

U.S.I.T.C. Inv. No. 337-TA-882

U.S. Patent No. 8,045,952

METHOD AND DEVICE FOR OBTAINING PLAYLIST CONTENT OVER A NETWORK

**SAMSUNG INFRINGEMENT OF
CLAIMS 1, 2, 3, 4, 9, 10, 11, 12, 14**

Samsung Infringement Claim Charts For 8,045,952

The claim charts below refer to two categories of accused devices:

“Mobile Devices” refers to accused mobile phones and tablets. Evidence relating to a Samsung Galaxy S4 phone is used herein as representative of the Mobile Devices. The full list of accused mobile devices known at this time is included within the Parties’ Joint Statement Regarding Identification Of Accused Products, filed September 20, 2013.

“Player Devices” refers to accused televisions, blu-ray players and home theater systems. Evidence relating to a Samsung UN55F8000BF television is used herein as representative of the Player Devices. The full list of accused player devices known at this time is included within the Parties’ Joint Statement Regarding Identification Of Accused Products, filed September 20, 2013.

The claim charts demonstrate infringement by the following Samsung Mobile Devices and Player Devices with the following applications and functionalities:

<u>Playlist Applications and Functionalities</u>	<u>Accused Samsung Devices</u>
“Pandora” refers to Pandora and Pandora One	Mobile Devices and Player Devices
Spotify	Mobile Devices and Player Devices
Google Play Music	Mobile Devices
“Samsung Music Hub” refers to Samsung Music Hub, Samsung Music, and Samsung Music+	Mobile Devices
“DLNA” refers to Samsung Link, Allshare Play, AllShare, and Nearby Devices	Mobile Devices and Player Devices
Amazon Cloud/MP3 Player	Player Devices
iHeartRadio	Mobile Devices

Discovery is ongoing and Complainant reserves the right to accuse any other infringing functionalities discovered.¹

¹ For example, if Samsung Player Devices with Samsung Music Hub are imported into the United States, such devices also infringe the asserted claims for the same reasons set forth herein with respect to the Samsung Mobile Devices with Samsung Music Hub. In addition, if Samsung Mobile Devices or Player Devices include Slacker or Rhapsody, such devices also infringe the asserted claims.

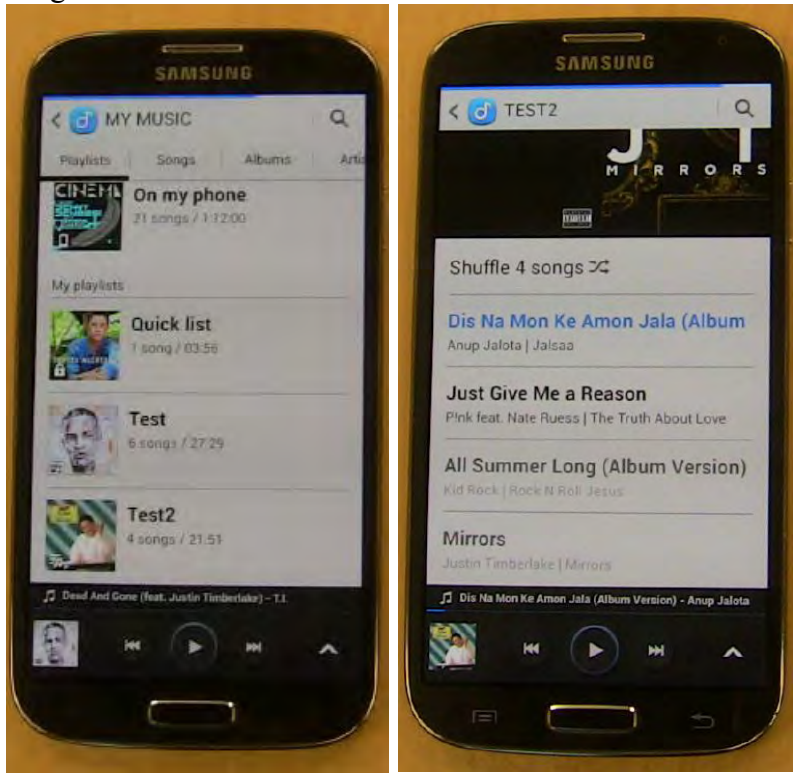

The accused devices literally infringe the asserted claims. However, to the extent any limitation is not literally met, it is met under the doctrine of equivalents. BHM contends that a person of ordinary skill in the art, at the time the accused devices were imported into the United States, sold for importation into the United States, or sold in the United States after importation, would have considered any difference between any specific claim limitation and the corresponding element or feature in the accused system, to the extent such limitation is not literally infringed, to be insubstantial or that the alternate implementation(s) employed (1) perform substantially the same function and (2) work in substantially the same way (3) to achieve substantially the same result as the requirement of the claim limitation at issue.

Samsung contributorily infringes and/or induces infringement of the method claims below in conjunction with at least their importation, marketing, promotion, profiting, collaboration, testing, servicing and sale of the Samsung Mobile Devices and Player Devices, as well as through actions of its agents and partners. In addition, Samsung directly infringes the method claims.

These infringement contention claim charts incorporate by reference the claim charts submitted with the complaint as well as the charts provided with Complainant's prior interrogatory response. In addition to the charts' description of the manner in which Samsung's accused devices infringe, additional infringement evidence has been produced in the form of photographic, documentary and Wireshark packet-sniffing trace evidence.²

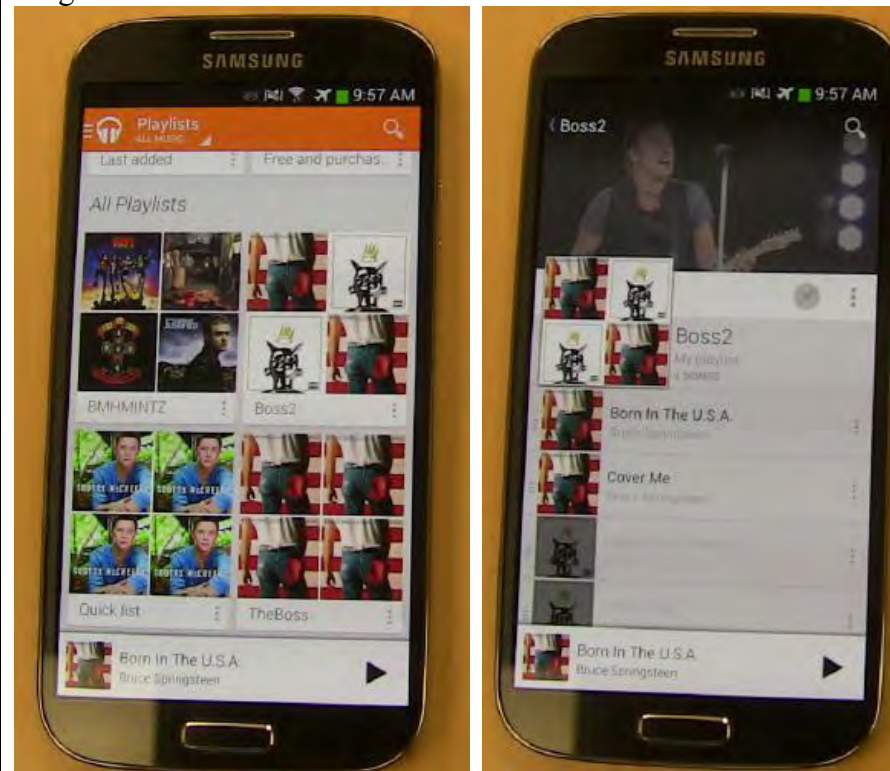

Black Hills' identification of infringing applications and functionalities is based on information received to date. Discovery and investigation are ongoing, including source code review that may be relevant to BHM's infringement contentions. Samsung is also expected to release additional devices, applications and/or functionalities prior to the hearing in this matter. In addition, Respondents in this investigation have failed to timely produce discovery, with major portions of its document productions, and all of its depositions, occurring just weeks before the close of fact discovery. Complainant thus reserves all rights to supplement, revise, correct and/or clarify its contentions at the time and in the manner allowed under the Commission Rules and the Ground Rules of the Administrative Law Judge. In addition, by identifying particular infringing applications and functionalities herein, Complainant does not intend to exclude any hardware, software, applications or other functionalities that may be implicated by the identified applications and functionalities (e.g., portions of the device's operating system, communication systems, stock media player, etc.).

² A table correlating photographic and Wireshark packet trace evidence to the relevant accused devices and functionalities is included after the charts below.

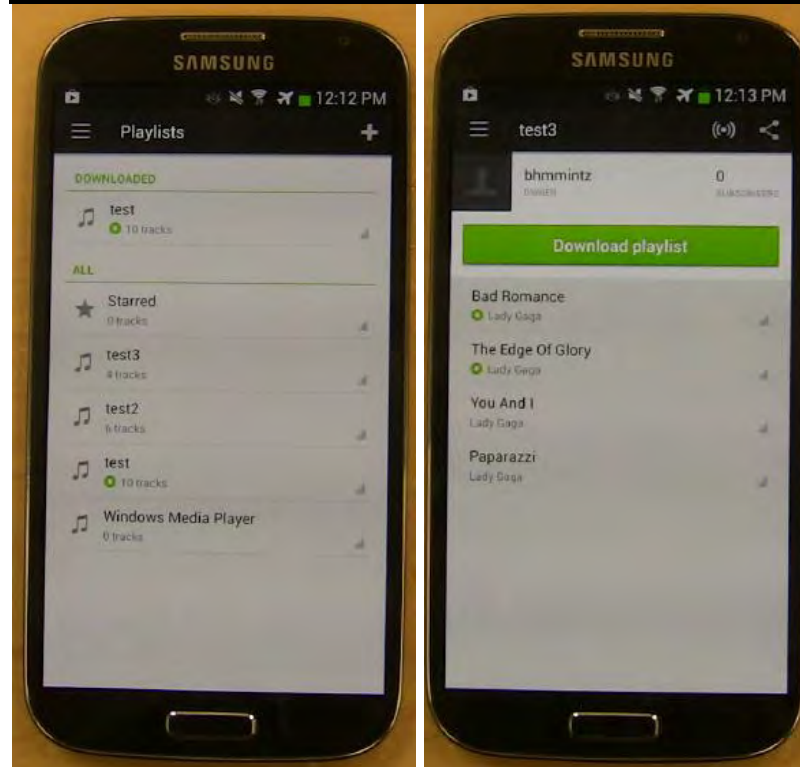

8,045,952 Claim Language	Samsung Devices
<p>1. A method comprising: assigning a playlist to an electronic device, the playlist identifying a plurality of songs;</p>	<p>During the use of Samsung Mobile Devices including Samsung Music Hub, Google Play Music, and Spotify, a method is performed comprising assigning a playlist to an electronic device, the playlist identifying a plurality of songs.</p> <p>For example, the pictures below show a representative mobile device with Samsung Music Hub installed displaying a playlist assigned to the mobile device, the playlist identifying a plurality of songs:</p>  <p>Samsung describes that the Samsung Music Hub application provides access to millions of songs in the Samsung Music Hub catalog and that the Samsung mobile devices can stream or download songs from the remote Music Hub catalog. Samsung instructs that a user can create playlists,</p>

listen to personalized radio, and beam music playlists to friends by holding Galaxy devices back to back. (E.g., <http://www.samsung.com/us/musichub/>, accessed September 23, 2013; http://m.samsung.com/us/support/SupportOwnersFAQPopup.do?faq_id=FAQ00050877&fm_seq=55985, accessed September 23, 2013; https://www.youtube.com/watch?v=3HFew6irzDA&feature=youtube_gdata_player, accessed September 23, 2013)

In addition, the pictures below show a representative mobile device with Google Play Music installed displaying a playlist assigned to the mobile device, the playlist identifying a plurality of songs:

In addition, the pictures below show a representative mobile device with Spotify installed displaying a playlist assigned to the mobile device, the playlist identifying a plurality of songs.

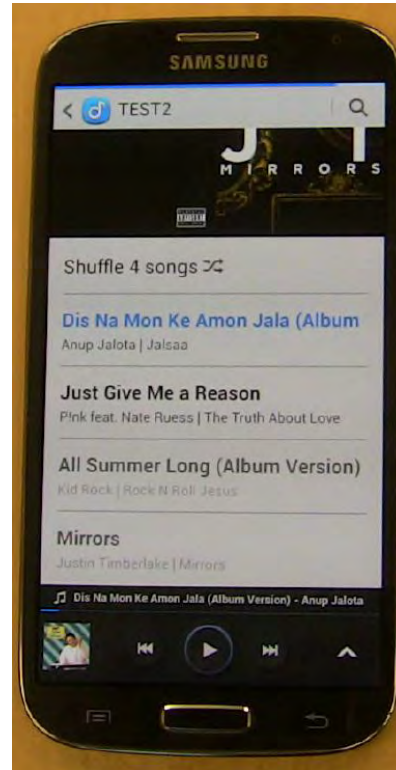

See also, for example, the packet sniffing trace evidence produced herewith.

identifying ones of the plurality of songs in the playlist that are not stored on the electronic device;

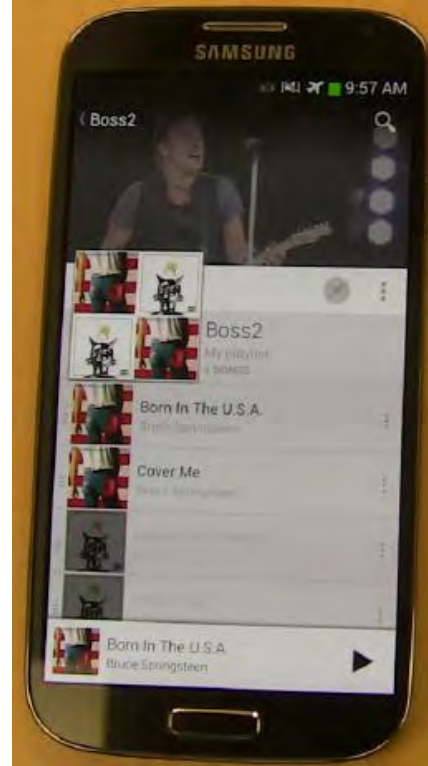

The step is also performed of identifying ones of the plurality of songs in the playlist that are not stored on the electronic device.

For example, the picture below shows a representative mobile device with Samsung Music Hub installed identifying ones of the plurality of songs in the playlist that are not stored on the electronic device. Song identifiers for song(s) that are not stored on the electronic device (e.g., “All Summer Long” and “Mirrors” shown in gray) are different than song identifiers for song(s) that are stored on the electronic device (e.g., “Just Give Me a Reason” shown in black):

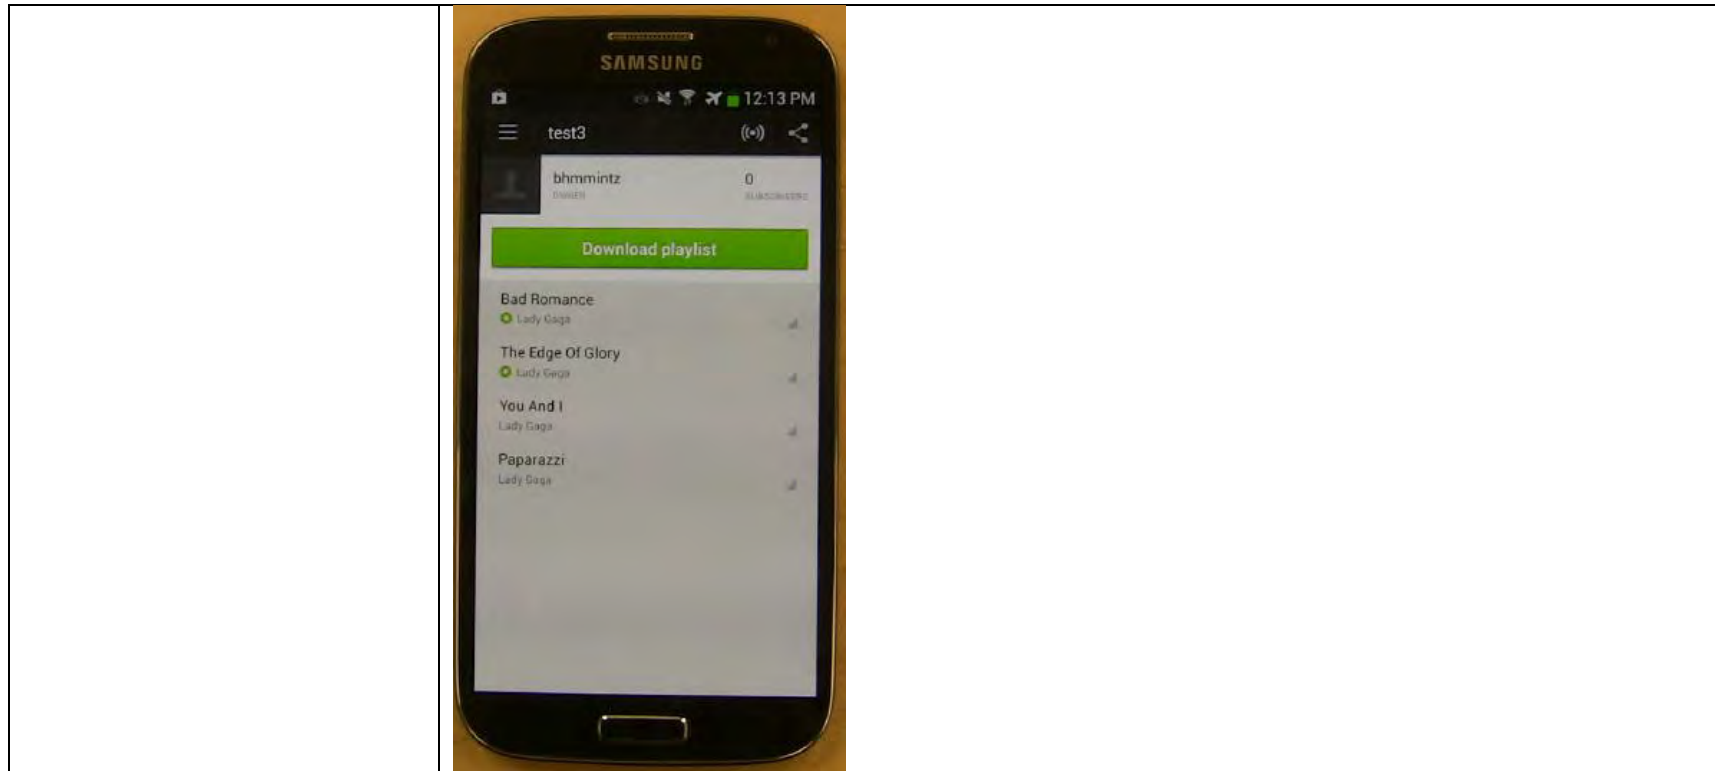

In addition, the picture below shows a representative mobile device with Google Play Music installed identifying ones of the plurality of songs in the playlist that are not stored on the electronic device. Song identifiers for song(s) that are not stored on the electronic device (e.g.,

“Land of the Snakes” and “Power Trip” shown in gray) are different than song identifiers for song(s) that are stored on the electronic device (e.g., “Born in the U.S.A.” and “Cover Me” shown in black):

In addition, the picture below shows a representative mobile device with Spotify installed identifying ones of the plurality of songs in the playlist that are not stored on the electronic device. Song identifiers for song(s) that are not stored on the electronic device (e.g., “You and I” and “Paparazzi” shown without green downloaded symbols) are different than song identifiers for song(s) that are stored on the electronic device (e.g., “Bad Romance” and “The Edge of Glory” shown with green downloaded symbols):

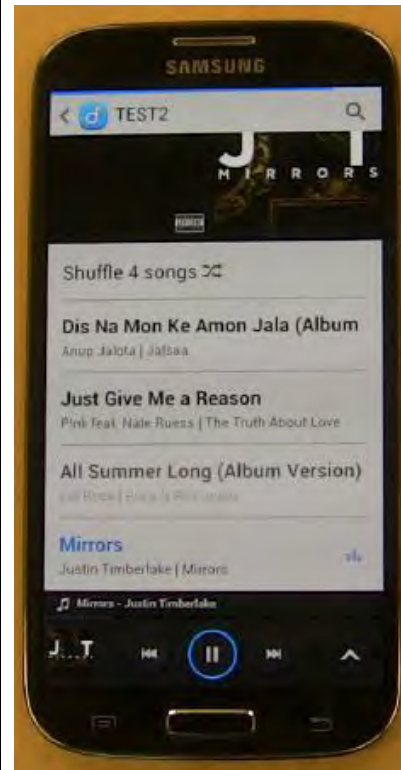

providing the playlist to the electronic device; and	<p>The step is also performed of providing the playlist to the electronic device.</p> <p>As demonstrated in the above pictures, playlists are provided to the Samsung Mobile Devices including Samsung Music Hub, Google Play Music, and Spotify.</p> <p>See also, for example, the packet sniffing trace evidence produced herewith.</p>
--	---

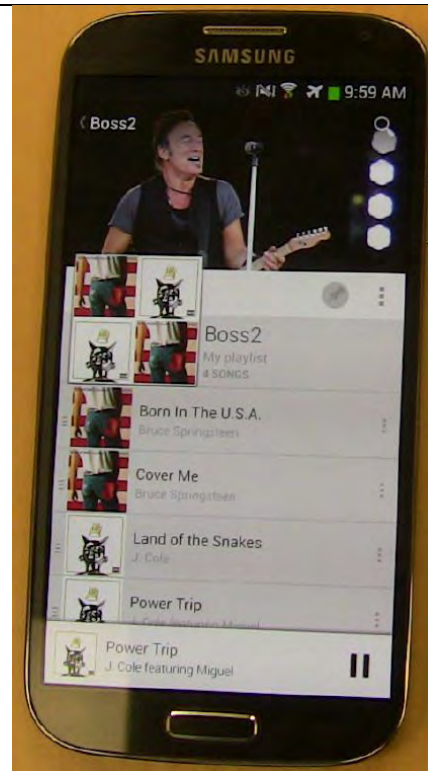

providing information to the electronic device enabling the electronic device to obtain the ones of the plurality of songs that are not stored on the electronic device from at least one remote source.

The step is also performed of providing information to the electronic device enabling the electronic device to obtain the ones of the plurality of songs that are not stored on the electronic device from at least one remote source.

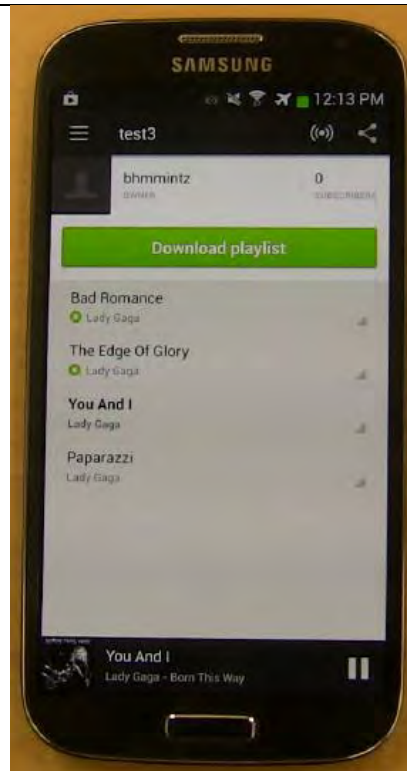

For example, the picture below shows a representative mobile device with Samsung Music Hub installed playing the song “Mirrors” obtained by the device from a remote source:

In addition, the picture below shows a representative mobile device with Google Play Music installed playing the song “Power Trip” obtained by the device from a remote source:

In addition, the picture below shows a representative mobile device with Spotify installed playing the song “You And I” obtained by the device from a remote source:

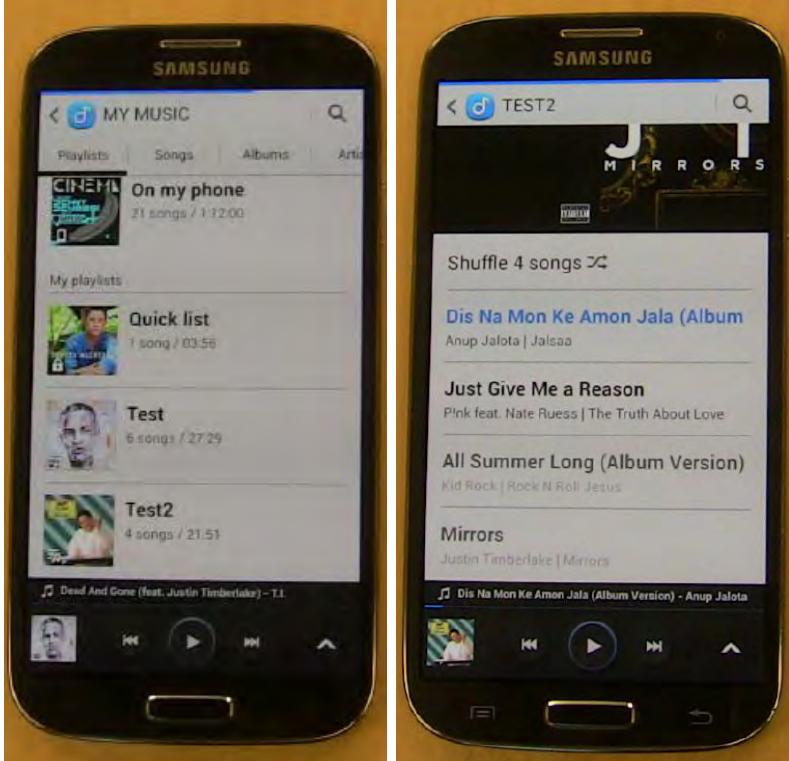

See also, for example, the packet sniffing trace evidence produced herewith.

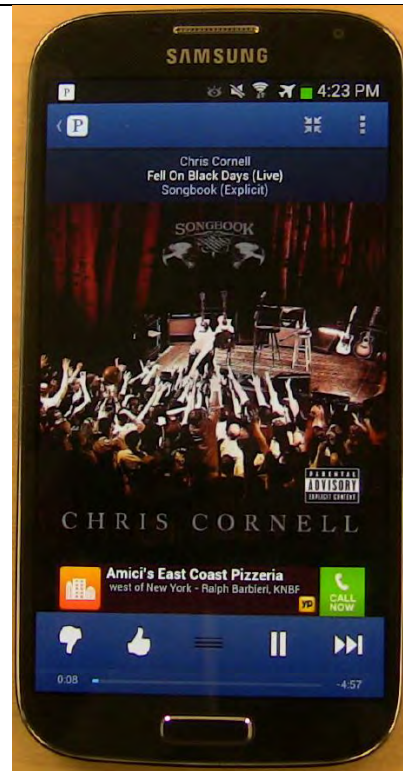

8,045,952 Claim Language	Samsung Devices
<p>2. The method of claim 1 wherein the electronic device is one of a plurality of associated electronic devices, and providing the information to the electronic device comprises:</p> <p>identifying at least one other of the plurality of associated electronic devices hosting the ones of the plurality of songs, wherein the at least one other of the plurality of associated electronic devices is the at least one remote source; and</p> <p>providing information to the electronic device enabling the electronic device to obtain the ones of the plurality of songs from the at least one other of the plurality of associated electronic devices.</p>	<p>During the use of Samsung Mobile Devices including Samsung Music Hub, Google Play Music, and Spotify, the steps are performed of identifying at least one other electronic device hosting the ones of the plurality of songs, wherein the at least one other electronic device is the at least one remote source, and providing information to the electronic device enabling the electronic device to obtain the ones of the plurality of songs from the at least one other electronic device. BHM's investigation into the infringement of this claim is ongoing and includes, for example, an investigation into the source code utilized by the Mobile Devices, the communications sent to and received from the Mobile Devices when such media sharing applications are in use, and the remote source utilized to host and deliver the ones of the plurality of songs.</p>

8,045,952 Claim Language	Samsung Devices
<p>3. The method of claim 1 wherein the electronic device is one of a plurality of associated electronic devices and the at least one remote source is at least one other of the plurality of associated electronic devices, and the method further comprises:</p> <p>receiving a request for the ones of the plurality of songs from the electronic device;</p> <p>obtaining the ones of the plurality of songs from the at least one other of the plurality of associated electronic devices; and</p> <p>providing the ones of the plurality of songs to the electronic device.</p>	<p>During the use of Samsung Mobile Devices including Samsung Music Hub, Google Play Music, and Spotify, the steps are performed of receiving a request for the ones of the plurality of songs from the electronic device, obtaining the ones of the plurality of songs from the at least one other electronic device, and providing the ones of the plurality of songs to the electronic device. BHM's investigation into the infringement of this claim is ongoing and includes, for example, an investigation into the source code utilized by the Mobile Devices, the communications sent to and received from the Mobile Devices when such media sharing applications are in use, and the remote source utilized to host and deliver the ones of the plurality of songs.</p>

8,045,952 Claim Language	Samsung Devices
<p>4. The method of claim 1 wherein the electronic device is one of a plurality of associated electronic devices and the at least one remote source is at least one other of the plurality of associated electronic devices, the method further comprising:</p> <p>receiving a request for the ones of the plurality of songs from the electronic device if the electronic device is unable to connect to the at least one other of the plurality of associated electronic devices to obtain the ones of the plurality of songs;</p> <p>obtaining the ones of the plurality of songs from the at least one other of the plurality of associated electronic devices; and</p> <p>providing the ones of the plurality of songs to the electronic device.</p>	<p>During the use of Samsung Mobile Devices including Samsung Music Hub, Google Play Music, and Spotify, the steps are performed of receiving a request for the ones of the plurality of songs from the electronic device, obtaining the ones of the plurality of songs from the at least one other electronic device, and providing the ones of the plurality of songs to the electronic device. BHM's investigation into the infringement of this claim is ongoing and includes, for example, an investigation into the source code utilized by the Mobile Devices, the communications sent to and received from the Mobile Devices when such media sharing applications are in use, and the remote source utilized to host and deliver the ones of the plurality of songs. Upon information and belief, the Mobile Devices meet the remaining elements of this claim to the extent, for example, that the content delivery performs fault tolerance, redundancy, and/or load balancing operations to deliver content to the Mobile Devices.</p>

8,045,952 Claim Language	Samsung Devices
<p>9. A method comprising: receiving, at an electronic device, a playlist assigned to the electronic device, the playlist identifying a plurality of songs, wherein ones of the plurality of songs are not stored on the electronic device;</p>	<p>During the use of Samsung Mobile Devices including Samsung Music Hub, Pandora, Google Play Music, Spotify, DLNA, and iHeartRadio, and of Samsung Player Devices including Pandora, Spotify, DLNA, and Amazon Cloud/MP3 Player, a method is performed comprising receiving, at an electronic device, a playlist assigned to the electronic device, the playlist identifying a plurality of songs, wherein ones of the plurality of songs are not stored on the electronic device.</p> <p>For example, the pictures below show a representative mobile device with Samsung Music Hub installed receiving a playlist assigned to the mobile device, the playlist identifying a plurality of songs wherein ones of the plurality of songs (e.g., “All Summer Long” and “Mirrors”) are not stored on the electronic device:</p> 

	<p>Samsung describes that the Samsung Music Hub application provides access to millions of songs in the Samsung Music Hub catalog and that the Samsung mobile devices can stream or download songs from the remote Music Hub catalog. Samsung instructs that a user can create playlists, listen to personalized radio, and beam music playlists to friends by holding Galaxy devices back to back. (E.g., http://www.samsung.com/us/musichub/, accessed September 23, 2013; http://m.samsung.com/us/support/SupportOwnersFAQPopup.do?faq_id=FAQ00050877&fm_seq=55985, accessed September 23, 2013; https://www.youtube.com/watch?v=3HFew6irzDA&feature=youtube_gdata_player, accessed September 23, 2013.)</p> <p>In addition, the picture below shows a representative mobile device with Pandora installed, where a music station “Fell On Black Days” is selected. Subsequent to selection of a music station, the mobile device receives a playlist assigned to the mobile device, the playlist identifying a plurality of songs wherein ones of the plurality of songs are not stored on the electronic device. [REDACTED]</p> <p>[REDACTED]</p> <p>[REDACTED]</p> <p>[REDACTED]</p> <p>[REDACTED]</p>
--	--

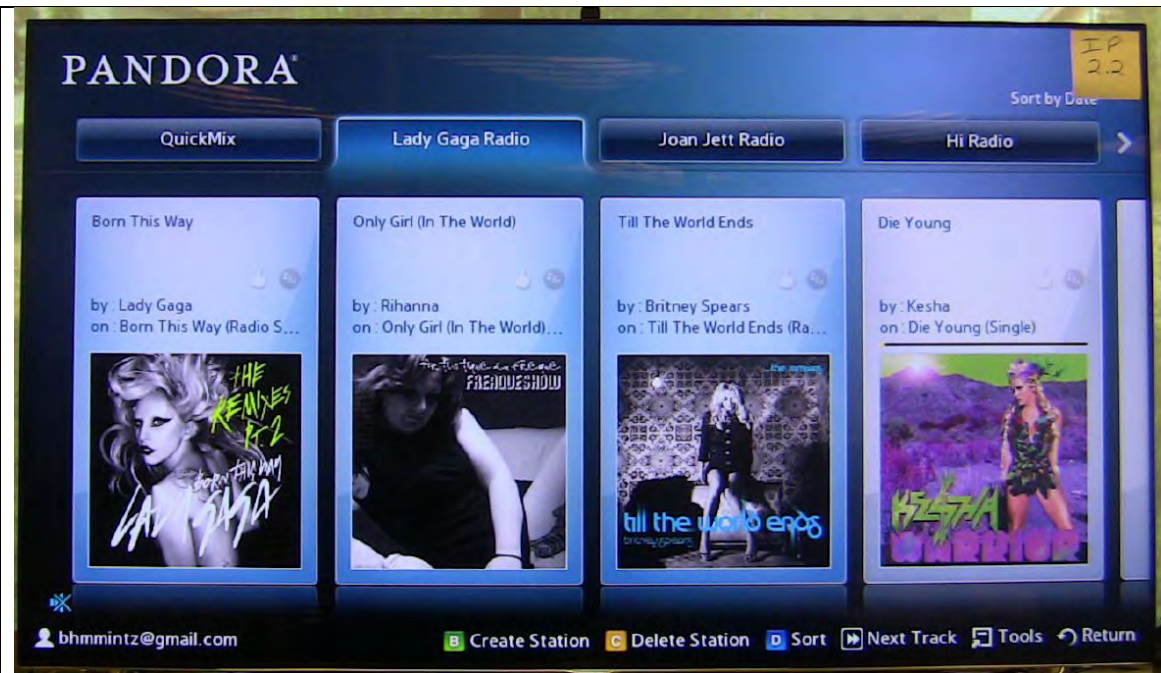

In addition, the picture below shows a representative player device with Pandora installed, where a music station “Lady Gaga Radio” is selected. Subsequent to selection of a music station, the player device receives a playlist assigned to the player device, the playlist identifying a plurality of songs wherein ones of the plurality of songs are not stored on the electronic device.
