### Install Patch

This is the main screen for the utility which enables you to select your required patch and install it. You are also offered the option of saving any changes made to the currently installed in FIFA back over their original files. This is especially useful if you have updated with FIFA in additional settings or game options.

Tip: To ensure the patch file has been installed correctly should you find it click on the folder to be active.

### Use Favorites

If you select this option it will firstly install your selected patch and will then copy over the top any files you have loaded in your Favorites directory.

[Back to screen display](#)

### Uninstall Patch

Selecting this option gives you the ability to remove the currently installed patch. This will therefore reset the game to its previous configuration.
