## Support System

### So What is the MRA?

The Sweetpatch MRA (Maximise your FIFA Gaming Experience) is an online database which currently supplies:

- FIFA 2001
- Mega Patch 98
- FIFA 99
- FIFA 2000
- FIFA 2001
- FIFA 2002

It does this by maintaining a set of patches and binaries which can be copied into and out of your FIFA game as required. This is especially useful if you:

- wish to use the many excellent **Super Patches** available
- wish to be able to update the new .big files for FIFA 2001
- already have a lot of your favourite patches (e.g. balls, skins, etc.) and want to play the latest version of your Super Patch set installed
- want to benefit from various add-ons and patches which are provided for the game
- partake in any modern leagues, cups or ladders which require specific sets of files loading

### In essence the MRA enables users to:

- maintain records of all your installations of FIFA games from FIFA 98 to FIFA 2001
- maintain a set of installed patches and have the ability to install or remove them
- load the correct files for the Patch you would like to use (e.g. to use the new format .big files for FIFA 2001)
- download the patches which you would like to use

Sorry -- you need Java for this ticker to work.

### New Releases

09/04/01 - Bosnian Super Patch 2001  
05/04/01 - Extreme World Update  
04/04/01 - Belgian FIFA Patch 2001

loading into your FIFA game then this can now be achieved based on the Windows Favorites theory.

- Save the current games settings for the Patch you have played before loading the next patch (great for keeping those team management changes)
- Uninstall the existing Patch to reset your FIFA game to its original settings
- Benefit from the many 'Officially Compliant Patches' which are now being developed. This means with one MRA and one install of FIFA you can benefit from many of the skins, kits, etc. which you wish
- Use **Skins** to alter the visual impact of your kits
- Update any of the available **Languages**
- Launch your FIFA game

The MRA has been designed to be as easy to use as possible, but as with all technical program it does need a degree of understanding of its purpose **especially for loading the patches correctly** on the part of the user, for it to be operated successfully and for maximum benefit to be obtained. It is for this reason that the MSSG has been designed.
