

BS in ELECTRICAL ENGINEERING (393550) MAP Sheet

Department of Electrical and Computer Engineering

For students entering the degree program during the 2005–2006 curricular year.

This is a limited-enrollment program requiring departmental admissions approval. Please see the college advisement center or department office for information regarding requirements for admission to this major.

UNIVERSITY CORE	AND GRAD	DUATION I	REQUIREMENTS	MAJOR REQUIREMENTS (90.5-91.5 total hours)			
UNIVERSITY CORE REQUIREMENTS (48.5 hours minimum)				Complete the following preprofessional program as soon as possible upon entering BYU:		Complete at least 19 hours from the following advanced program and technical electives:	
Requirements	#Classes	<u>Hours</u>	<u>Classes</u>	a. Complete the following (or approved equivalent courses):		a. Complete at least 4 courses from the following: Ch En 381 Intro to Semiconductor Processing	3.0
	<u> </u>	<u></u>		Math 112* Calculus 1	4.0	EC En 320 Digital System Design	3.0
Doctrinal Foundation				Math 113* Calculus 2	4.0	EC En 324 Computer System Architecture	3.0
Book of Mormon	2	4.0	Rel A 121/H and 122/H	Phscs 121* Principles of Physics 1	3.0	EC En 425 Real-Time Operating Systems	4.0
New Testament	1	2.0	Rel A 211/H or 212/H	Phscs 220* Principles of Physics 3	3.0	EC En 427 Embedded Systems	4.0
Doctrine and Covenants	1	2.0	Rel C 324/H or 325/H	b. Complete at least one preprofessional course (other		EC En 443 Electronic Circuit Design 2	4.0
				than Engl 312 or 316) from the list of supporting		EC En 445 Introduction to Mixed-Signal VLSI	4.0
The Individual and Society				courses shown below.		EC En 450 Introduction to Semiconductor Devices	3.0
Wellness	1or3	1.5-2.0	from approved list	c. During the semester of completing the above, obtain an	n	EC En 451 Introduction to Digital VLSI Circuits	4.0
Citizenship			• •	application from the college advisement center and		EC En 464 Wireless Communications Circuits	2.0
American Heritage	1–2	3-6.0	from approved list	apply for professional status. (Contact the department		EC En 466 Introduction to Optical Engineering	2.0

Arts, Letters, and Sciences				Math 334 Ordinary Differential Equations	3.0		
Civilization 1 and 2	2	6.0	from approved list‡	Math 343 Elementary Linear Algebra	3.0	C S 236 Discrete Structures	3.0
Arts	1	3.0	from approved list‡	Phscs 281 Principles of Solid State Physics	3.0	C S 240 Advanced Programming Concepts	3.0
Letters	1	3.0	from approved list‡	And complete one course from the following:	5.0	EC En 452 Experiments-Integrated Circuit Developmer	
Scientific Principles & Reasoning	'	3.0	nom approved list4	Chem 105* General College Chemistry	4.0	EC En 455 VLSI Testing	1.0
Biological Science	1–2	3-6.0	from approved list	Chem 111* Principles of Chemistry	3.0	Math 315 Theory of Analysis	3.0
Physical Science	2	5-0.0 6-7.0	Chem 105* or 111*. and	And complete one course from the following:	3.0	Math 316 Theory of Analysis	3.0
1 Hysical Science	2	0-7.0	Phscs 121* or 220*	Engl 312* Persuasive Writing	3.0	Math 332 Introduction to Complex Analysis	3.0
Social Science	4	3.0	from approved list	Engl 316* Technical Writing	3.0	Math 347 Introduction to Partial Differential Equations	
Social Science	1	3.0	nom approved list	Eligi 316 reclinical writing	3.0	Math 350 Combinatorics	s 3.0 3.0
Core Enrichment: Electives				Complete the following professional requirements:		Math 355 Graph Theory	3.0
Religion Electives	3–4	6.0	from approved list†	EC En 212 Circuit Analysis and Laboratory	5.0	Math 371 Abstract Algebra	3.0
Open Electives	3–4 Variable	Variable	personal choice	EC En 313 Electronic Circuit Design 1	4.0	Math 372 Abstract Algebra	3.0
Open Electives	variable	variable	personal choice	EC En 317 Electronics Laboratory 1	1.0	Math 387 Number Theory	3.0
				EC En 360 Transmission Lines & Introductory Fields	4.0	Math 411 Numerical Methods	3.0
				EC En 360 Transmission Lines & Introductory Fields EC En 361 Transmission Lines & Introductory Fields Lab		Math 480 Mathematical Models	3.0
				EC En 361 Transmission Lines & Introductory Fields Lab EC En 370 Probability Theory	3.0	Math 500-level courses	3.0
					5.0		2.0
CDADUATION DECLUDEMENTS:				EC En 380 Signals & Systems		Physics 222 Modern Physics	3.0
GRADUATION REQUIREMENTS:		20.0		EC En 490 Team Design Project	4.0	Phscs 400-level courses	
Minimum residence hours required		30.0		EC En 491 Senior Seminar	0.5	Phscs 500-level courses	
Minimum hours needed to graduate		120.0				Other courses as approved by the department	

FOR GE QUESTIONS CONTACT THE ADVISEMENT CENTER ◆ FOR MAJOR QUESTIONS SEE YOUR DEPARTMENT ADVISOR
*THESE CLASSES FILL BOTH UNIVERSITY CORE AND MAJOR REQUIREMENTS (13–14.0 hours overlap)

†REDUCTION OF TOTAL CREDITS IS RECOMMENDED by satisfying the Global & Cultural Awareness requirement using either 1) Rel C 351 or a combination of Rel C 355 and 356 (which also double counts to satisfy part of the religion elective requirements) or 2) a combination of a foreign-language mission with the 300- or 400-level foreign language culminating course (which many students take anyway).

THE DISCIPLINE:

Electrical and computer engineers study phenomena, devices, and systems for information processing, communication, and systems control. These studies, grounded primarily in physics and mathematics, have enabled engineers to develop the innovative new technologies for information acquisition, processing, storage, and communication that have made possible our contemporary Age of Information.

Examples of systems developed by electrical and computer engineers include radio, television, radar, satellite communication systems, cellular telephones, laptop computers, fiber-optic communications devices, global and local computer networks, robotic systems, control systems, fax machines, medical image processing, computer modems, lasers, pagers, computer vision, programmable calculators. VLSI chips. computer-aided design tools, and medical instruments.

Although it is the goal of engineering to produce useful objects, electrical and computer engineers typically play a limited role in construction, assembly, or mass production. Instead, they focus on design, analysis, and the development of the underlying theory and knowledge applied in the design process.

CO-OP EXPERIENCES:

Optional co-op experiences with engineering firms throughout the USA are available. These experiences typically extend over one semester plus the spring/summer terms, for a total of eight months.

PROFESSIONAL AND HONOR SOCIETIES:

The student chapter of the Institute of Electrical and Electronic Engineers, Eta Kappa NU, is the electrical and computer engineering honor society, and Tau Beta Pi is the honor society for all engineering fields.

CAREERS:

Electrical and computer engineers are among the most actively recruited students graduating from a four-year program. Baccalaureate engineers typically start their careers as members of project teams with one or more of the following responsibilities: designing digital, analog, or optoelectronic circuits; creating or testing applicationspecific software; testing components or systems; or providing technical support for sales. Later on, many engineers find themselves pursuing managerial careers, starting their own companies, or even managing entrepreneurial funds. Top graduates are also well received by medical schools, law schools, and professional and management programs.

The BS curriculum for both the electrical engineering and computer engineering degrees is accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology, Inc. (ABET).

Note: Students are encouraged to complete an average of 16 credit hours each semester or 32 credit hours each year, which could include spring and/or summer terms. Taking fewer credits substantially increases the cost and the number of semesters to graduate.
