I still have one but not working. Its true the wires would break and leave the earpiece not working. getting its spare parts in my country was futile and i had to put it aside. a good phone though.

Ah, I remember the good ol' Treo. Neat phones, but they had a fatal design flaw: The wires that went through the hinge would break, leaving the earpiece dead. I went through about half a dozen of them over the course of a year because of it!
