINAL DISCLAIMER TO OBVIATE A DOUBLE PATENTING REJECTION OVER A "PRIOR" PATENT	
Application Number	13840892	
Filing Date	15-Mar-2013	
First Named Inventor	Michael Schulze	
Attorney Docket Number		
Title of Invention	Method of Obtaining An Electronically-Stored Financial Document	
<input checked="" type="checkbox"/> Filing of terminal disclaimer does not obviate requirement for response under 37 CFR 1.111 to outstanding Office Action <input checked="" type="checkbox"/> This electronic Terminal Disclaimer is not being used for a Joint Research Agreement.		
Owner	Percent Interest	
Mirror Imaging, LLC	100%	
<p>The owner(s) with percent interest listed above in the instant application hereby disclaims, except as provided below, the terminal part of the statutory term of any patent granted on the instant application which would extend beyond the expiration date of the full statutory term of prior patent number(s)</p> <p>7836067</p> <p>as the term of said prior patent is presently shortened by any terminal disclaimer. The owner hereby agrees that any patent so granted on the instant application shall be enforceable only for and during such period that it and the prior patent are commonly owned. This agreement runs with any patent granted on the instant application and is binding upon the grantee, its successors or assigns.</p> <p>In making the above disclaimer, the owner does not disclaim the terminal part of the term of any patent granted on the instant application that would extend to the expiration date of the full statutory term of the prior patent, "as the term of said prior patent is presently shortened by any terminal disclaimer," in the event that said prior patent later:</p> <ul style="list-style-type: none"> - expires for failure to pay a maintenance fee; - is held unenforceable; - is found invalid by a court of competent jurisdiction; - is statutorily disclaimed in whole or terminally disclaimed under 37 CFR 1.321; - has all claims canceled by a reexamination certificate; - is reissued; or - is in any manner terminated prior to the expiration of its full statutory term as presently shortened by any terminal disclaimer. <p><input checked="" type="radio"/> Terminal disclaimer fee under 37 CFR 1.20(d) is included with Electronic Terminal Disclaimer request.</p>		

- ☐ I certify, in accordance with 37 CFR 1.4(d)(4), that the terminal disclaimer fee under 37 CFR 1.20(d) required for this terminal disclaimer has already been paid in the above-identified application.

Applicant claims the following fee status:

- ☐ Small Entity
- ☐ Micro Entity
- ☒ Regular Undiscounted

I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.

THIS PORTION MUST BE COMPLETED BY THE SIGNATORY OR SIGNATORIES

I certify, in accordance with 37 CFR 1.4(d)(4) that I am:

- ☐ An attorney or agent registered to practice before the Patent and Trademark Office who is of record in this application
- Registration Number _____
- ☐ A sole inventor
- ☐ A joint inventor; I certify that I am authorized to sign this submission on behalf of all of the inventors as evidenced by the power of attorney in the application
- ☒ A joint inventor; all of whom are signing this request

Signature	/Richard Gagnon/
Name	Richard Gagnon
Signature	/Michael Schulze/
Name	Michael Schulze

*Statement under 37 CFR 3.73(b) is required if terminal disclaimer is signed by the assignee (owner).
Form PTO/SB/96 may be used for making this certification. See MPEP § 324.

CONFIRMATION NO. 4281 PUBLICATION NOTICE

Title:Method of Obtaining An Electronically-Stored Financial Document

Publication No.US-2014-0082005-A1

Publication Date:03/20/2014

NOTICE OF PUBLICATION OF APPLICATION

The above-identified application will be electronically published as a patent application publication pursuant to 37 CFR 1.211, et seq. The patent application publication number and publication date are set forth above.

The publication may be accessed through the USPTO's publically available Searchable Databases via the Internet at www.uspto.gov. The direct link to access the publication is currently <http://www.uspto.gov/patft/>.

The publication process established by the Office does not provide for mailing a copy of the publication to applicant. A copy of the publication may be obtained from the Office upon payment of the appropriate fee set forth in 37 CFR 1.19(a)(1). Orders for copies of patent application publications are handled by the USPTO's Office of Public Records. The Office of Public Records can be reached by telephone at (703) 308-9726 or (800) 972-6382, by facsimile at (703) 305-8759, by mail addressed to the United States Patent and Trademark Office, Office of Public Records, Alexandria, VA 22313-1450 or via the Internet.

In addition, information on the status of the application, including the mailing date of Office actions and the dates of receipt of correspondence filed in the Office, may also be accessed via the Internet through the Patent Electronic Business Center at www.uspto.gov using the public side of the Patent Application Information and Retrieval (PAIR) system. The direct link to access this status information is currently <http://pair.uspto.gov/>. Prior to publication, such status information is confidential and may only be obtained by applicant using the private side of PAIR.

Further assistance in electronically accessing the publication, or about PAIR, is available by calling the Patent Electronic Business Center at 1-866-217-9197.

Office of Data Management, Application Assistance Unit (571) 272-4000, or (571) 272-4200, or 1-888-786-0101

NOTICE

Date Mailed: 12/12/2013

INFORMATIONAL NOTICE TO APPLICANT

Applicant is notified that the above-identified application contains the deficiencies noted below. No period for reply is set forth in this notice for correction of these deficiencies. However, if a deficiency relates to the inventor's oath or declaration, the applicant must file an oath or declaration in compliance with 37 CFR 1.63, or a substitute statement in compliance with 37 CFR 1.64, executed by or with respect to each actual inventor no later than the expiration of the time period set in the "Notice of Allowability" to avoid abandonment. See 37 CFR 1.53(f).

The item(s) indicated below are also required and should be submitted with any reply to this notice to avoid further processing delays.

- A properly executed inventor's oath or declaration has not been received for the following inventor(s):
All

Applicant may submit the inventor's oath or declaration at any time before the Notice of Allowance and Fee(s) Due, PTOL-85, is mailed.

Date Mailed: 12/12/2013

Receipt is acknowledged of this non-provisional patent application. The application will be taken up for examination in due course. Applicant will be notified as to the results of the examination. Any correspondence concerning the application must include the following identification information: the U.S. APPLICATION NUMBER, FILING DATE, NAME OF APPLICANT, and TITLE OF INVENTION. Fees transmitted by check or draft are subject to collection. Please verify the accuracy of the data presented on this receipt. **If an error is noted on this Filing Receipt, please submit a written request for a Filing Receipt Correction. Please provide a copy of this Filing Receipt with the changes noted thereon. If you received a "Notice to File Missing Parts" for this application, please submit any corrections to this Filing Receipt with your reply to the Notice. When the USPTO processes the reply to the Notice, the USPTO will generate another Filing Receipt incorporating the requested corrections**

Title

Method of Obtaining An Electronically-Stored Financial Document

Preliminary Class

382

Statement under 37 CFR 1.55 or 1.78 for AIA (First Inventor to File) Transition Applications:

PROTECTING YOUR INVENTION OUTSIDE THE UNITED STATES

Since the rights granted by a U.S. patent extend only throughout the territory of the United States and have no effect in a foreign country, an inventor who wishes patent protection in another country must apply for a patent in a specific country or in regional patent offices. Applicants may wish to consider the filing of an international application under the Patent Cooperation Treaty (PCT). An international (PCT) application generally has the same effect as a regular national patent application in each PCT-member country. The PCT process **simplifies** the filing of patent applications on the same invention in member countries, but **does not result** in a grant of "an international patent" and does not eliminate the need of applicants to file additional documents and fees in countries where patent protection is desired.

Almost every country has its own patent law, and a person desiring a patent in a particular country must make an application for patent in that country in accordance with its particular laws. Since the laws of many countries differ in various respects from the patent law of the United States, applicants are advised to seek guidance from specific foreign countries to ensure that patent rights are not lost prematurely.

Applicants also are advised that in the case of inventions made in the United States, the Director of the USPTO must issue a license before applicants can apply for a patent in a foreign country. The filing of a U.S. patent application serves as a request for a foreign filing license. The application's filing receipt contains further information and guidance as to the status of applicant's license for foreign filing.

Applicants may wish to consult the USPTO booklet, "General Information Concerning Patents" (specifically, the section entitled "Treaties and Foreign Patents") for more information on timeframes and deadlines for filing foreign patent applications. The guide is available either by contacting the USPTO Contact Center at 800-786-9199, or it can be viewed on the USPTO website at <http://www.uspto.gov/web/offices/pac/doc/general/index.html>.

For information on preventing theft of your intellectual property (patents, trademarks and copyrights), you may wish to consult the U.S. Government website, <http://www.stopfakes.gov>. Part of a Department of Commerce initiative, this website includes self-help "toolkits" giving innovators guidance on how to protect intellectual property in specific countries such as China, Korea and Mexico. For questions regarding patent enforcement issues, applicants may call the U.S. Government hotline at 1-866-999-HALT (1-866-999-4258).

LICENSE FOR FOREIGN FILING UNDER
Title 35, United States Code, Section 184
Title 37, Code of Federal Regulations, 5.11 & 5.15

GRANTED

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under 37 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Bureau of Industry and Security, Department of Commerce (15 CFR parts 730-774); the Office of Foreign Assets Control, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

NOT GRANTED

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).

SelectUSA

The United States represents the largest, most dynamic marketplace in the world and is an unparalleled location for business investment, innovation, and commercialization of new technologies. The U.S. offers tremendous resources and advantages for those who invest and manufacture goods here. Through SelectUSA, our nation works to promote and facilitate business investment. SelectUSA provides information assistance to the international investor community; serves as an ombudsman for existing and potential investors; advocates on behalf of U.S. cities, states, and regions competing for global investment; and counsels U.S. economic development organizations on investment attraction best practices. To learn more about why the United States is the best country in the world to develop technology, manufacture products, deliver services, and grow your business, visit <http://www.SelectUSA.gov> or call +1-202-482-6800.

DENIAL OF REQUEST FOR POWER OF ATTORNEY

The request for Power of Attorney filed 12/06/13 is acknowledged. However, the request cannot be granted at this time for the reason stated below.

- ☐ The Power of Attorney you provided did not comply with the new Power of Attorney rules that became effective on June 25, 2004. See 37 CFR 1.32.
- ☐ The revocation is not signed by the applicant, the assignee of the entire interest, or one particular principal attorney having the authority to revoke.
- ☐ The Power of Attorney is from an assignee and the Certificate required by 37 CFR 3.73(c) has not been received.
- ☐ The person signing for the assignee has omitted their empowerment to sign on behalf of the assignee.
- ☐ The inventor(s) is without authority to appoint attorneys since the assignee has intervened as provided by 37 CFR 3.71.
- ☐ The signature(s) of _____, a co-Inventor in this application, has been omitted. The Power of Attorney will be entered upon receipt of confirmation signed by said co-Inventor(s).
- ☐ The person(s) appointed in the Power of Attorney is not registered to practice before the U.S. Patent and Trademark Office.
- ☐ Only one Customer Number can be designated for the Power of Attorney in an application. The Customer Number that was captured is the first Customer Number provided on the Power of Attorney document.
- ☐ A request under 37 CFR 1.48 to add an inventor was granted in this application, however, no power of attorney consistent with the power of attorney granted by the originally named inventive entity has been

**UNITED STATES PATENT AND TRADEMARK OFFICE**

www.uspto.gov

received. Thus, the addition of the inventor has resulted in the loss of power of attorney in the application. See 37 CFR 1.32(e).

- ☒ The power of attorney has not been accepted because the party who is giving power of attorney has not been identified. Power of attorney may only be signed by the applicant for patent (37 CFR 1.42) or the patent owner. A patent owner who was not the applicant must appoint any power of attorney in compliance with 37 CFR 3.71 and 3.73. See 37 CFR 1.32(b)(4).
- ☐ The power of attorney from the inventors has not been accepted because it is a copy from a prior national application for which benefit is claimed and the continuing application names an inventor who was not named as an inventor in the prior application.
- ☐ The power of attorney from the inventors has not been accepted because the power of attorney must be signed by the applicant for patent. See 37 CFR 1.32(b)(4).
- ☒ Any request to correct or update the name of the applicant must include an application data sheet (ADS) in compliance with 37 CFR 1.76 specifying the correct or updated name of the applicant in the applicant information section. Any request to change the applicant after an original applicant has been specified under 37 CFR 1.46(b) must include a new ADS in compliance with 37 CFR 1.76 specifying the applicant in the applicant information section and comply with 37 CFR 3.71 and 3.73. See 37 CFR 1.46(c).

SECOND PRELIMINARY AMENDMENT

Dear Sir:

Prior to examination of the above-identified application, please amend the subject application as follows and consider the accompanying remarks.

The subject Second Preliminary Amendment is being filed in conjunction with the filing of a Response to a Notice of Missing Parts. Amendments to the specification begin on page 2. A complete listing of the claims ever presented in the application, along with any current amendments thereto, begins on page 3.

Amendments to the Specification

Please amend the paragraph beginning at page 1, line 5, as follows;

This patent application is ~~a continuation of U.S. Patent Application Serial No. 13/838,554 filed on March 15, 2013 now _____~~ which is a continuation of U.S. Patent Application Serial No. 13/272,936 filed on October 13, 2011, now abandoned, [[_____]] which is a continuation of U.S. Patent Application Serial No. 12/902,973 filed on October 12, 2010, now abandoned, which is a continuation of U.S. Patent Application Serial No. 12/489,087 filed on June 22, 2009, now U.S. Patent No. 7,836,067, which is a continuation of U.S. Patent Application Serial No. 11/202,790 filed on August 12, 2005, now U.S. Patent No. 7,552,118, which is a continuation of U.S. Patent Application Serial No. 10/104,541 filed on March 22, 2002, now U.S. Patent No. 6,963,866, which is a continuation of U.S. Patent Application Serial No. 09/548,490 filed on April 13, 2000, now U.S. Patent No. 6,446,072, which in turn claims priority to and all the advantages of United States Provisional Patent Application Serial No. 60/129,021, which was filed on April 13, 1999.

Amendments to the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application.

1. - 22. (Cancelled).

23. (New) A system comprising:

a. a first storage system including a first fixed medium, the first storage system configured to:

- i. store a plurality of financial documents in the first fixed medium when a specific document parameter of a financial document is greater than a predetermined parameter;
- ii. in response to a request, retrieve a financial document stored in the first fixed medium;

b. a second storage system including a second fixed medium, the second storage system configured to:

- i. store a plurality of financial documents in the second fixed medium when the specific document parameter is less than or equal to the predetermined parameter;
- ii. in response to a request, retrieve a financial document stored in the second fixed medium;

c. a processing unit which has electronic access to the first and second storage systems, wherein the processing unit is configured to:

- i. compare a specific requested document parameter of a requested financial document to the predetermined parameter;
- ii. access the first storage system when the specific requested document parameter is greater than the predetermined parameter;
- iii. access the second storage system when the specific requested document parameter is less than or equal to the predetermined parameter.

24. (New) A system as set forth in claim 23 wherein the first and second fixed mediums are different from each other.

25. (New) A system as set forth in claim 24 wherein storing a plurality of financial documents in a first fixed medium is further defined as storing a plurality of financial documents on a physical media.

26. (New) A system as set forth in claim 24 wherein storing a plurality of financial documents in a second fixed medium is further defined as electronically storing the plurality of financial documents in a fixed electronic medium.

27. (New) A system as set forth in claim 24 wherein storing a plurality of financial documents in a first fixed medium is further defined as electronically storing the plurality of financial documents in a fixed electronic medium.

28. (New) A system as set forth in claim 24 wherein storing a plurality of financial documents in a second fixed medium is further defined as storing a plurality of financial documents on a physical media.

29. (New) A system as set forth in claim 24 wherein the first and second fixed mediums are the same.

30. (New) A system as set forth in claim 29 wherein storing a plurality of financial documents in a first fixed medium is further defined as electronically storing the plurality of financial documents in a first fixed electronic medium, and wherein storing a plurality of financial documents in a second fixed medium is further defined as electronically storing the plurality of financial documents in a second fixed electronic medium.

31. (New) A system as set forth in claim 24 further including reproducing the requested financial document after the requested financial document has been retrieved from the accessed storage system.

32. (New) A system as set forth in claim 24 wherein accessing the first and second storage systems is further defined as accessing only one of the storage systems at any one time to locate the requested financial document.

33. (New) A method of accessing an electronically-stored financial document from one of a first storage system and a second storage system with the first and second storage systems being different from each other wherein the first and second storage systems each include a plurality of financial documents stored therein and wherein each of the financial documents has an electronic image and is associated with at least one specific document parameter, said method comprising the steps of:

storing a plurality of images of the financial documents in a first fixed medium at the first storage system when the specific document parameter of the financial document is greater than a predetermined parameter;

storing a plurality of images of the financial documents in a second fixed medium at the second storage system when the specific document parameter of the financial document is less than or equal to the predetermined parameter;

utilizing a processing unit that has access to the first and second storage systems;

receiving a request for an image of one of the stored financial documents into the processing unit;

comparing the specific document parameter of the requested financial document to the predetermined parameter to determine if the specific document parameter is greater than, less than, or equal to the predetermined parameter after the request has been received;

accessing the first storage system when the specific document parameter is greater than the predetermined parameter and accessing the second storage system when the specific document parameter is less than or equal to the predetermined parameter; and

retrieving the image of the requested financial document from the accessed storage system as defined by the received request.

34. (New) A method as set forth in claim 33 wherein the first and second fixed mediums are different from each other.

35. (New) A method as set forth in claim 33 further including the step of reproducing the requested financial document after the requested financial document has been retrieved from the accessed storage system.

36. (New) A method as set forth in claim 33 wherein the first and second storage systems are associated with the same entity.

37. (New) A method as set forth in claim 33 wherein the first and second storage systems are associated with different entities.

38. (New) A method as set forth in claim 33 wherein the first and second fixed mediums are the same.

39. (New) A system comprising:

a. a processing unit communicatively coupled to a first and second storage system, wherein the processing unit is configured to:

- i. compare a specific requested document parameter of a requested financial document to a predetermined parameter;
- ii. access the first storage system when the specific requested document parameter is greater than the predetermined parameter;
- iii. access the second storage system when the specific requested

USSN: 13/840,892

document parameter is less than or equal to the predetermined parameter.

Remarks

The specification has been amended to set forth a proper claim of priority as is required by 35 U.S.C. 120. There was a typographical error in the priority claim as presented in the Preliminary Amendment filed on March 15, 2013. A corrected Application Data Sheet is also being filed concurrently herewith to set forth the proper claim of priority. It is also noted that this paragraph was improperly identified in the March 15th Amendment as being located on Page 4. This has also been corrected to reflect that this paragraph is found on Page 1. No new matter is being introduced.

After entry of the subject Second Preliminary Amendment, claims 23-39 will remain pending in the application with claims 23, 33 and 39 being in independent form. Claims 1-22 have been cancelled with claims 23-39 being added. No new matter is being introduced.

The new claims are being presented again as there were typographical errors in the claims as presented in the Preliminary Amendment filed on March 15, 2013. In particular, in the March 15th Amendment, claim 23 was missing and there were two claims with number 31. In any event, the exact same claims are now being re-presented with proper numbering.

It is respectfully submitted that the Application, as amended, is now presented in condition for examination. The Commissioner is authorized to charge our Deposit Account No. 08-2789 for any fees or credit the account for any overpayment.

Respectfully submitted,

HOWARD & HOWARD ATTORNEYS PLLC

Date: December 6, 2013

BACKGROUND OF THE INVENTION

1) TECHNICAL FIELD

20 The subject invention relates to a method for a financial institution to obtain
electronically-stored financial documents from an off-site storage system remotely-located
from an on-site storage system.

2) DESCRIPTION OF THE PRIOR ART

Methods for obtaining electronically-stored financial documents are generally known in the art. Financial institutions, such as banks and credit unions, utilize such methods to rapidly and efficiently obtain financial documents for distribution to clients upon request. Such financial documents include paid checks, account statements, and other related documents. These financial documents are typically stored on microfiche, microfilm, digitally, or by some other electronic storage means. Further, these financial documents are typically electronically-stored in an on-site storage system located at the financial institution or in an off-site storage system. Electronic storage of these financial documents permits financial institutions to eliminate storage of paper or "hard" copies of these documents. The electronic storage of these documents also provides a means of retrieving the information from the on-site and off-site storage systems.

Once the document is stored, the client may request an image of a particular stored document. Client requests are made to replace lost or stolen documents, for tax purposes, for proof of financial transactions, for legal disputes, and other similar matters. The client's request is inputted into a computer terminal at the financial institution. More specifically, conventional methods for obtaining an electronically-stored financial document enable an employee of the financial institution, such as a bank teller, to input the request into an interface incorporated into the computer terminal. The interface is inter-

linked with the on-site storage system. Typically, all requests for a particular period are grouped together and subsequently downloaded for retrieval of the requested image by the financial institution. The financial institution retrieves the image, e.g. a photocopy of the check, and then distributes the photocopy to the client via facsimile, mail or hand delivery.

- 5 The storing, downloading, and retrieving of the financial document, including the reproduction and the distribution of the document, are known in the industry as back office production. Back office production for financial institutions is particularly resource intensive, time consuming, and expensive. Also, back office production becomes increasingly expensive if the client requests a particularly old financial document because
- 10 older financial documents frequently require more resources and time to locate and retrieve.

The majority of financial institutions electronically store financial documents only in an on-site storage system and not in an off-site storage system. Consequently, these financial institutions are unable to outsource the responsibilities for the back office production to third

15 party entities to alleviate the expenses and resources associated with the back office production. These financial institutions realize a significant financial burden since the back office production is concentrated strictly at the financial institution.

Other financial institutions do electronically store financial documents in on-site and off-site storage systems. However, the methods utilized by these financial institutions to

20 access the financial documents stored in the off-site storage system are deficient in that the interface utilized in such methods is only inter-linked with the on-site storage system. That

is, there is no interface independently inter-linked with the off-site storage system. As a result, the financial documents stored in the off-site storage system can not be efficiently accessed. These financial institutions are still responsible for retrieving the requested financial documents through their back office production and their expenses remain high.

5 One such method of retrieving documents from on-site and off-sited storage systems is disclosed in United States Patent No. 5,784,610 to Copeland, III et al.

Due to the inefficiencies identified in the conventional methods used by financial institutions to obtain financial documents, it is desirable to implement a method for a financial institution to obtain electronically-stored financial documents from both on-site
10 and off-site storage systems that reduces, if not eliminates, the back office production of the financial institution by providing a direct interface inter-linked with the off-site storage system. With such an interface, the responsibility for retrieving financial documents from the off-site storage can be outsourced to third party entities while still providing the financial institution with efficient access to any financial documents electronically-stored
15 in the off-site storage system.

SUMMARY OF THE INVENTION AND ADVANTAGES

A method for a financial institution to obtain electronically-stored financial documents having a specific document parameter is disclosed. The specific document
20 parameter is typically a particular numerical sequence, such as a record date of the financial document. The method of the subject invention enables the financial institution

to obtain the financial documents from a first or an off-site storage system. The first or off-site storage system is different from a second or an on-site storage system and is preferably remotely-located from the second or on-site storage system. In one embodiment, the financial documents of the financial institution are maintained in the first or off-site storage system when the specific document parameter of the financial document is greater than a predetermined parameter. The financial documents that are less than or equal to the predetermined parameter are maintained in the second or on-site storage system. In another embodiment, the specific document parameter of the financial document that is less than or equal to the predetermined parameter is maintained in the first or off-site storage system and the financial document that is greater than the predetermined parameter is maintained in the second or on-site storage system.

When the financial institution receives a request for a financial document, the financial institution compares the specific document parameter of the requested financial document to the predetermined parameter to determine if the specific document parameter is greater than, less than, or equal to the predetermined parameter. A computer terminal located at the financial institution is connected to both the off-site and on-site storage systems through a processing unit. The processing unit is utilized to, at least partially, automatically access one of the storage systems in response to the comparison of the specific document parameter to the predetermined parameter. For instance, if it is determined that the specific document parameter is less than or equal to the predetermined document parameter, then the processing unit accesses the second or on-site storage

system. On the other hand, if it is determined that the specific document parameter of the financial document is greater than the predetermined parameter, then the processing unit accesses the first or off-site storage system. As stated below, the computer terminal may be used to feed a request into the processing unit.

5 After the requested financial document is accessed the requested document is then retrieved in order to reproduce the financial document, and distribute the financial document to an end user of the financial institution.

 The subject invention therefore provides a method that enables financial institutions to obtain electronically-stored financial documents from on-site and off-site
10 storage systems. As such, the financial institution can selectively store financial documents in either an on-site storage system or the off-site storage system, and the responsibility for the financial documents in the on-site or off-site storage systems can be outsourced to a third party entity. Further, the documents can be stored in different fixed
15 mediums, such as microfiche, microfilm, digitally, electronically, etc., and can be stored in different geographical locations. Therefore, the back office production of the financial institution associated with the retrieval and distribution of financial documents stored in the on-site or off-site storage systems ~~system~~ is strategically reduced or even completely eliminated.

BRIEF DESCRIPTION OF THE DRAWINGS

Other advantages of the present invention will be readily appreciated as the same becomes better understood by reference to the following detailed description when considered in connection with the accompanying drawings wherein:

Figure 1 is a flow diagram schematically detailing an on-site storage system, and an
5 off-site storage system in accordance with the subject invention;

Figure 2 is a block diagram generally representing a method for a financial institution to obtain electronically-stored financial documents from the on-site and off-site storage systems;

Figure 3 is a block diagram completing the method of obtaining electronically-
10 stored financial documents from the on-site storage system; and

Figure 4 is a block diagram completing the method of obtaining electronically-stored financial documents from the off-site storage system.

DETAILED DESCRIPTION OF THE PREFERRED EMBODIMENT

15 Referring to the Figures, wherein like numerals indicate like or corresponding parts throughout the several views, a method for a financial institution to obtain an electronically-stored financial document is schematically shown at 10 in Figure 1. The method introduced in the subject invention enables the financial institution to obtain the financial document from one of a first or an off-site storage system and a second or an on-
20 site storage system with the storage systems being different from each other. Preferably, the on-site storage system is located at the financial institution and the off-site storage

system is located at a remote location distant from the financial institution. This allows the financial institution to 'outsource' the responsibilities associated with obtaining the financial document.

Methods for financial institutions to obtain electronically-stored documents are frequently used by such entities as banks, credit unions, and other financially-oriented institutions. For illustrative purposes only, the description of the subject invention is discussed with reference to banks. However, as appreciated by those skilled in the art, other businesses, such as insurance companies, may also utilize similar methods and incorporate the aspects of the subject invention.

Methods for banks to obtain electronically-stored financial documents are generally used by banks to rapidly and efficiently obtain financial documents for distribution to clients upon request. As described above, the financial documents for banks are usually paid checks, checking statements, and other related financial documents, and these documents include at least one specific document parameter. As appreciated by those skilled in the art, it is not the financial document (e.g. the paid check) itself that is electronically-stored. Rather, it is data included on the document such as a sequence number that is electronically stored to make up the financial document. The specific document parameter is preferably a particular numerical sequence. As appreciated, the specific document parameter of the financial document can include, but is not limited to, a record date or age of the document, a series number, or some other document identifying number of the financial document. More specifically, in the preferred embodiment of the

subject invention, the particular numerical sequence of the financial document is the record date of the financial document. That is, the date that the particular financial document was created or posted.

The financial documents are typically stored on microfiche, microfilm, digitally, or
5 by some other electronic storage means. As appreciated, the electronic storage of the financial documents is frequently created by taking an electronic photo image of the document and storing the photo image in a computer system. One such digital electronic storage device is sold by Kodak under the name of *IMAGELINKTM* Digital Workstation (IDW). Electronic storage of these financial documents permits banks to eliminate storage
10 of paper or "hard" copies of these documents. The electronic storage of these documents also provides an efficient means of retrieving the information from the on-site and off-site storage systems. This will be discussed further herein below.

As described above, the financial documents are electronically-stored in either the on-site storage system located at the bank or in the off-site storage system remotely located
15 from the on-site storage system. More specifically, the subject invention includes the step of maintaining the financial documents in the off-site storage system when the specific document parameter of the financial document is greater than a predetermined parameter. Financial documents are maintained in the on-site storage system when the specific document parameter of the financial document is less than or equal to the predetermined
20 parameter. As appreciated, the document parameter of the financial documents stored in the off-site storage system may be greater than or equal to the predetermined parameter

with the on-site storage system having documents only less than the predetermined parameter.

Similar to the specific document parameter of the financial document, the predetermined parameter is also a numerical value. The predetermined parameter is specifically a numerical value predetermined by the bank. For instance, if the specific document parameter is a series number of a paid check and the series number is greater than the predetermined parameter which, in this case, would be an arbitrarily selected base series number, then the paid check would be stored in the off-site storage system.

In the preferred embodiment of the subject invention, the predetermined numerical value is a date pre-selected by the bank. For instance, the bank may pre-select a date that is one year before a current date—the current date being the actual date that the client requests the financial document. Of course, the bank may pre-select a date that is some other time period before a current date (e.g. two or three years) without varying from the scope of the subject invention. As such, if the record date of the particular financial document is older than one year, then the particular financial document is maintained in the off-site storage system. If the record date of the particular financial document is earlier than or equal to one year, then the particular financial document is maintained in the on-site storage system. As discussed above, the document having record dates equal to the one year may be stored in the off-site or on-site storage systems.

Once the financial document is maintained in the appropriate storage system, the bank is capable of receiving a request for the financial document from the client. In

reality, the client is requesting an image of the stored financial document. As appreciated, clients request the image for various reasons. As discussed above, requests are typically made for replacing lost or stolen financial documents, for tax purposes, for proof of financial transactions, for legal disputes, and other similar matters. Ultimately, the bank
5 retrieves the image, reproduces the image, and distributes the reproduced image to the requesting client of the bank.

Referring now to Figure 1, the method for banks to obtain electronically-stored financial documents is discussed in detail in accordance with a general scope of the subject invention. Initially, the requesting client requests a particular financial document, such as
10 a paid check. The client is typically a customer of the bank or other financial institution. The client's request is inputted into a computer terminal 11 at the financial institution. The computer terminal 11 will be discussed in more detail hereinbelow.

From the computer terminal 11, the request is fed into a processing unit 12, which is illustrated as a mainframe computer 12 at the bank. In the preferred embodiment of the
15 subject invention, if the client requests a financial document having a record date earlier than or equal to one year before the current date, then the request, and other requests like it, are processed at the bank in the on-site storage system. That is, the requests are grouped together and downloaded to a downloading terminal 14 at the bank. The downloading may occur at particular intervals such as at the end of each day, every three hours, etc. The
20 sequence number of each check requested is then determined. A document terminal 16

subsequently creates or reproduces the document, i.e., a photocopy of the check. The photocopy is then distributed to the client via facsimile, mail, or hand delivery.

It is known in the art that the majority of requests for financial documents are requests for documents which were created in the most recent year. That is, if the pre-
5 selected date is one year before the current date, as in the preferred embodiment, then the majority of requests are seeking financial documents having a record date earlier than or equal to the pre-selected date. The remaining document requests relate to financial documents that are older than one year. Since, as described in the Background of the Invention, retrieval of financial documents that are older than one year is particularly
10 expensive, the preferred embodiment of the subject invention outsources all of the document requests which relate to documents having a record date later than one year before the current date. As appreciated, the particular time frame which is outsourced is not a critical feature of the subject invention and may be adjusted to meet the needs of any particular financial institution. In fact, all of the document requests, including the most
15 recent, may be outsourced using the outsourcing procedure of the subject invention.

In the preferred embodiment, if the client requests a financial document having a record date later than one year before the current date, then the request, and others like it, are grouped together and downloaded from the mainframe computer 12 to an outsourced downloading terminal 18. As above, the downloading may be at particular intervals as
20 needed. The sequence number is determined by a sequencing terminal 20. The sequence number is then sent back to the outsourced downloading terminal 18. An outsourced

document terminal 22 then creates or reproduces the desired document which is then distributed to either the client or the bank. As appreciated, two document retrieval operations, one for the bank to retrieve financial documents having record dates earlier than or equal to one year before the current date, and another to retrieve outsourced financial documents having record dates later than one year before the current date, preferably operate simultaneously. It is to be understood that the computer terminals and the accompanying PC bases are illustrated highly schematically in Figure 1 and are not intended to be limiting in any manner. For instance, the schematic illustration of the outsourced document terminal 22 need not include a computer terminal and an accompanying PC base. Instead, the outsourced document terminal 22 is preferably some sort of printing device.

Referring to Figures 2 through 4, the method for banks to obtain electronically-stored financial documents is described in even greater detail. The request is first generated by the client. The request is then processed by the bank. The processing, retrieval and reproduction of the requested financial document is typically controlled by one interlinked computer software program. One such computer software program is a software program called Antinori Software Incorporated or ASI which is sold under the name of *INNOVASIONTM* by Carreker-Antinori of Dallas, Texas. However, other frequently used software programs include *PEGATM* and *SterlingTM*. Any of these computer software systems can provide the necessary means for implementing the discussed procedures.

The processing of the request is completed by a customer service tracking system and the computer terminal 11. The customer service tracking system assists the financial

institution in receiving the request. More specifically, the customer service tracking system gives branches, customer service, and other bank departments the capability to enter, log, track, route and monitor the status of all requests for financial documents. The customer service tracking system also provides the capability to enter, log, track, route and monitor the status of customer complaints and other customer service related items.

In accordance with one contemplated embodiment of the invention, a bank employee, such as a bank teller first determines a status of the requested document. More specifically, the employee compares the specific document parameter of the requested financial document to the predetermined parameter to determine if the specific document parameter is greater than, less than, or equal to the predetermined parameter. If the specific document parameter is a particular numerical sequence and the predetermined parameter is a predetermined numerical value, then the employee compares the particular numerical sequence of the financial document to the predetermined numerical value to determine if the particular numerical sequence is greater than, less than, or equal to the predetermined numerical value. Further, if as in the preferred embodiment, the particular numerical sequence is a record date of the financial document, and the predetermined numerical value is a pre-selected date, then the employee compares the record date of the financial document to the pre-selected date to determine if the record date is later than, earlier than, or equal to the pre-selected date.

The customer service tracking system enables a bank employee, such as a bank teller, to submit the request. More specifically, the employee utilizes the computer terminal

located at the bank and connected to both the off-site and on-site storage systems to access one of the storage systems in response to the comparison of the specific document parameter of the requested financial document to the predetermined parameter. For instance, when the particular numerical sequence of the financial document is greater than
5 the predetermined numerical value, the employee preferably utilizes the computer terminal 11 to access the off-site storage system, and when the particular numerical sequence of the financial document is less than or equal to the predetermined numerical value, the employee preferably utilizes the computer terminal 11 to access the on-site storage system. As discussed above, the documents have a numerical sequence equal to the predetermined
10 numerical value may be stored in either the off-site or on-site storage systems.

After the computer terminal 11 is utilized to access the desired storage system, the employee manually inputs identification data of the requested financial document into the computer terminal 11. More specifically, when the particular numerical sequence of the financial document is less than or equal to the predetermined numerical value, the
15 employee inputs identification data into a primary interface and selects the requested document. Also, the primary interface preferably provides an option for the employee to select among several different output formats. The primary interface is inter-linked with the on-site storage system. In the preferred embodiment of the subject invention, the primary interface appears as follows and includes the identification data detailed below:

20

**Clean Substitute Specification

<i>EXIT FUNCTION</i>			

Alternatively, when the particular numerical sequence of the financial document is greater than the predetermined numerical value, the employee selects an exit function at the primary interface. The exit function distinguishes that the request is to be sent to an outsourcing third party entity. Upon selection of the exit function at the primary interface, a secondary interface, inter-linked with the exit function, is initiated. The secondary interface is inter-linked with the off-site storage system. The employee inputs identification data into the secondary interface and selects the requested document. Also,

the secondary interface preferably provides an option for the employee to select among several different output formats. Preferably, routing, or service codes will be generated automatically upon the initiation of the secondary interface and the inputting of the identification data into the secondary interface. The routing codes enable the bank to

5 recognize that the request is being sent to the outsourced third party entity. Furthermore, the routing codes are configured to automatically forward the inputted identification data to the off-site storage system. The inputted identification data and the routing codes are forwarded into the mainframe computer 12 introduced above for temporary storage before transfer to the off-site storage system. This temporary storage also serves to defend

10 against unexpected power outages, computer malfunctions, and the like. In the preferred embodiment of the subject invention, the secondary interface appears as follows and includes the identification data detailed below:

Once the bank employee has inputted the necessary identification data into either the primary or secondary interface, then retrieval of the financial document can continue. Specifically, the requested financial document is retrieved as defined by the inputted

5 identification data. Two separate document retrieval procedures are discussed hereinbelow.

One document retrieval procedure is for the financial documents having a record date earlier than or equal to the pre-selected date—one year before the current date in this example. The other document retrieval procedure is for the financial documents having a record date later than the pre-selected date. As discussed above, the one year timing selected for the pre-

10 selected date is simply shown as an example and any suitable time frame may be utilized. In fact, even all financial document retrievals may be outsourced to the third party entity. As

also discussed above, the two separate document retrieval procedures will typically operate simultaneously.

With reference to the subject example, if the record date of the financial document is earlier than or equal to one year before the current date, the remaining steps occur at the bank. As discussed above, these steps are known as the back office production of the bank. The request is first categorized by a research automation system. The research automation system automates the entire workflow of a bank's research and photocopy departments by sending requests to the appropriate sequence for processing. The downloading terminal 14 serves to perform the research automation system's tasks.

Photocopy requests are routed to an image control system, statement requests are sent to a document retrieval system, and requests for financial adjustments are routed to an adjustment system. The document terminal 16 serves to perform these tasks. In the illustrated embodiment of the subject invention, the sample document request is for a paid check. Hence, the categorized sequence will be the image control system which handles photocopy requests.

Referring now to Figure 3, after the request is categorized, the request is verified for completeness and accuracy. If the request is not complete then additional data is retrieved. The additional data is retrieved by using a sequence number retrieval system and/or an all items research system. Once the request is complete and accurate, then the image reference number can be determined. That is, once the request is complete and accurate, then the requested financial document can be electronically located in the on-site storage system. The

reference number may be a routing, sequence, or any other type of indicator. The reference number is determined by the image control system. The image control system is an image retrieval and routing management system which works in conjunction with Kodak's *IMAGELINKTM* Digital Workstations (IDW). Specifically, the image control system first
5 connects to a network node. The network node is any type of storage device as is known in the art. Preferably a Kodak network node is used. The network node drives the IDW to find the location of the image by using the reference number. Specifically, the employee is prompted to verify that the correct media is loaded in the IDW such that the IDW can locate the image. The reference number for the document is known and the document image is
10 now verified and located.

The requested image can now be retrieved and reproduced. In other words a copy of the digitized document (the check) is created. The copy may be created by manually pulling the microfilm, microfiche, or the like and photocopying the document. The copy may also be made by printing the document from a digitized record. The photocopy of the
15 check is then distributed to the requesting client or other end user of the financial institution. Other end users of the financial institution include, but are not limited to, other financial institutions and federal and state governments. Additional information such as a photocopy report, a statement of charges, a research report and/or a daily status report may also be produced for the requesting client, the other end user, and/or the financial institution.
20 The document retrieval system incorporated at the bank and the method for obtaining electronically-stored financial documents from the on-site storage system is now completed.

Continuing with the subject example, if the record date of the financial document is later than one year before the current date, the automated retrieval of the financial document is outsourced to the third party entity. To begin, a separate file is automatically generated at the bank by the input of the identification data into the secondary interface. Referring specifically to Figure 4, the routing codes direct the request created on the separate file to be routed separately to the outsourced third party entity. In the preferred embodiment of the subject invention, additional user ID's are created to allow only selected users into the secondary interface. The identification data stored in the separate file and the routing codes are downloaded to the off-site storage system for retrieval of the requested financial documents by the outsourced downloading terminal 18. Preferably, the identification data and routing codes are grouped into batches of common requests for optimum retrieval of the requested financial document by the outsourced third party entity at the off-site storage system. The downloading step may occur at any suitable predetermined interval. Preferably, the downloading will occur three times a day. The downloaded documents are known in the industry as a basket of requests.

The subject method further includes the step of creating a back-up file of the downloaded identification data and routing codes in the off-site storage system. The back-up file acts as an emergency information source in case the mainframe computer 12 at the financial institution has a catastrophic failure. In addition, the outsourced third party entity is in direct connection with the mainframe computer 12 of the bank wherein the outsourced third party entity may produce a backup directory of each database file. This database

backup is an additional safe guard for the financial institution.

The downloaded identification data and routing codes are then categorized for processing in the off-site storage system. The research automation system categorizes this information in a like fashion as discussed above. In fact, the outsourced third party entity
5 uses the same computer software package as the financial institution such that the flow of information is optimum and not interrupted. As discussed above, the subject example request is for a paid check. Hence, the request will be categorized into the image control system and a sequence number will be determined by the sequencing terminal 20. Also, a status to update the progress of the requested financial document is provided to the financial
10 institution.

After the request is categorized, the request, specifically the inputted identification data, is verified for completeness and accuracy. If the request is not complete or accurate, then additional data is retrieved. In a similar fashion as above, the additional data is retrieved by using the sequence number retrieval system and/or the all items research
15 system. As appreciated, the outsourced third party entity may retrieve this information from the mainframe computer 12, via its direct line, or from its own backup database files. Once the request is complete and accurate, the image reference number can be determined. Again, as above, the reference number is determined by the image control system.

20 The requested image is then retrieved. More specifically, the requested financial document is electronically located in the off-site storage system. Additionally, the

requested financial document is also reproduced after the document is electronically located in the off-site storage system by the outsourced document terminal 22. In other words, a copy of the digitized document (the check) is created. A status file is then created for the completed transaction. Also, a status of the request is sent to the financial
5 institution wherein the institution may update their records. The status updates, as well as the information connections, create a two way information exchange between the outsourced third party entity and the bank.

The photocopy of the check is then distributed or digitally transferred to the requesting client, the financial institution, or other end users of the financial institution. In
10 the preferred embodiment of the subject invention, the photocopy of the request is distributed to the requesting client, etc. based on the routing codes. That is, in addition to directing the request to be separately routed to the outsourced third party entity, the routing codes also indicate an appropriate distribution for the request client or other end user. The request is now completed.

15 A special circumstance occurs when the record date of one portion of the client's request is earlier than or equal to one year before the current date, and when the record date of another portion of the client's request is later than one year before the current date. These types of requests are known in the industry as spanned requests. One solution is to incorporate an additional interface utilized when the employee of the bank is utilizing the
20 computer terminal 11 and comparing the specific document parameter of the requested financial document to the predetermined parameter to determine if the specific document

parameter is greater than, less than, or equal to the predetermined parameter. If the request is a spanned request, then the request will be split into two separate requests which can be handled simultaneously. A special notation would be put onto the requests such that they may be put back together before distributing the documents to the client or other end user.

- 5 Another solution simply notifies the inputting employee that two requests should be entered separately. A third solution sends the request to the back office production at the bank wherein the back office employees notify the outsourced third party entity by a separate request to retrieve the requested financial documents.

The invention has been described in an illustrative manner, and it is to be
10 understood that the terminology which has been used is intended to be in the nature of words of description rather than of limitation. Obviously, many modifications and variations of the present invention are possible in light of the above teachings. It is, therefore, to be understood that within the scope of the appended claims, wherein reference numerals are merely for convenience and are not to be in any way limiting, the
15 invention may be practiced otherwise than as specifically described.

ABSTRACT

An electronically stored financial document is either maintained in a first storage system when a parameter associated with the document is greater than a pre-selected parameter or in a second storage system when the parameter associated with the document is less than or equal to the pre-selected parameter. A request for a stored financial document is received and the requested financial document parameter is compared to the pre-selected financial document parameter to determine if the electronically stored financial document's parameter is more than, less than, or equal to the pre-selected parameter. In processing the request, a processing unit electronically accesses one of the storage systems in response to the comparison of the pre-selected parameter to the electronically stored financial document's parameters. After accessing the appropriate storage system, the requested electronically stored financial document can be reproduced, and/or distributed.

BACKGROUND OF THE INVENTION

1) TECHNICAL FIELD

20 The subject invention relates to a method for a financial institution to obtain
electronically-stored financial documents from an off-site storage system remotely-
located from an on-site storage system.

2) DESCRIPTION OF THE PRIOR ART

5 Methods for obtaining electronically-stored financial documents are generally known in the art. Financial institutions, such as banks and credit unions, utilize such methods to rapidly and efficiently obtain financial documents for distribution to clients upon request. Such financial documents include paid checks, account statements, and other related documents. These financial documents are typically stored on microfiche,
10 microfilm, digitally, or by some other electronic storage means. Further, these financial documents are typically electronically-stored in an on-site storage system located at the financial institution or in an off-site storage system. Electronic storage of these financial documents permits financial institutions to eliminate storage of paper or "hard" copies of these documents. The electronic storage of these documents also provides a means of
15 retrieving the information from the on-site and off-site storage systems.

 Once the document is stored, the client may request an image of a particular stored document. Client requests are made to replace lost or stolen documents, for tax purposes, for proof of financial transactions, for legal disputes, and other similar matters. The client's request is inputted into a computer terminal at the financial institution. More
20 specifically, conventional methods for obtaining an electronically-stored financial document enable an employee of the financial institution, such as a bank teller, to input

the request into an interface incorporated into the computer terminal. The interface is inter-linked with the on-site storage system. Typically, all requests for a particular period are grouped together and subsequently downloaded for retrieval of the requested image by the financial institution. The financial institution retrieves the image, e.g. a photocopy of
5 the check, and then distributes the photocopy to the client via facsimile, mail or hand delivery. The storing, downloading, and retrieving of the financial document, including the reproduction and the distribution of the document, are known in the industry as back office production. Back office production for financial institutions is particularly resource intensive, time consuming, and expensive. Also, back office production
10 becomes increasingly expensive if the client requests a particularly old financial document because older financial documents frequently require more resources and time to locate and retrieve.

The majority of financial institutions electronically store financial documents only in an on-site storage system and not in an off-site storage system. Consequently, these
15 financial institutions are unable to outsource the responsibilities for the back office production to third party entities to alleviate the expenses and resources associated with the back office production. These financial institutions realize a significant financial burden since the back office production is concentrated strictly at the financial institution.

Other financial institutions do electronically store financial documents in on-site and
20 off-site storage systems. However, the methods utilized by these financial institutions to access the financial documents stored in the off-site storage system are deficient in that the

interface utilized in such methods is only inter-linked with the on-site storage system. That is, there is no interface independently inter-linked with the off-site storage system. As a result, the financial documents stored in the off-site storage system can not be efficiently accessed. These financial institutions are still responsible for retrieving the requested financial documents through their back office production and their expenses remain high. One such method of retrieving documents from on-site and off-sited storage systems is disclosed in United States Patent No. 5,784,610 to Copeland, III et al.

Due to the inefficiencies identified in the conventional methods used by financial institutions to obtain financial documents, it is desirable to implement a method for a financial institution to obtain electronically-stored financial documents from both on-site and off-site storage systems that reduces, if not eliminates, the back office production of the financial institution by providing a direct interface inter-linked with the off-site storage system. With such an interface, the responsibility for retrieving financial documents from the off-site storage can be outsourced to third party entities while still providing the financial institution with efficient access to any financial documents electronically-stored in the off-site storage system.

SUMMARY OF THE INVENTION AND ADVANTAGES

A method for a financial institution to obtain electronically-stored financial documents having a specific document parameter is disclosed. The specific document parameter is typically a particular numerical sequence, such as a record date of the

financial document. The method of the subject invention enables the financial institution to obtain the financial documents from a first or an off-site storage system. The first or off-site storage system is ~~remotely-located~~ different from a second or an on-site storage system and is preferably remotely-located from the second or on-site storage system. In

5 one embodiment, the [[The]] financial documents of the financial institution are maintained in the first or off-site storage system when the specific document parameter of the financial document is greater than a predetermined parameter. The financial documents that are less than or equal to the predetermined parameter are maintained in the second or on-site storage system. In another embodiment, the specific document

10 parameter of the financial document that is less than or equal to the predetermined parameter is maintained in the first or off-site storage system and the financial document that is greater than the predetermined parameter is maintained in the second or on-site storage system.

When the financial institution receives a request for a financial document, the

15 financial institution compares the specific document parameter of the requested financial document to the predetermined parameter to determine if the specific document parameter is greater than, less than, or equal to the predetermined parameter. A computer terminal located at the financial institution is connected to both the off-site and on-site storage systems through a processing unit. The ~~computer terminal~~ processing unit is

20 utilized to, at least partially, automatically access one of the storage systems in response to the comparison of the specific document parameter to the predetermined parameter.

**Marked-Up Substitute Specification
Submitted on December 6, 2013
Application No. 13/840,892**

For instance, if it is determined that the specific document parameter is less than or equal to the predetermined document parameter, then the ~~computer terminal~~ processing unit accesses the second or on-site storage system. On the other hand, if it is determined that the specific document parameter of the financial document is greater than the predetermined parameter, then the ~~computer terminal~~ processing unit accesses the first or off-site storage system. As stated below, the computer terminal may be used to feed a request into the processing unit.

~~After the computer terminal accesses the appropriate storage system, identification data of the requested financial document is inputted into the computer. More specifically, to access the on-site storage system, the identification data is input into a primary interface that is specifically inter-linked with the on-site storage system. To access the off-site storage system, an exit function is selected at the primary interface and the identification data is then input into a secondary interface that is initiated upon selection of the exit function. The secondary interface is specifically inter-linked with the off-site storage system.~~

~~Finally, after the identification data of~~ After the requested financial document is accessed ~~inputted~~, the requested document is then retrieved in order to reproduce the financial document, and distribute the financial document to an end user of the financial institution.

The subject invention therefore provides a method that enables financial

institutions to obtain electronically-stored financial documents from ~~[[an]]~~ on-site and
off-site storage ~~systems~~ system ~~via a secondary interface that is specifically inter-linked~~
~~with the off-site storage system and the financial documents electronically stored in that~~
~~system.~~ As such, the financial institution can selectively store financial documents in
5 either an on-site storage system or the off-site storage system, and the responsibility for
the financial documents in the on-site or off-site storage ~~systems~~ system can be
outsourced to a third party entity. Further, the documents can be stored in different fixed
mediums, such as microfiche, microfilm, digitally, electronically, etc., and can be stored
in different geographical locations. Therefore, the back office production of the financial
10 institution associated with the retrieval and distribution of financial documents stored in
the on-site or off-site storage ~~systems~~ system is strategically reduced or even completely
eliminated.

BRIEF DESCRIPTION OF THE DRAWINGS

Other advantages of the present invention will be readily appreciated as the same
15 becomes better understood by reference to the following detailed description when
considered in connection with the accompanying drawings wherein:

Figure 1 is a flow diagram schematically detailing an on-site storage system, and an
off-site storage system in accordance with the subject invention;

Figure 2 is a block diagram generally representing a method for a financial
20 institution to obtain electronically-stored financial documents from the on-site and off-site
storage systems;

Figure 3 is a block diagram completing the method of obtaining electronically-stored financial documents from the on-site storage system; and

Figure 4 is a block diagram completing the method of obtaining electronically-stored financial documents from the off-site storage system.

5

DETAILED DESCRIPTION OF THE PREFERRED EMBODIMENT

Referring to the Figures, wherein like numerals indicate like or corresponding parts throughout the several views, a method for a financial institution to obtain an electronically-stored financial document is schematically shown at 10 in Figure 1. The method introduced in the subject invention enables the financial institution to obtain the financial document from one of a first or an off-site storage system and remotely located ~~from~~ a second or an on-site storage system with the storage systems being different from each other. Preferably, the on-site storage system is located at the financial institution and the off-site storage system is located at a remote location distant from the financial institution. This allows the financial institution to ‘outsource’ the responsibilities associated with obtaining the financial document.

Methods for financial institutions to obtain electronically-stored documents are frequently used by such entities as banks, credit unions, and other financially-oriented institutions. For illustrative purposes only, the description of the subject invention is discussed with reference to banks. However, as appreciated by those skilled in the art,

20

other businesses, such as insurance companies, may also utilize similar methods and incorporate the aspects of the subject invention.

Methods for banks to obtain electronically-stored financial documents are generally used by banks to rapidly and efficiently obtain financial documents for
5 distribution to clients upon request. As described above, the financial documents for banks are usually paid checks, checking statements, and other related financial documents, and these documents include at least one specific document parameter. As appreciated by those skilled in the art, it is not the financial document (e.g. the paid check) itself that is electronically-stored. Rather, it is data included on the document such
10 as a sequence number that is electronically stored to make up the financial document. The specific document parameter is preferably a particular numerical sequence. As appreciated, the specific document parameter of the financial document can include, but is not limited to, a record date or age of the document, a series number, or some other document identifying number of the financial document. More specifically, in the
15 preferred embodiment of the subject invention, the particular numerical sequence of the financial document is the record date of the financial document. That is, the date that the particular financial document was created or posted.

The financial documents are typically stored on microfiche, microfilm, digitally, or by some other electronic storage means. As appreciated, the electronic storage of the
20 financial documents is frequently created by taking an electronic photo image of the document and storing the photo image in a computer system. One such digital electronic

storage device is sold by Kodak under the name of *IMAGELINKTM* Digital Workstation (IDW). Electronic storage of these financial documents permits banks to eliminate storage of paper or "hard" copies of these documents. The electronic storage of these documents also provides an efficient means of retrieving the information from the on-site and off-site storage systems. This will be discussed further herein below.

As described above, the financial documents are electronically-stored in either the on-site storage system located at the bank or in the off-site storage system remotely located from the on-site storage system. More specifically, the subject invention includes the step of maintaining the financial documents in the off-site storage system when the specific document parameter of the financial document is greater than a predetermined parameter. Financial documents are maintained in the on-site storage system when the specific document parameter of the financial document is less than or equal to the predetermined parameter. As appreciated, the document parameter of the financial documents stored in the off-site storage system may be greater than or equal to the predetermined parameter with the on-site storage system having documents only less than the predetermined parameter.

Similar to the specific document parameter of the financial document, the predetermined parameter is also a numerical value. The predetermined parameter is specifically a numerical value predetermined by the bank. For instance, if the specific document parameter is a series number of a paid check and the series number is greater

than the predetermined parameter which, in this case, would be an arbitrarily selected base series number, then the paid check would be stored in the off-site storage system.

In the preferred embodiment of the subject invention, the predetermined numerical value is a date pre-selected by the bank. For instance, the bank may pre-select a date that
5 is one year before a current date—the current date being the actual date that the client requests the financial document. Of course, the bank may pre-select a date that is some other time period before a current date (e.g. two or three years) without varying from the scope of the subject invention. As such, if the record date of the particular financial document is older than one year, then the particular financial document is maintained in
10 the off-site storage system. If the record date of the particular financial document is earlier than or equal to one year, then the particular financial document is maintained in the on-site storage system. As discussed above, the document having record dates equal to the one year may be stored in the off-site or on-site storage systems.

Once the financial document is maintained in the appropriate storage system, the
15 bank is capable of receiving a request for the financial document from the client. In reality, the client is requesting an image of the stored financial document. As appreciated, clients request the image for various reasons. As discussed above, requests are typically made for replacing lost or stolen financial documents, for tax purposes, for proof of financial transactions, for legal disputes, and other similar matters. Ultimately,
20 the bank retrieves the image, reproduces the image, and distributes the reproduced image to the requesting client of the bank.

Referring now to Figure 1, the method for banks to obtain electronically-stored financial documents is discussed in detail in accordance with a general scope of the subject invention. Initially, the requesting client requests a particular financial document, such as a paid check. The client is typically a customer of the bank or other financial institution. The client's request is inputted into a computer terminal 11 at the financial institution. The computer terminal 11 will be discussed in more detail hereinbelow.

From the computer terminal 11, the request is fed into a processing unit 12, which is illustrated as a mainframe computer 12 at the bank. In the preferred embodiment of the subject invention, if the client requests a financial document having a record date earlier than or equal to one year before the current date, then the request, and other requests like it, are processed at the bank in the on-site storage system. That is, the requests are grouped together and downloaded to a downloading terminal 14 at the bank. The downloading may occur at particular intervals such as at the end of each day, every three hours, etc. The sequence number of each check requested is then determined. A document terminal 16 subsequently creates or reproduces the document, i.e., a photocopy of the check. The photocopy is then distributed to the client via facsimile, mail, or hand delivery.

It is known in the art that the majority of requests for financial documents are requests for documents which were created in the most recent year. That is, if the pre-selected date is one year before the current date, as in the preferred embodiment, then the majority of requests are seeking financial documents having a record date earlier than or

equal to the pre-selected date. The remaining document requests relate to financial documents that are older than one year. Since, as described in the Background of the Invention, retrieval of financial documents that are older than one year is particularly expensive, the preferred embodiment of the subject invention outsources all of the document requests which relate to documents having a record date later than one year before the current date. As appreciated, the particular time frame which is outsourced is not a critical feature of the subject invention and may be adjusted to meet the needs of any particular financial institution. In fact, all of the document requests, including the most recent, may be outsourced using the outsourcing procedure of the subject invention.

10 In the preferred embodiment, if the client requests a financial document having a record date later than one year before the current date, then the request, and others like it, are grouped together and downloaded from the mainframe computer 12 to an outsourced downloading terminal 18. As above, the downloading may be at particular intervals as needed. The sequence number is determined by a sequencing terminal 20. The sequence number is then sent back to the outsourced downloading terminal 18. An outsourced document terminal 22 then creates or reproduces the desired document which is then distributed to either the client or the bank. As appreciated, two document retrieval operations, one for the bank to retrieve financial documents having record dates earlier than or equal to one year before the current date, and another to retrieve outsourced financial documents having record dates later than one year before the current date, preferably operate simultaneously. It is to be understood that the computer terminals and the

accompanying PC bases are illustrated highly schematically in Figure 1 and are not intended to be limiting in any manner. For instance, the schematic illustration of the outsourced document terminal 22 need not include a computer terminal and an accompanying PC base. Instead, the outsourced document terminal 22 is preferably some sort of printing device.

5 Referring to Figures 2 through 4, the method for banks to obtain electronically-stored financial documents is described in even greater detail. The request is first generated by the client. The request is then processed by the bank. The processing, retrieval and reproduction of the requested financial document is typically controlled by one interlinked computer software program. One such computer software program is a software
10 program called Antinori Software Incorporated or ASI which is sold under the name of *INNOVATIONTM* by Carreker-Antinori of Dallas, Texas. However, other frequently used software programs include *PEGATM* and *SterlingTM*. Any of these computer software systems can provide the necessary means for implementing the discussed procedures.

 The processing of the request is completed by a customer service tracking system
15 and the computer terminal 11. The customer service tracking system assists the financial institution in receiving the request. More specifically, the customer service tracking system gives branches, customer service, and other bank departments the capability to enter, log, track, route and monitor the status of all requests for financial documents. The customer service tracking system also provides the capability to enter, log, track, route and
20 monitor the status of customer complaints and other customer service related items.

[[A]] In accordance with one contemplated embodiment of the invention, a bank

employee, such as a bank teller first determines a status of the requested document. More specifically, the employee compares the specific document parameter of the requested financial document to the predetermined parameter to determine if the specific document parameter is greater than, less than, or equal to the predetermined parameter. If the

5 specific document parameter is a particular numerical sequence and the predetermined parameter is a predetermined numerical value, then the employee compares the particular numerical sequence of the financial document to the predetermined numerical value to determine if the particular numerical sequence is greater than, less than, or equal to the predetermined numerical value. Further, if as in the preferred embodiment, the particular

10 numerical sequence is a record date of the financial document, and the predetermined numerical value is a pre-selected date, then the employee compares the record date of the financial document to the pre-selected date to determine if the record date is later than, earlier than, or equal to the pre-selected date.

The customer service tracking system enables a bank employee, such as a bank

15 teller, to submit the request. More specifically, the employee utilizes the computer terminal 11 located at the bank and connected to both the off-site and on-site storage systems to access one of the storage systems in response to the comparison of the specific document parameter of the requested financial document to the predetermined parameter. For instance, when the particular numerical sequence of the financial document is greater than

20 the predetermined numerical value, the employee preferably utilizes the computer terminal 11 to access the off-site storage system, and when the particular numerical

sequence of the financial document is less than or equal to the predetermined numerical value, the employee preferably utilizes the computer terminal 11 to access the on-site storage system. As discussed above, the documents have a numerical sequence equal to the predetermined numerical value may be stored in either the off-site or on-site storage systems.

After the computer terminal 11 is utilized to access the desired storage system, the employee manually inputs identification data of the requested financial document into the computer terminal 11. More specifically, when the particular numerical sequence of the financial document is less than or equal to the predetermined numerical value, the employee inputs identification data into a primary interface and selects the requested document. Also, the primary interface preferably provides an option for the employee to select among several different output formats. The primary interface is inter-linked with the on-site storage system. In the preferred embodiment of the subject invention, the primary interface appears as follows and includes the identification data detailed below:

**Marked-Up Substitute Specification

<i>EXIT FUNCTION</i>		

Alternatively, when the particular numerical sequence of the financial document is greater than the predetermined numerical value, the employee selects an exit function at the primary interface. The exit function distinguishes that the request is to be sent to an outsourcing third party entity. Upon selection of the exit function at the primary interface, a secondary interface, inter-linked with the exit function, is initiated. The secondary interface is inter-linked with the off-site storage system. The employee inputs identification data into the secondary interface and selects the requested document. Also,

5

the secondary interface preferably provides an option for the employee to select among several different output formats. Preferably, routing, or service codes will be generated automatically upon the initiation of the secondary interface and the inputting of the identification data into the secondary interface. The routing codes enable the bank to
5 recognize that the request is being sent to the outsourced third party entity. Furthermore, the routing codes are configured to automatically forward the inputted identification data to the off-site storage system. The inputted identification data and the routing codes are forwarded into the mainframe computer 12 introduced above for temporary storage before transfer to the off-site storage system. This temporary storage also serves to defend
10 against unexpected power outages, computer malfunctions, and the like. In the preferred embodiment of the subject invention, the secondary interface appears as follows and includes the identification data detailed below:

Once the bank employee has inputted the necessary identification data into either the primary or secondary interface, then retrieval of the financial document can continue. Specifically, the requested financial document is retrieved as defined by the inputted

5 identification data. Two separate document retrieval procedures are discussed hereinbelow.

One document retrieval procedure is for the financial documents having a record date earlier than or equal to the pre-selected date—one year before the current date in this example. The other document retrieval procedure is for the financial documents having a record date later than the pre-selected date. As discussed above, the one year timing

10 selected for the pre-selected date is simply shown as an example and any suitable time frame may be utilized. In fact, even all financial document retrievals may be outsourced to

the third party entity. As also discussed above, the two separate document retrieval procedures will typically operate simultaneously.

With reference to the subject example, if the record date of the financial document is earlier than or equal to one year before the current date, the remaining steps occur at the bank. As discussed above, these steps are known as the back office production of the bank. The request is first categorized by a research automation system. The research automation system automates the entire workflow of a bank's research and photocopy departments by sending requests to the appropriate sequence for processing. The downloading terminal 14 serves to perform the research automation system's tasks.

Photocopy requests are routed to an image control system, statement requests are sent to a document retrieval system, and requests for financial adjustments are routed to an adjustment system. The document terminal 16 serves to perform these tasks. In the illustrated embodiment of the subject invention, the sample document request is for a paid check. Hence, the categorized sequence will be the image control system which handles photocopy requests.

Referring now to Figure 3, after the request is categorized, the request is verified for completeness and accuracy. If the request is not complete then additional data is retrieved. The additional data is retrieved by using a sequence number retrieval system and/or an all items research system. Once the request is complete and accurate, then the image reference number can be determined. That is, once the request is complete and accurate, then the requested financial document can be electronically located in the on-site storage system.

The reference number may be a routing, sequence, or any other type of indicator. The reference number is determined by the image control system. The image control system is an image retrieval and routing management system which works in conjunction with Kodak's *IMAGELINK*TM Digital Workstations (IDW). Specifically, the image control
5 system first connects to a network node. The network node is any type of storage device as is known in the art. Preferably a Kodak network node is used. The network node drives the IDW to find the location of the image by using the reference number. Specifically, the employee is prompted to verify that the correct media is loaded in the IDW such that the IDW can locate the image. The reference number for the document is known and the
10 document image is now verified and located.

The requested image can now be retrieved and reproduced. In other words a copy of the digitized document (the check) is created. The copy may be created by manually pulling the microfilm, microfiche, or the like and photocopying the document. The copy may also be made by printing the document from a digitized record. The photocopy of
15 the check is then distributed to the requesting client or other end user of the financial institution. Other end users of the financial institution include, but are not limited to, other financial institutions and federal and state governments. Additional information such as a photocopy report, a statement of charges, a research report and/or a daily status report may also be produced for the requesting client, the other end user, and/or the
20 financial institution. The document retrieval system incorporated at the bank and the method for obtaining electronically-stored financial documents from the on-site storage

system is now completed.

Continuing with the subject example, if the record date of the financial document is later than one year before the current date, the automated retrieval of the financial document is outsourced to the third party entity. To begin, a separate file is automatically generated at the bank by the input of the identification data into the secondary interface. Referring specifically to Figure 4, the routing codes direct the request created on the separate file to be routed separately to the outsourced third party entity. In the preferred embodiment of the subject invention, additional user ID's are created to allow only selected users into the secondary interface. The identification data stored in the separate file and the routing codes are downloaded to the off-site storage system for retrieval of the requested financial documents by the outsourced downloading terminal 18. Preferably, the identification data and routing codes are grouped into batches of common requests for optimum retrieval of the requested financial document by the outsourced third party entity at the off-site storage system. The downloading step may occur at any suitable predetermined interval. Preferably, the downloading will occur three times a day. The downloaded documents are known in the industry as a basket of requests.

The subject method further includes the step of creating a back-up file of the downloaded identification data and routing codes in the off-site storage system. The back-up file acts as an emergency information source in case the mainframe computer 12 at the financial institution has a catastrophic failure. In addition, the outsourced third party entity is in direct connection with the mainframe computer 12 of the bank wherein the

outsourced third party entity may produce a backup directory of each database file. This database backup is an additional safe guard for the financial institution.

The downloaded identification data and routing codes are then categorized for processing in the off-site storage system. The research automation system categorizes this information in a like fashion as discussed above. In fact, the outsourced third party entity uses the same computer software package as the financial institution such that the flow of information is optimum and not interrupted. As discussed above, the subject example request is for a paid check. Hence, the request will be categorized into the image control system and a sequence number will be determined by the sequencing terminal 20. Also, a status to update the progress of the requested financial document is provided to the financial institution.

After the request is categorized, the request, specifically the inputted identification data, is verified for completeness and accuracy. If the request is not complete or accurate, then additional data is retrieved. In a similar fashion as above, the additional data is retrieved by using the sequence number retrieval system and/or the all items research system. As appreciated, the outsourced third party entity may retrieve this information from the mainframe computer 12, via its direct line, or from its own backup database files. Once the request is complete and accurate, the image reference number can be determined. Again, as above, the reference number is determined by the image control system.

The requested image is then retrieved. More specifically, the requested financial

document is electronically located in the off-site storage system. Additionally, the requested financial document is also reproduced after the document is electronically located in the off-site storage system by the outsourced document terminal 22. In other words, a copy of the digitized document (the check) is created. A status file is then
5 created for the completed transaction. Also, a status of the request is sent to the financial institution wherein the institution may update their records. The status updates, as well as the information connections, create a two way information exchange between the outsourced third party entity and the bank.

The photocopy of the check is then distributed or digitally transferred to the
10 requesting client, the financial institution, or other end users of the financial institution. In the preferred embodiment of the subject invention, the photocopy of the request is distributed to the requesting client, etc. based on the routing codes. That is, in addition to directing the request to be separately routed to the outsourced third party entity, the routing codes also indicate an appropriate distribution for the request client or other end
15 user. The request is now completed.

A special circumstance occurs when the record date of one portion of the client's request is earlier than or equal to one year before the current date, and when the record date of another portion of the client's request is later than one year before the current date. These types of requests are known in the industry as spanned requests. One solution is to
20 incorporate an additional interface utilized when the employee of the bank is utilizing the computer terminal 11 and comparing the specific document parameter of the requested

financial document to the predetermined parameter to determine if the specific document parameter is greater than, less than, or equal to the predetermined parameter. If the request is a spanned request, then the request will be split into two separate requests which can be handled simultaneously. A special notation would be put onto the requests such that they
5 may be put back together before distributing the documents to the client or other end user. Another solution simply notifies the inputting employee that two requests should be entered separately. A third solution sends the request to the back office production at the bank wherein the back office employees notify the outsourced third party entity by a separate request to retrieve the requested financial documents.

10 The invention has been described in an illustrative manner, and it is to be understood that the terminology which has been used is intended to be in the nature of words of description rather than of limitation. Obviously, many modifications and variations of the present invention are possible in light of the above teachings. It is, therefore, to be understood that within the scope of the appended claims, wherein
15 reference numerals are merely for convenience and are not to be in any way limiting, the invention may be practiced otherwise than as specifically described.

ABSTRACT

A method for a bank to obtain an electronically stored financial document is disclosed. The financial document includes a specific document parameter, such as a record date. The bank maintains the financial document in an off-site storage system when the record date is later than a pre-selected date and in an on-site storage system when the record date is earlier than or equal to the pre-selected date. The off-site storage system is remotely located from the on-site storage system. The bank receives a request for the financial document from a client and compares the record date to the pre-selected date to determine if the record date is later than, earlier than, or equal to the pre-selected date. In processing the request, the bank utilizes a computer terminal connected to the off-site and on-site storage systems to access one of the storage systems in response to the comparison of the record date to the pre-selected date. After accessing the appropriate storage system, the bank inputs data into the computer terminal to identify the requested financial document and then retrieves the requested financial document. The bank then reproduces the requested financial document and distributes the requested financial document to the requesting client, or some other end-user of the bank.

An electronically stored financial document is either maintained in a first storage system when a parameter associated with the document is greater than a pre-selected parameter or in a second storage system when the parameter associated with the document is less than or equal to the pre-selected parameter. A request for a stored financial document is received and the requested financial document parameter is compared to the pre-selected financial document parameter to determine if the electronically stored financial document's

**Marked-Up Substitute Specification
Submitted on December 6, 2013
Application No. 13/840,892**

parameter is more than, less than, or equal to the pre-selected parameter. In processing the request, a processing unit electronically accesses one of the storage systems in response to the comparison of the pre-selected parameter to the electronically stored financial document's parameters. After accessing the appropriate storage system, the requested electronically stored
5 financial document can be reproduced, and/or distributed.

Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it contains a valid OMB control number.

Foreign Priority Information:

This section allows for the applicant to claim priority to a foreign application. Providing this information in the application data sheet constitutes the claim for priority as required by 35 U.S.C. 119(b) and 37 CFR 1.55(d). When priority is claimed to a foreign application that is eligible for retrieval under the priority document exchange program (PDX)ⁱ the information will be used by the Office to automatically attempt retrieval pursuant to 37 CFR 1.55(h)(1) and (2). Under the PDX program, applicant bears the ultimate responsibility for ensuring that a copy of the foreign application is received by the Office from the participating foreign intellectual property office, or a certified copy of the foreign priority application is filed, within the time period specified in 37 CFR 1.55(g)(1).

Privacy Act Statement

The Privacy Act of 1974 (P.L. 93-579) requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether the Freedom of Information Act requires disclosure of these records.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (i.e., GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspections or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

**RESPONSE TO NOTICE TO FILE
MISSING PARTS OF NONPROVISIONAL APPLICATION
Filing Date Granted**

Commissioner for Patents
P.O. Box 1450
Alexandria, Virginia 22313-1450

Sir:

In response to the Notice to File Missing Parts of Nonprovisional Application mailed on May 9, 2013, submitted herewith is the required substitute specification with markings and a clean version (without markings) as set forth in 37 CFR 1.125(c). The substitute specification contains no new matter and reflects the revisions made in a concurrently filed Second Preliminary Amendment. Also submitted herewith is a corrected Application Data Sheet and Power of Attorney.

Applicant is authorizing The Commissioner to charge \$4,740.00 (the required petition fee under 37 CFR 1.16(f) of \$140.00, \$3,000.00 three month extension of time, \$280.00 statutory filing fee, \$600.00 search fee and \$720.00 examination fee), to deposit account 08-2789 in the name of Howard and Howard Attorneys PLLC. The Commissioner is hereby authorized to charge any additional fees or credit any overpayments to the undersigned's deposit account 08-2789.

Respectfully submitted,

HOWARD & HOWARD ATTORNEYS PLLC

Dated: December 6, 2013

Power of Attorney: None

Domestic Applications for which benefit is claimed - None.

A proper domestic benefit claim must be provided in an Application Data Sheet in order to constitute a claim for domestic benefit. See 37 CFR 1.76 and 1.78.

Foreign Applications for which priority is claimed (You may be eligible to benefit from the **Patent Prosecution Highway** program at the USPTO. Please see <http://www.uspto.gov> for more information.) - None.

Foreign application information must be provided in an Application Data Sheet in order to constitute a claim to foreign priority. See 37 CFR 1.55 and 1.76.

If Required, Foreign Filing License Granted: 04/29/2013

The country code and number of your priority application, to be used for filing abroad under the Paris Convention, is **US 13/840,892**

Projected Publication Date: To Be Determined - pending completion of Missing Parts

Non-Publication Request: No

Early Publication Request: No

Title

Method of Obtaining An Electronically-Stored Financial Document

Preliminary Class

382

Statement under 37 CFR 1.55 or 1.78 for AIA (First Inventor to File) Transition Applications:**PROTECTING YOUR INVENTION OUTSIDE THE UNITED STATES**

Since the rights granted by a U.S. patent extend only throughout the territory of the United States and have no effect in a foreign country, an inventor who wishes patent protection in another country must apply for a patent in a specific country or in regional patent offices. Applicants may wish to consider the filing of an international application under the Patent Cooperation Treaty (PCT). An international (PCT) application generally has the same effect as a regular national patent application in each PCT-member country. The PCT process **simplifies** the filing of patent applications on the same invention in member countries, but **does not result** in a grant of "an international patent" and does not eliminate the need of applicants to file additional documents and fees in countries where patent protection is desired.

Almost every country has its own patent law, and a person desiring a patent in a particular country must make an application for patent in that country in accordance with its particular laws. Since the laws of many countries differ in various respects from the patent law of the United States, applicants are advised to seek guidance from specific foreign countries to ensure that patent rights are not lost prematurely.

Applicants also are advised that in the case of inventions made in the United States, the Director of the USPTO must issue a license before applicants can apply for a patent in a foreign country. The filing of a U.S. patent application serves as a request for a foreign filing license. The application's filing receipt contains further information and guidance as to the status of applicant's license for foreign filing.

Applicants may wish to consult the USPTO booklet, "General Information Concerning Patents" (specifically, the section entitled "Treaties and Foreign Patents") for more information on timeframes and deadlines for filing foreign patent applications. The guide is available either by contacting the USPTO Contact Center at 800-786-9199, or it can be viewed on the USPTO website at <http://www.uspto.gov/web/offices/pac/doc/general/index.html>.

For information on preventing theft of your intellectual property (patents, trademarks and copyrights), you may wish to consult the U.S. Government website, <http://www.stopfakes.gov>. Part of a Department of Commerce initiative, this website includes self-help "toolkits" giving innovators guidance on how to protect intellectual property in specific countries such as China, Korea and Mexico. For questions regarding patent enforcement issues, applicants may call the U.S. Government hotline at 1-866-999-HALT (1-866-999-4158).

LICENSE FOR FOREIGN FILING UNDER
Title 35, United States Code, Section 184
Title 37, Code of Federal Regulations, 5.11 & 5.15

GRANTED

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under 37 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Bureau of Industry and Security, Department of Commerce (15 CFR parts 730-774); the Office of Foreign Assets Control, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

NOT GRANTED

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).

SelectUSA

The United States represents the largest, most dynamic marketplace in the world and is an unparalleled location for business investment, innovation, and commercialization of new technologies. The U.S. offers tremendous resources and advantages for those who invest and manufacture goods here. Through SelectUSA, our nation works to promote and facilitate business investment. SelectUSA provides information assistance to the international investor community; serves as an ombudsman for existing and potential investors; advocates on behalf of U.S. cities, states, and regions competing for global investment; and counsels U.S. economic development organizations on investment attraction best practices. To learn more about why the United States is the best country in the world to develop technology, manufacture products, deliver services, and grow your business, visit <http://www.SelectUSA.gov> or call +1-202-482-6800.

CONFIRMATION NO. 4281 FORMALITIES LETTER

Date Mailed: 05/09/2013

NOTICE TO FILE MISSING PARTS OF NONPROVISIONAL APPLICATION

FILED UNDER 37 CFR 1.53(b)

Filing Date Granted

Items Required To Avoid Abandonment:

An application number and filing date have been accorded to this application. The item(s) indicated below, however, are missing. Applicant is given **TWO MONTHS** from the date of this Notice within which to file all required items below to avoid abandonment. Extensions of time may be obtained by filing a petition accompanied by the extension fee under the provisions of 37 CFR 1.136(a).

- The statutory basic filing fee is missing.
Applicant must submit \$280 to complete the basic filing fee for an undiscounted entity. If appropriate, applicant may make a written assertion of entitlement to small entity status and pay the small entity filing fee (37 CFR 1.27) or make a certification of entitlement to micro entity status and pay the micro entity filing fee (37 CFR 1.29).

The application is informal since it does not comply with the regulations for the reason(s) indicated below.

The required item(s) identified below must be timely submitted to avoid abandonment:

- A substitute specification excluding claims in compliance with 37 CFR 1.52, 1.121(b)(3), and 1.125 is required. The substitute specification must be submitted with markings and be accompanied by a clean version (without markings) as set forth in 37 CFR 1.125(c) and a statement that the substitute specification contains no new matter (see 37 CFR 1.125(b)). Since a preliminary amendment was present on the filing date of the application and such amendment is part of the original disclosure of the application, the substitute specification must include all of the desired changes made in the preliminary amendment. See 37 CFR 1.115 and 1.215.

Applicant is cautioned that correction of the above items may cause the specification and drawings page count to exceed 100 pages. If the specification and drawings exceed 100 pages, applicant will need to submit the required application size fee.

The applicant needs to satisfy supplemental fees problems indicated below.

The required item(s) identified below must be timely submitted to avoid abandonment:

- A surcharge (for late submission of the basic filing fee, search fee, examination fee or inventor's oath or declaration) as set forth in 37 CFR 1.16(f) of \$ **140** for an undiscounted entity, must be submitted.

SUMMARY OF FEES DUE:

Total fee(s) required within **TWO MONTHS** from the date of this Notice is \$ **1740** for an undiscounted entity

- \$ **280** Statutory basic filing fee.
- \$ **140** Surcharge.
- The application search fee has not been paid. Applicant must submit \$ **600** to complete the search fee.
- The application examination fee has not been paid. Applicant must submit \$ **720** to complete the examination fee for an undiscounted entity.

Items Required To Avoid Processing Delays:

Applicant is notified that the above-identified application contains the deficiencies noted below. No period for reply is set forth in this notice for correction of these deficiencies. However, if a deficiency relates to the inventor's oath or declaration, the applicant must file an oath or declaration in compliance with 37 CFR 1.63, or a substitute statement in compliance with 37 CFR 1.64, executed by or with respect to each actual inventor no later than the expiration of the time period set in the "Notice of Allowability" to avoid abandonment. See 37 CFR 1.53(f).

- A properly executed inventor's oath or declaration has not been received for the following inventor(s):
All
Applicant may submit the inventor's oath or declaration at any time before the Notice of Allowance and Fee(s) Due, PTOL-85, is mailed.

Replies must be received in the USPTO within the set time period or must include a proper Certificate of Mailing or Transmission under 37 CFR 1.8 with a mailing or transmission date within the set time period. For more information and a suggested format, see Form PTO/SB/92 and MPEP 512.

Replies should be mailed to:

Mail Stop Missing Parts
Commissioner for Patents
P.O. Box 1450
Alexandria VA 22313-1450

Registered users of EFS-Web may alternatively submit their reply to this notice via EFS-Web.

Title: METHOD OF OBTAINING ELECTRONICALLY-STORED FINANCIAL
DOCUMENTS

PRELIMINARY AMENDMENT

**Mail Stop Amendment Commissioner
for Patents**

P.O. Box 1450
Alexandria, Virginia 22313-1450

Dear Sir:

Prior to examination of the above-identified application, please amend the subject application as follows and consider the accompanying remarks.

Amendments to the specification begin on page 2. Amendments to the Abstract begin on page 7. A complete listing of the claims ever presented in the application, along with any current amendments thereto, begins on page 9.

Amendments to the Specification

Please amend the paragraph beginning at page 4, line 5, as follows:

This patent application is a continuation of U.S. Patent Application Serial No. 13/838,554
filed on March 15, 2013 now _____ which is a continuation of U.S. Patent
Application Serial No. 13/272,936 filed on October 13, 2011 now _____ which is
continuation of U.S. Patent Application Serial No. 12/902,973 filed on October 12, 2010
now abandoned, which is a continuation of U.S. Patent Application Serial No. 12/489,087
filed on June 22, 2009, now U.S. Patent No. 7,836,067, which is a continuation of U.S.
Patent Application Serial No. 11/202,790 filed on August 12, 2005, now U.S. Patent No.
7,552,118, which is a continuation of U.S. Patent Application Serial No. 10/104,541 filed
on March 22, 2002, now U.S. Patent No. 6,963,866, which is a continuation of U.S. Patent
Application Serial No. 09/548,490 filed on April 13, 2000, now U.S. Patent No. 6,446,072,
which in turn claims priority to and all the advantages of United States Provisional Patent
Application Serial No. 60/129,021, which was filed on April 13, 1999 ~~and is entitled~~
~~“REMOTE DOCUMENT RETRIEVAL AND STORAGE SYSTEM”.~~

Please amend the paragraph beginning at page 4, line 5, as follows:

A method for a financial institution to obtain electronically-stored financial documents having a specific document parameter is disclosed. The specific document parameter is typically a particular numerical sequence, such as a record date of the financial document. The method of the subject invention enables the financial institution to obtain the financial documents from a first or an off-site storage system. The first or off-site storage system is ~~remotely located different from a second or an on-site storage system~~ and is preferably remotely-located from the second or on-site storage system. In one embodiment, the [[The]] financial documents of the financial institution are maintained in the first or off-site storage system when the specific document parameter of the financial document is greater than a predetermined parameter. The financial documents that are less than or equal to the predetermined parameter are maintained in the second or on-site storage system. In another embodiment, the specific document parameter of the financial document that is less than or equal to the

predetermined parameter is maintained in the first or off-site storage system and the financial document that is greater than the predetermined parameter is maintained in the second or on-site storage system.

Please amend the paragraph beginning at page 4, line 15, as follows;

When the financial institution receives a request for a financial document, the financial institution compares the specific document parameter of the requested financial document to the predetermined parameter to determine if the specific document parameter is greater than, less than, or equal to the predetermined parameter. A computer terminal located at the financial institution is connected to both the off-site and on-site storage systems through a processing unit. The ~~computer terminal~~ processing unit is utilized to, at least partially, automatically access one of the storage systems in response to the comparison of the specific document parameter to the predetermined parameter. For instance, if it is determined that the specific document parameter is less than or equal to the predetermined document parameter, then the ~~computer terminal~~ processing unit accesses the second or on-site storage system. On the other hand, if it is determined that the specific document parameter of the financial document is greater than the predetermined parameter, then the ~~computer terminal~~ processing unit accesses the first or off-site storage system. As stated below, the computer terminal may be used to feed a request into the processing unit.

Please delete the paragraph beginning at page 5, line 5, and ending at page line 12.

Please amend the paragraph beginning at page 5, line 13, as follows;

~~Finally, after the identification data of~~ After the requested financial document is accessed ~~inputted~~, the requested document is then retrieved in order to reproduce the financial document, and distribute the financial document to an end user of the financial institution.

Please amend the paragraph beginning at page 5, line 16, as follows;

The subject invention therefore provides a method that enables financial institutions to obtain electronically-stored financial documents from ~~[[an]]~~ on-site and off-site storage ~~systems~~ system ~~via a secondary interface that is specifically inter linked with the off site storage system and the financial documents electronically stored in that system.~~ As such, the financial institution can selectively store financial documents in either an on-site storage system or the off-site storage system, and the responsibility for the financial documents in the on-site or off-site storage systems ~~system~~ can be outsourced to a third party entity. Further, the documents can be stored in different fixed mediums, such as microfiche, microfilm, digitally, electronically, etc., and can be stored in different geographical locations. Therefore, the back office production of the financial institution associated with the retrieval and distribution of financial documents stored in the on-site or off-site storage systems ~~system~~ is strategically reduced or even completely eliminated.

Please amend the paragraph beginning at page 6, line 20, as follows;

Referring to the Figures, wherein like numerals indicate like or corresponding parts throughout the several views, a method for a financial institution to obtain an electronically-stored financial document is schematically shown at 10 in Figure 1. The method introduced in the subject invention enables the financial institution to obtain the financial document from one of a first or an off-site storage system and ~~remotely located from a second or an on-site storage system~~ with the storage systems being different from each other. Preferably, the on-site storage system is located at the financial institution and the off-site storage system is located at a remote location distant from the financial

institution. This allows the financial institution to 'outsource' the responsibilities associated with obtaining the financial document.

Please amend the paragraph beginning at page 10, line 7, as follows;

Referring now to Figure 1, the method for banks to obtain electronically-stored financial documents is discussed in detail in accordance with a general scope of the subject invention. Initially, the requesting client requests a particular financial document, such as a paid check. The client is typically a customer of the bank or other financial institution. The client's request is inputted into a computer terminal 11 at the financial institution. The computer terminal 11 will be discussed in more detail herein below.

Please amend the paragraph beginning at page 10, line 13, as follows;

From the computer terminal 11, the request is fed into a processing unit 12, which is illustrated as a mainframe computer 12 at the bank. In the preferred embodiment of the subject invention, if the client requests a financial document having a record date earlier than or equal to one year before the current date, then the request, and other requests like it, are processed at the bank in the on-site storage system. That is, the requests are grouped together and downloaded to a downloading terminal 14 at the bank. The downloading may occur at particular intervals such as at the end of each day, every three hours, etc. The sequence number of each check requested is then determined. A document terminal 16 subsequently creates or reproduces the document, i.e., a photocopy of the check. The photocopy is then distributed to the client via facsimile, mail, or hand delivery.

Please amend the paragraph beginning at page 13, line 2, as follows;

[[A]] In accordance with one contemplated embodiment of the invention, a bank employee, such as a bank teller first determines a status of the requested document. More

specifically, the employee compares the specific document parameter of the requested financial document to the predetermined parameter to determine if the specific document parameter is greater than, less than, or equal to the predetermined parameter. If the specific document parameter is a particular numerical sequence and the predetermined parameter is a predetermined numerical value, then the employee compares the particular numerical sequence of the financial document to the predetermined numerical value to determine if the particular numerical sequence is greater than, less than, or equal to the predetermined numerical value. Further, if as in the preferred embodiment, the particular numerical sequence is a record date of the financial document, and the predetermined numerical value is a pre-selected date, then the employee compares the record date of the financial document to the pre-selected date to determine if the record date is later than, earlier than, or equal to the pre-selected date.

Amendments to the Abstract

Please amend the Abstract as follows;

~~A method for a bank to obtain an electronically stored financial document is disclosed. The financial document includes a specific document parameter, such as a record date. The bank maintains the financial document in an off-site storage system when the record date is later than a pre-selected date and in an on-site storage system when the record date is earlier than or equal to the pre-selected date. The off-site storage system is different remotely located from the on-site storage system. The bank receives and inputs a request for the financial document from a client and compares the record date to the pre-selected date to determine if the record date is later than, earlier than, or equal to the pre-selected date. In processing the request, the bank utilizes a computer terminal, connected to the off-site and on-site storage systems through a processing unit, to access one of the storage systems in response to the comparison of the record date to the pre-selected date. After accessing the appropriate storage system, the bank inputs data into the computer terminal to identify the requested financial document and then retrieves the requested financial document. The bank then reproduces the requested financial document and distributes the requested financial document to the requesting client, or some other end-user of the bank.~~

An electronically stored financial document is either maintained in a first storage system when a parameter associated with the document is greater than a pre-selected parameter or in a second storage system when the parameter associated with the document is less than or equal to the pre-selected parameter. A request for a stored financial document is received and the requested financial document parameter is compared to the pre-selected financial document parameter to determine if the electronically stored financial document's parameter is more than, less than, or equal to the pre-selected parameter. In processing the request, a processing unit electronically accesses one of the storage systems in response

to the comparison of the pre-selected parameter to the electronically stored financial document's parameters. After accessing the appropriate storage system, the requested electronically stored financial document can be reproduced, and/or distributed.

Amendments to the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application.

1. - 22. (Cancelled).

23. (New)

24. (New) A system comprising:

- a. a first storage system including a first fixed medium, the first storage system configured to:
 - i. store a plurality of financial documents in the first fixed medium when a specific document parameter of a financial document is greater than a predetermined parameter;
 - ii. in response to a request, retrieve a financial document stored in the first fixed medium;
- b. a second storage system including a second fixed medium, the second storage system configured to:
 - i. store a plurality of financial documents in the second fixed medium when the specific document parameter is less than or equal to the predetermined parameter;
 - ii. in response to a request, retrieve a financial document stored in the second fixed medium;
- c. a processing unit which has electronic access to the first and second storage systems, wherein the processing unit is configured to:
 - i. compare a specific requested document parameter of a requested financial document to the predetermined parameter;
 - ii. access the first storage system when the specific requested document parameter is greater than the predetermined parameter;

iii. access the second storage system when the specific requested document parameter is less than or equal to the predetermined parameter.

25. (New) A system as set forth in claim 24 wherein the first and second fixed mediums are different from each other.

26. (New) A system as set forth in claim 25 wherein storing a plurality of financial documents in a first fixed medium is further defined as storing a plurality of financial documents on a physical media.

27. (New) A system as set forth in claim 25 wherein storing a plurality of financial documents in a second fixed medium is further defined as electronically storing the plurality of financial documents in a fixed electronic medium.

28. (New) A system as set forth in claim 25 wherein storing a plurality of financial documents in a first fixed medium is further defined as electronically storing the plurality of financial documents in a fixed electronic medium.

29. (New) A system as set forth in claim 25 wherein storing a plurality of financial documents in a second fixed medium is further defined as storing a plurality of financial documents on a physical media.

30. (New) A system as set forth in claim 25 wherein the first and second fixed mediums are the same.

31. (New) A system as set forth in claim 30 wherein storing a plurality of financial documents in a first fixed medium is further defined as electronically storing the plurality of financial documents in a first fixed electronic medium, and wherein storing a plurality of financial documents in a second fixed medium is further defined as electronically storing the plurality of financial documents in a second fixed electronic medium.

31. (New) A system as set forth in claim 24 further including reproducing the requested financial document after the requested financial document has been retrieved from the accessed storage system.

32. (New) A system as set forth in claim 24 wherein accessing the first and second storage systems is further defined as accessing only one of the storage systems at any one time to locate the requested financial document.

33. (New) A method of accessing an electronically-stored financial document from one of a first storage system and a second storage system with the first and second storage systems being different from each other wherein the first and second storage systems each include a plurality of financial documents stored therein and wherein each of the financial documents has an electronic image and is associated with at least one specific document parameter, said method comprising the steps of:

storing a plurality of images of the financial documents in a first fixed medium at the first storage system when the specific document parameter of the financial document is greater than a predetermined parameter;

storing a plurality of images of the financial documents in a second fixed medium at the second storage system when the specific document parameter of the financial document is less than or equal to the predetermined parameter;

utilizing a processing unit that has access to the first and second storage systems;

receiving a request for an image of one of the stored financial documents into the processing unit;

comparing the specific document parameter of the requested financial document to the predetermined parameter to determine if the specific document parameter is greater than, less than, or equal to the predetermined parameter after the request has been received;

accessing the first storage system when the specific document parameter is greater

than the predetermined parameter and accessing the second storage system when the specific document parameter is less than or equal to the predetermined parameter; and
retrieving the image of the requested financial document from the accessed storage system as defined by the received request.

34. (New) A method as set forth in claim 33 wherein the first and second fixed mediums are different from each other.

35. (New) A method as set forth in claim 33 further including the step of reproducing the requested financial document after the requested financial document has been retrieved from the accessed storage system.

36. (New) A method as set forth in claim 33 wherein the first and second storage systems are associated with the same entity .

37. (New) A method as set forth in claim 33 wherein the first and second storage systems are associated with different entities.

38. (New) A method as set forth in claim 33 wherein the first and second fixed mediums are the same.

39. (New) A system comprising:

- a. a processing unit communicatively coupled to a first and second storage system, wherein the processing unit is configured to:
 - i. compare a specific requested document parameter of a requested financial document to a predetermined parameter;
 - ii. access the first storage system when the specific requested document parameter is greater than the predetermined parameter;
 - iii. access the second storage system when the specific requested document parameter is less than or equal to the predetermined parameter.

Remarks

The subject continuation patent application is being filed for continued prosecution of the claims set forth in the parent application. The assigned art unit of the parent application is identified above.

The specification has been amended to set forth a proper claim of priority as is required by 35 U.S.C. 120 and to coincide with the terminology of the claims. No new matter is being introduced.

After entry of the subject preliminary amendment, claims 23- 39 will remain pending in the application. Claims 1-22 are currently being cancelled and claims 23-39 are being added. No new matter is being introduced.

It is respectfully submitted that the Application, as amended, is now presented in condition for examination.

Respectfully submitted,

Date: March 15, 2013

This Acknowledgement Receipt evidences receipt on the noted date by the USPTO of the indicated documents, characterized by the applicant, and including page counts, where applicable. It serves as evidence of receipt similar to a Post Card, as described in MPEP 503.

New Applications Under 35 U.S.C. 111

If a new application is being filed and the application includes the necessary components for a filing date (see 37 CFR 1.53(b)-(d) and MPEP 506), a Filing Receipt (37 CFR 1.54) will be issued in due course and the date shown on this Acknowledgement Receipt will establish the filing date of the application.

National Stage of an International Application under 35 U.S.C. 371

If a timely submission to enter the national stage of an international application is compliant with the conditions of 35 U.S.C. 371 and other applicable requirements a Form PCT/DO/EO/903 indicating acceptance of the application as a national stage submission under 35 U.S.C. 371 will be issued in addition to the Filing Receipt, in due course.

New International Application Filed with the USPTO as a Receiving Office

If a new international application is being filed and the international application includes the necessary components for an international filing date (see PCT Article 11 and MPEP 1810), a Notification of the International Application Number and of the International Filing Date (Form PCT/RO/105) will be issued in due course, subject to prescriptions concerning national security, and the date shown on this Acknowledgement Receipt will establish the international filing date of the application.

Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it contains a valid OMB control number.

Privacy Act Statement

The Privacy Act of 1974 (P.L. 93-579) requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether the Freedom of Information Act requires disclosure of these records.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (i.e., GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspections or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

METHOD OF OBTAINING AN ELECTRONICALLY-STORED FINANCIAL DOCUMENT

RELATED APPLICATIONS

5 This patent application claims priority to and all advantages of United States
Provisional Patent Application Serial No. 60/129,021 which was filed on April 13, 1999 and
is entitled “REMOTE DOCUMENT RETRIEVAL AND STORAGE SYSTEM.”

BACKGROUND OF THE INVENTION

10 **1) TECHNICAL FIELD**

The subject invention relates to a method for a financial institution to obtain electronically-stored financial documents from an off-site storage system remotely-located from an on-site storage system.

2) DESCRIPTION OF THE PRIOR ART

15 Methods for obtaining electronically-stored financial documents are generally known
in the art. Financial institutions, such as banks and credit unions, utilize such methods to
rapidly and efficiently obtain financial documents for distribution to clients upon request.
Such financial documents include paid checks, account statements, and other related
documents. These financial documents are typically stored on microfiche, microfilm,
20 digitally, or by some other electronic storage means. Further, these financial documents are
typically electronically-stored in an on-site storage system located at the financial institution
or in an off-site storage system. Electronic storage of these financial documents permits
financial institutions to eliminate storage of paper or "hard" copies of these documents. The

electronic storage of these documents also provides a means of retrieving the information from the on-site and off-site storage systems.

Once the document is stored, the client may request an image of a particular stored document. Client requests are made to replace lost or stolen documents, for tax purposes, for proof of financial transactions, for legal disputes, and other similar matters. The client's request is inputted into a computer terminal at the financial institution. More specifically, conventional methods for obtaining an electronically-stored financial document enable an employee of the financial institution, such as a bank teller, to input the request into an interface incorporated into the computer terminal. The interface is inter-linked with the on-site storage system. Typically, all requests for a particular period are grouped together and subsequently downloaded for retrieval of the requested image by the financial institution. The financial institution retrieves the image, e.g. a photocopy of the check, and then distributes the photocopy to the client via facsimile, mail or hand delivery. The storing, downloading, and retrieving of the financial document, including the reproduction and the distribution of the document, are known in the industry as back office production. Back office production for financial institutions is particularly resource intensive, time consuming, and expensive. Also, back office production becomes increasingly expensive if the client requests a particularly old financial document because older financial documents frequently require more resources and time to locate and retrieve.

The majority of financial institutions electronically store financial documents only in an on-site storage system and not in an off-site storage system. Consequently, these financial

institutions are unable to outsource the responsibilities for the back office production to third party entities to alleviate the expenses and resources associated with the back office production. These financial institutions realize a significant financial burden since the back office production is concentrated strictly at the financial institution.

5 Other financial institutions do electronically store financial documents in on-site and off-site storage systems. However, the methods utilized by these financial institutions to access the financial documents stored in the off-site storage system are deficient in that the interface utilized in such methods is only inter-linked with the on-site storage system. That is, there is no interface independently inter-linked with the off-site storage system. As a result, the financial documents stored in the off-site storage system can not be efficiently accessed. These financial institutions are still responsible for retrieving the requested financial documents through their back office production and their expenses remain high. One such method of retrieving documents from on-site and off-sited storage systems is disclosed in United States Patent No. 5,784,610 to Copeland, III et al.

15 Due to the inefficiencies identified in the conventional methods used by financial institutions to obtain financial documents, it is desirable to implement a method for a financial institution to obtain electronically-stored financial documents from both on-site and off-site storage systems that reduces, if not eliminates, the back office production of the financial institution by providing a direct interface inter-linked with the off-site storage system. With such an interface, the responsibility for retrieving financial documents from the off-site storage can be outsourced to third party entities while still providing the financial institution

with efficient access to any financial documents electronically-stored in the off-site storage system.

SUMMARY OF THE INVENTION AND ADVANTAGES

5 A method for a financial institution to obtain electronically-stored financial documents having a specific document parameter is disclosed. The specific document parameter is typically a particular numerical sequence, such as a record date of the financial document. The method of the subject invention enables the financial institution to obtain the financial documents from an off-site storage system. The off-site storage system is remotely-located
10 from an on-site storage system. The financial documents of the financial institution are maintained in the off-site storage system when the specific document parameter of the financial document is greater than a predetermined parameter. The financial documents that are less than or equal to the predetermined parameter are maintained in the on-site storage system.

15 When the financial institution receives a request for a financial document, the financial institution compares the specific document parameter of the requested financial document to the predetermined parameter to determine if the specific document parameter is greater than, less than, or equal to the predetermined parameter. A computer terminal located at the financial institution is connected to both the off-site and on-site storage systems. The
20 computer terminal is utilized to access one of the storage systems in response to the comparison of the specific document parameter to the predetermined parameter. For instance,

if it is determined that the specific document parameter is less than or equal to the predetermined document parameter, then the computer terminal accesses the on-site storage system. On the other hand, if it is determined that the specific document parameter of the financial document is greater than the predetermined parameter, then the computer terminal
5 accesses the off-site storage system.

After the computer terminal accesses the appropriate storage system, identification data of the requested financial document is inputted into the computer. More specifically, to access the on-site storage system, the identification data is input into a primary interface that is specifically inter-linked with the on-site storage system. To access the off-site storage
10 system, an exit function is selected at the primary interface and the identification data is then input into a secondary interface that is initiated upon selection of the exit function. The secondary interface is specifically inter-linked with the off-site storage system.

Finally, after the identification data of the requested financial document is inputted, the requested document is then retrieved in order to reproduce the financial document, and
15 distribute the financial document to an end user of the financial institution.

The subject invention therefore provides a method that enables financial institutions to obtain electronically-stored financial documents from an off-site storage system via a secondary interface that is specifically inter-linked with the off-site storage system and the financial documents electronically-stored in that system. As such, the financial institution can
20 selectively store financial documents in either an on-site storage system or the off-site storage system, and the responsibility for the financial documents in the off-site storage system can be

outsourced to a third party entity. Therefore, the back office production of the financial institution associated with the retrieval and distribution of financial documents stored in the off-site storage system is strategically reduced or even completely eliminated.

BRIEF DESCRIPTION OF THE DRAWINGS

Other advantages of the present invention will be readily appreciated as the same becomes better understood by reference to the following detailed description when considered in connection with the accompanying drawings wherein:

Figure 1 is a flow diagram schematically detailing an on-site storage system, and an off-site storage system in accordance with the subject invention;

Figure 2 is a block diagram generally representing a method for a financial institution to obtain electronically-stored financial documents from the on-site and off-site storage systems;

Figure 3 is a block diagram completing the method of obtaining electronically-stored financial documents from the on-site storage system; and

Figure 4 is a block diagram completing the method of obtaining electronically-stored financial documents from the off-site storage system.

DETAILED DESCRIPTION OF THE PREFERRED EMBODIMENT

Referring to the Figures, wherein like numerals indicate like or corresponding parts throughout the several views, a method for a financial institution to obtain an electronically-stored financial document is schematically shown at 10 in Figure 1. The method introduced in

the subject invention enables the financial institution to obtain the financial document from an off-site storage system remotely located from an on-site storage system. Preferably, the on-site storage system is located at the financial institution and the off-site storage system is located at a remote location distant from the financial institution. This allows the financial institution to ‘outsource’ the responsibilities associated with obtaining the financial document.

Methods for financial institutions to obtain electronically-stored documents are frequently used by such entities as banks, credit unions, and other financially-oriented institutions. For illustrative purposes only, the description of the subject invention is discussed with reference to banks. However, as appreciated by those skilled in the art, other businesses, such as insurance companies, may also utilize similar methods and incorporate the aspects of the subject invention.

Methods for banks to obtain electronically-stored financial documents are generally used by banks to rapidly and efficiently obtain financial documents for distribution to clients upon request. As described above, the financial documents for banks are usually paid checks, checking statements, and other related financial documents, and these documents include at least one specific document parameter. As appreciated by those skilled in the art, it is not the financial document (e.g. the paid check) itself that is electronically-stored. Rather, it is data included on the document such as a sequence number that is electronically stored to make up the financial document. The specific document parameter is preferably a particular numerical sequence. As appreciated, the specific document parameter of the financial document can include, but is not limited to, a record date or age of the document, a series number, or some

other document identifying number of the financial document. More specifically, in the preferred embodiment of the subject invention, the particular numerical sequence of the financial document is the record date of the financial document. That is, the date that the particular financial document was created or posted.

5 The financial documents are typically stored on microfiche, microfilm, digitally, or by some other electronic storage means. As appreciated, the electronic storage of the financial documents is frequently created by taking an electronic photo image of the document and storing the photo image in a computer system. One such digital electronic storage device is sold by Kodak under the name of *IMAGELINKTM* Digital Workstation (IDW). Electronic
10 storage of these financial documents permits banks to eliminate storage of paper or "hard" copies of these documents. The electronic storage of these documents also provides an efficient means of retrieving the information from the on-site and off-site storage systems. This will be discussed further herein below.

 As described above, the financial documents are electronically-stored in either the on-
15 site storage system located at the bank or in the off-site storage system remotely located from the on-site storage system. More specifically, the subject invention includes the step of maintaining the financial documents in the off-site storage system when the specific document parameter of the financial document is greater than a predetermined parameter. Financial documents are maintained in the on-site storage system when the specific document parameter
20 of the financial document is less than or equal to the predetermined parameter. As appreciated, the document parameter of the financial documents stored in the off-site storage

system may be greater than or equal to the predetermined parameter with the on-site storage system having documents only less than the predetermined parameter.

Similar to the specific document parameter of the financial document, the predetermined parameter is also a numerical value. The predetermined parameter is specifically a numerical value predetermined by the bank. For instance, if the specific document parameter is a series number of a paid check and the series number is greater than the predetermined parameter which, in this case, would be an arbitrarily selected base series number, then the paid check would be stored in the off-site storage system.

In the preferred embodiment of the subject invention, the predetermined numerical value is a date pre-selected by the bank. For instance, the bank may pre-select a date that is one year before a current date—the current date being the actual date that the client requests the financial document. Of course, the bank may pre-select a date that is some other time period before a current date (e.g. two or three years) without varying from the scope of the subject invention. As such, if the record date of the particular financial document is older than one year, then the particular financial document is maintained in the off-site storage system. If the record date of the particular financial document is earlier than or equal to one year, then the particular financial document is maintained in the on-site storage system. As discussed above, the document having record dates equal to the one year may be stored in the off-site or on-site storage systems.

Once the financial document is maintained in the appropriate storage system, the bank is capable of receiving a request for the financial document from the client. In reality, the

client is requesting an image of the stored financial document. As appreciated, clients request the image for various reasons. As discussed above, requests are typically made for replacing lost or stolen financial documents, for tax purposes, for proof of financial transactions, for legal disputes, and other similar matters. Ultimately, the bank retrieves the image, reproduces the image, and distributes the reproduced image to the requesting client of the bank.

Referring now to Figure 1, the method for banks to obtain electronically-stored financial documents is discussed in detail. Initially, the requesting client requests a particular financial document, such as a paid check. The client is typically a customer of the bank or other financial institution. The client's request is inputted into a computer terminal 11 at the financial institution. The computer terminal 11 will be discussed in more detail hereinbelow.

From the computer terminal 11, the request is fed into a mainframe computer 12 at the bank. In the preferred embodiment of the subject invention, if the client requests a financial document having a record date earlier than or equal to one year before the current date, then the request, and other requests like it, are processed at the bank in the on-site storage system. That is, the requests are grouped together and downloaded to a downloading terminal 14 at the bank. The downloading may occur at particular intervals such as at the end of each day, every three hours, etc. The sequence number of each check requested is then determined. A document terminal 16 subsequently creates or reproduces the document, i.e., a photocopy of the check. The photocopy is then distributed to the client via facsimile, mail, or hand delivery.

It is known in the art that the majority of requests for financial documents are requests for documents which were created in the most recent year. That is, if the pre-selected date is one year before the current date, as in the preferred embodiment, then the majority of requests are seeking financial documents having a record date earlier than or equal to the pre-selected date. The remaining document requests relate to financial documents that are older than one year. Since, as described in the Background of the Invention, retrieval of financial documents that are older than one year is particularly expensive, the preferred embodiment of the subject invention outsources all of the document requests which relate to documents having a record date later than one year before the current date. As appreciated, the particular time frame which is outsourced is not a critical feature of the subject invention and may be adjusted to meet the needs of any particular financial institution. In fact, all of the document requests, including the most recent, may be outsourced using the outsourcing procedure of the subject invention.

In the preferred embodiment, if the client requests a financial document having a record date later than one year before the current date, then the request, and others like it, are grouped together and downloaded from the mainframe computer 12 to an outsourced downloading terminal 18. As above, the downloading may be at particular intervals as needed. The sequence number is determined by a sequencing terminal 20. The sequence number is then sent back to the outsourced downloading terminal 18. An outsourced document terminal 22 then creates or reproduces the desired document which is then distributed to either the client or the bank. As appreciated, two document retrieval operations, one for the bank to

retrieve financial documents having record dates earlier than or equal to one year before the current date, and another to retrieve outsourced financial documents having record dates later than one year before the current date, preferably operate simultaneously. It is to be understood that the computer terminals and the accompanying PC bases are illustrated highly schematically in Figure 1 and are not intended to be limiting in any manner. For instance, the schematic illustration of the outsourced document terminal 22 need not include a computer terminal and an accompanying PC base. Instead, the outsourced document terminal 22 is preferably some sort of printing device.

Referring to Figures 2 through 4, the method for banks to obtain electronically-stored financial documents is described in even greater detail. The request is first generated by the client. The request is then processed by the bank. The processing, retrieval and reproduction of the requested financial document is typically controlled by one interlinked computer software program. One such computer software program is a software program called Antinori Software Incorporated or ASI which is sold under the name of *INNOVASIONTM* by Carreker-Antinori of Dallas, Texas. However, other frequently used software programs include *PEGATM* and *SterlingTM*. Any of these computer software systems can provide the necessary means for implementing the discussed procedures.

The processing of the request is completed by a customer service tracking system and the computer terminal 11. The customer service tracking system assists the financial institution in receiving the request. More specifically, the customer service tracking system gives branches, customer service, and other bank departments the capability to enter, log, track,

route and monitor the status of all requests for financial documents. The customer service tracking system also provides the capability to enter, log, track, route and monitor the status of customer complaints and other customer service related items.

A bank employee, such as a bank teller first determines a status of the requested document. More specifically, the employee compares the specific document parameter of the requested financial document to the predetermined parameter to determine if the specific document parameter is greater than, less than, or equal to the predetermined parameter. If the specific document parameter is a particular numerical sequence and the predetermined parameter is a predetermined numerical value, then the employee compares the particular numerical sequence of the financial document to the predetermined numerical value to determine if the particular numerical sequence is greater than, less than, or equal to the predetermined numerical value. Further, if as in the preferred embodiment, the particular numerical sequence is a record date of the financial document, and the predetermined numerical value is a pre-selected date, then the employee compares the record date of the financial document to the pre-selected date to determine if the record date is later than, earlier than, or equal to the pre-selected date.

The customer service tracking system enables a bank employee, such as a bank teller, to submit the request. More specifically, the employee utilizes the computer terminal 11 located at the bank and connected to both the off-site and on-site storage systems to access one of the storage systems in response to the comparison of the specific document parameter of the requested financial document to the predetermined parameter. For instance, when the

particular numerical sequence of the financial document is greater than the predetermined numerical value, the employee preferably utilizes the computer terminal 11 to access the off-site storage system, and when the particular numerical sequence of the financial document is less than or equal to the predetermined numerical value, the employee preferably utilizes the
5 computer terminal 11 to access the on-site storage system. As discussed above, the documents have a numerical sequence equal to the predetermined numerical value may be stored in either the off-site or on-site storage systems.

After the computer terminal 11 is utilized to access the desired storage system, the employee manually inputs identification data of the requested financial document into the
10 computer terminal 11. More specifically, when the particular numerical sequence of the financial document is less than or equal to the predetermined numerical value, the employee inputs identification data into a primary interface and selects the requested document. Also, the primary interface preferably provides an option for the employee to select among several different output formats. The primary interface is inter-linked with the on-site storage system.
15 In the preferred embodiment of the subject invention, the primary interface appears as follows and includes the identification data detailed below:

Account Number:		Prod Type:	
Account Name:		Customer Code:	
Address:			
City:	State:	Zip Code:	
Home Phone: ()		Work Phone: ()	
Fax: ()			
Service Code:			
For Items Posted Within A Year			
Copy of Statement Only		Savings Items	
Copy of Check/Deposit Ticket		Misc (G/L, Loans, Teller, Etc)	
Check(s)/Deposit(s)<30 Items		Cash Letter Reconstruction	
Statements and<30 Items		Lockbox	
Statements and>30 Items		Legal Statement Only	
Deposit Reconstruction		Legal Statement and Items	
Regardless of Posting Date			
Missing Transactions		Returned Items	
Online (Backdated/Unposted) Encoding Error/Wrong Account			
<hr/>			
<i>EXIT FUNCTION</i>			

Alternatively, when the particular numerical sequence of the financial document is greater than the predetermined numerical value, the employee selects an exit function at the primary interface. The exit function distinguishes that the request is to be sent to an outsourcing third party entity. Upon selection of the exit function at the primary interface, a secondary interface, inter-linked with the exit function, is initiated. The secondary interface is inter-linked with the off-site storage system. The employee inputs identification data into the secondary interface and selects the requested document. Also, the secondary interface

preferably provides an option for the employee to select among several different output formats. Preferably, routing, or service codes will be generated automatically upon the initiation of the secondary interface and the inputting of the identification data into the secondary interface. The routing codes enable the bank to recognize that the request is being
5 sent to the outsourced third party entity. Furthermore, the routing codes are configured to automatically forward the inputted identification data to the off-site storage system. The inputted identification data and the routing codes are forwarded into the mainframe computer
12 introduced above for temporary storage before transfer to the off-site storage system. This temporary storage also serves to defend against unexpected power outages, computer
10 malfunctions, and the like. In the preferred embodiment of the subject invention, the secondary interface appears as follows and includes the identification data detailed below:

Account Number:		Prod Type:	
Account Name:		Customer Code:	
Address:			
City:	State:	Zip Code:	
Home Phone: ()		Work Phone: ()	
Fax: ()			
Service Code:			
For Items Posted Prior to a Year			
Copy of Statement Only		Savings Items	
Copy of Check/Deposit Ticket		Misc (G/L, Loans, Teller, Etc)	
Check(s)/Deposit(s)<30 Items		Cash Letter Reconstruction	
Statements and<30 Items		Lockbox	
Statements and>30 Items		Legal Statement Only	
Deposit Reconstruction		Legal Statement and Items	

Once the bank employee has inputted the necessary identification data into either the primary or secondary interface, then retrieval of the financial document can continue. Specifically, the requested financial document is retrieved as defined by the inputted

5 identification data. Two separate document retrieval procedures are discussed hereinbelow. One document retrieval procedure is for the financial documents having a record date earlier than or equal to the pre-selected date—one year before the current date in this example. The other document retrieval procedure is for the financial documents having a record date later than the pre-selected date. As discussed above, the one year timing selected for the pre-selected date

10 is simply shown as an example and any suitable time frame may be utilized. In fact, even all

financial document retrievals may be outsourced to the third party entity. As also discussed above, the two separate document retrieval procedures will typically operate simultaneously.

With reference to the subject example, if the record date of the financial document is earlier than or equal to one year before the current date, the remaining steps occur at the bank.

5 As discussed above, these steps are known as the back office production of the bank. The request is first categorized by a research automation system. The research automation system automates the entire workflow of a bank's research and photocopy departments by sending requests to the appropriate sequence for processing. The downloading terminal 14 serves to perform the research automation system's tasks.

10 Photocopy requests are routed to an image control system, statement requests are sent to a document retrieval system, and requests for financial adjustments are routed to an adjustment system. The document terminal 16 serves to perform these tasks. In the illustrated embodiment of the subject invention, the sample document request is for a paid check. Hence, the categorized sequence will be the image control system which handles photocopy requests.

15 Referring now to Figure 3, after the request is categorized, the request is verified for completeness and accuracy. If the request is not complete then additional data is retrieved. The additional data is retrieved by using a sequence number retrieval system and/or an all items research system. Once the request is complete and accurate, then the image reference number can be determined. That is, once the request is complete and accurate, then the requested
20 financial document can be electronically located in the on-site storage system. The reference number may be a routing, sequence, or any other type of indicator. The reference number is

determined by the image control system. The image control system is an image retrieval and routing management system which works in conjunction with Kodak's *IMAGELINK*TM Digital Workstations (IDW). Specifically, the image control system first connects to a network node. The network node is any type of storage device as is known in the art. Preferably a Kodak network node is used. The network node drives the IDW to find the location of the image by using the reference number. Specifically, the employee is prompted to verify that the correct media is loaded in the IDW such that the IDW can locate the image. The reference number for the document is known and the document image is now verified and located.

The requested image can now be retrieved and reproduced. In other words a copy of the digitized document (the check) is created. The copy may be created by manually pulling the microfilm, microfiche, or the like and photocopying the document. The copy may also be made by printing the document from a digitized record. The photocopy of the check is then distributed to the requesting client or other end user of the financial institution. Other end users of the financial institution include, but are not limited to, other financial institutions and federal and state governments. Additional information such as a photocopy report, a statement of charges, a research report and/or a daily status report may also be produced for the requesting client, the other end user, and/or the financial institution. The document retrieval system incorporated at the bank and the method for obtaining electronically-stored financial documents from the on-site storage system is now completed.

Continuing with the subject example, if the record date of the financial document is later than one year before the current date, the automated retrieval of the financial document is

outsourced to the third party entity. To begin, a separate file is automatically generated at the bank by the input of the identification data into the secondary interface. Referring specifically to Figure 4, the routing codes direct the request created on the separate file to be routed separately to the outsourced third party entity. In the preferred embodiment of the subject invention, additional user ID's are created to allow only selected users into the secondary interface. The identification data stored in the separate file and the routing codes are downloaded to the off-site storage system for retrieval of the requested financial documents by the outsourced downloading terminal 18. Preferably, the identification data and routing codes are grouped into batches of common requests for optimum retrieval of the requested financial document by the outsourced third party entity at the off-site storage system. The downloading step may occur at any suitable predetermined interval. Preferably, the downloading will occur three times a day. The downloaded documents are known in the industry as a basket of requests.

The subject method further includes the step of creating a back-up file of the downloaded identification data and routing codes in the off-site storage system. The back-up file acts as an emergency information source in case the mainframe computer 12 at the financial institution has a catastrophic failure. In addition, the outsourced third party entity is in direct connection with the mainframe computer 12 of the bank wherein the outsourced third party entity may produce a backup directory of each database file. This database backup is an additional safe guard for the financial institution.

The downloaded identification data and routing codes are then categorized for processing in the off-site storage system. The research automation system categorizes this

information in a like fashion as discussed above. In fact, the outsourced third party entity uses the same computer software package as the financial institution such that the flow of information is optimum and not interrupted. As discussed above, the subject example request is for a paid check. Hence, the request will be categorized into the image control system and a sequence
5 number will be determined by the sequencing terminal 20. Also, a status to update the progress of the requested financial document is provided to the financial institution.

After the request is categorized, the request, specifically the inputted identification data, is verified for completeness and accuracy. If the request is not complete or accurate, then additional data is retrieved. In a similar fashion as above, the additional data is retrieved
10 by using the sequence number retrieval system and/or the all items research system. As appreciated, the outsourced third party entity may retrieve this information from the mainframe computer 12, via its direct line, or from its own backup database files. Once the request is complete and accurate, the image reference number can be determined. Again, as above, the reference number is determined by the image control system.

15 The requested image is then retrieved. More specifically, the requested financial document is electronically located in the off-site storage system. Additionally, the requested financial document is also reproduced after the document is electronically located in the off-site storage system by the outsourced document terminal 22. In other words, a copy of the digitized document (the check) is created. A status file is then created for the completed
20 transaction. Also, a status of the request is sent to the financial institution wherein the institution may update their records. The status updates, as well as the information

connections, create a two way information exchange between the outsourced third party entity and the bank.

The photocopy of the check is then distributed or digitally transferred to the requesting client, the financial institution, or other end users of the financial institution. In the preferred embodiment of the subject invention, the photocopy of the request is distributed to the requesting client, etc. based on the routing codes. That is, in addition to directing the request to be separately routed to the outsourced third party entity, the routing codes also indicate an appropriate distribution for the request client or other end user. The request is now completed.

A special circumstance occurs when the record date of one portion of the client's request is earlier than or equal to one year before the current date, and when the record date of another portion of the client's request is later than one year before the current date. These types of requests are known in the industry as spanned requests. One solution is to incorporate an additional interface utilized when the employee of the bank is utilizing the computer terminal and comparing the specific document parameter of the requested financial document to the predetermined parameter to determine if the specific document parameter is greater than, less than, or equal to the predetermined parameter. If the request is a spanned request, then the request will be split into two separate requests which can be handled simultaneously. A special notation would be put onto the requests such that they may be put back together before distributing the documents to the client or other end user. Another solution simply notifies the inputting employee that two requests should be entered separately. A third solution sends the

request to the back office production at the bank wherein the back office employees notify the outsourced third party entity by a separate request to retrieve the requested financial documents.

The invention has been described in an illustrative manner, and it is to be understood that the terminology which has been used is intended to be in the nature of words of
5 description rather than of limitation. Obviously, many modifications and variations of the present invention are possible in light of the above teachings. It is, therefore, to be understood that within the scope of the appended claims, wherein reference numerals are merely for convenience and are not to be in any way limiting, the invention may be practiced otherwise than as specifically described.

CLAIMS

What is claimed is:

1. A method for a financial institution to obtain an electronically-stored financial document from an off-site storage system remotely-located from an on-site storage system wherein the financial document includes at least one specific document parameter, said
5 method comprising the steps of:

maintaining the financial document in the off-site storage system when the specific document parameter of the financial document is greater than a predetermined parameter;

maintaining the financial document in the on-site storage system when the specific
10 document parameter of the financial document is less than or equal to the predetermined parameter;

receiving a request for the financial document at the financial institution;

comparing the specific document parameter of the requested financial document to the predetermined parameter to determine if the specific document parameter is greater than, less
15 than, or equal to the predetermined parameter;

utilizing a computer terminal located at the financial institution and connected to the off-site and on-site storage systems to access one of the storage systems in response to the comparison of the specific document parameter of the requested financial document to the predetermined parameter;

20 inputting identification data of the requested financial document into the computer

terminal after the desired storage system is accessed; and

retrieving the requested financial document as defined by the inputted identification data.

5 2. A method as set forth in claim 1 wherein the specific document parameter of the financial document is a particular numerical sequence and the predetermined parameter is a predetermined numerical value.

 3. A method as set forth in claim 2 wherein the step of comparing the specific document parameter to the predetermined parameter is further defined by comparing the
10 particular numerical sequence of the financial document to the predetermined numerical value to determine if the particular numerical sequence is greater than, less than, or equal to the predetermined numerical value.

 4. A method as set forth in claim 2 wherein the particular numerical sequence of the financial document is a record date of the financial document and the predetermined
15 numerical value is a pre-selected date.

 5. A method as set forth in claim 4 wherein the step of comparing the specific document parameter to the predetermined parameter is further defined by comparing the record date of the financial document to the pre-selected date to determined if the record date is later than, earlier than, or equal to the pre-selected date.

20 6. A method as set forth in claim 2 wherein the step of utilizing the computer

terminal to access one of the storage systems is further defined by accessing the off-site storage system when the particular numerical sequence is greater than the predetermined numerical value and accessing the on-site storage system when the particular numerical sequence is less than or equal to the predetermined numerical value.

5

7. A method as set forth in claim 6 wherein the step of inputting identification data of the requested financial document into the computer terminal is further defined by inputting identification data into a primary interface inter-linked with the on-site storage system when the particular numerical sequence of the financial document is less than or equal
10 to the predetermined numerical value.

8. A method as set forth in claim 7 wherein the step of inputting identification data of the requested financial document into the computer terminal is further defined by selecting an exit function at the primary interface when the particular numerical sequence of the financial document is greater than the predetermined numerical value.

15

9. A method as set forth in claim 8 wherein the selection of the exit function is further defined by initiating a secondary interface inter-linked with the off-site storage system and inputting identification data into the secondary interface.

10. A method as set forth in claim 9 wherein the step of inputting identification data into the secondary interface is further defined by selecting a desired output format for the
20 requested financial document.

11. A method as set forth in claim 9 further including the step of automatically generating routing codes upon the initiation of the secondary interface and the inputting of the identification data into the secondary interface.

12. A method as set forth in claim 11 further including the step of inter-linking the
5 exit function with the secondary interface and configuring the routing codes to automatically forward the inputted identification data to the off-site storage system.

13. A method as set forth in claim 12 further including the step of forwarding the inputted identification data and the routing codes into a mainframe computer for temporarily
10 storing the identification data and routing codes in the mainframe computer.

14. A method as set forth in claim 13 further including the step of downloading the stored identification data and routing codes to the off-site storage system for retrieval of the requested financial documents.

15. A method as set forth in claim 14 further including the step of grouping the
15 stored identification data and routing codes into batches of common requests for optimum retrieval of the requested financial document.

16. A method as set forth in claim 14 further including the step of creating a back-up file of the downloaded identification data and routing codes in the off-site storage system.

17. A method as set forth in claim 14 further including the step of categorizing the
20 downloaded identification data and routing codes for processing in the off-site storage system.

18. A method as set forth in claim 17 further including the step of providing a status of the requested financial document to update progress to the financial institution.

19. A method as set forth in claim 17 further including the step of verifying the completeness and accuracy of the inputted identification data.

5

20. A method as set forth in claim 19 wherein the step of retrieving the requested financial document is further defined by electronically locating the requested financial document in the off-site storage system.

21. A method as set forth in claim 20 wherein the step of retrieving the requested
10 financial document is further defined by reproducing the requested financial document after the requested financial document is electronically located in the off-site storage system.

22. A method as set forth in claim 21 further including the step of distributing the reproduced financial document to an end user of the financial institution based on the routing codes.

ABSTRACT OF THE DISCLOSURE

A method for a bank to obtain an electronically-stored financial document is disclosed.

The financial document includes a specific document parameter, such as a record date. The

5 bank maintains the financial document in an off-site storage system when the record date is later than a pre-selected date and in an on-site storage system when the record date is earlier

than or equal to the pre-selected date. The off-site storage system is remotely-located from the on-site storage system. The bank receives a request for the financial document from a client

and compares the record date to the pre-selected date to determine if the record date is later

10 than, earlier than, or equal to the pre-selected date. In processing the request, the bank utilizes a computer terminal connected to the off-site and on-site storage systems to access one of the storage systems in response to the comparison of the record date to the pre-selected date.

After accessing the appropriate storage system, the bank inputs data into the computer terminal to identify the requested financial document and then retrieves the requested financial

15 document. The bank then reproduces the requested financial document and distributes the requested financial document to the requesting client, or some other end user of the bank.
