

## U.S. 6,724,403 – SurfCast Rebuttal Proposed Claim Constructions

U.S. 6,724,403 Claim Term	Claim	SurfCast Proposed Construction
“partitioning a visual display of the device into an array of tiles”	1	dividing/divide some or all of a display into an array of tiles
“arrange a display into an array of tiles”	22, 46	
“user-defined array size”	2	the number and arrangement of tile positions in the array as specified by the user
“refresh rate”	1	criteria for updating
“retrieval rate”	22, 46	criteria for updating
“assigning a [first/second] refresh rate to a [first/second] tile of said array of tiles”	1	No construction needed. Plain and ordinary meaning.
“updating information from a [first/second] information source in said plurality of information sources presented to said [first/second] tile”	1	No construction needed. Plain and ordinary meaning.  SurfCast maintains its proposed constructions for the term “simultaneously updating information from a second information source ... presented to said second tile in accordance with said second refresh rate” which subsumes this term.
“in accordance with said [first/second] [refresh/retrieval] rate”	1, 22, 46	No construction needed. Plain and ordinary meaning.
“[refresh/retrieval] rate is assigned automatically”	11, 43, 50	[refresh/retrieval] rate is assigned without direct user input
“grid”	12	a regular layout of rows and columns, wherein a single tile may occupy more than one row and/or column
“wherein each of said tiles occupies a fixed position on said grid”	12	wherein each tile occupies a particular position in the regular layout of rows and columns
