## AFFIDAVIT OF CHRISTOPHER BUTLER

1. I am the Office Manager at the Internet Archive, located in San Francisco, California. I make this declaration of my own personal knowledge.

2. The Internet Archive is a website that provides access to a digital library of Internet sites and other cultural artifacts in digital form. Like a paper library, we provide free access to researchers, historians, scholars, and the general public. The Internet Archive has partnered with and receives support from various institutions, including the Library of Congress.

3. The Internet Archive has created a service known as the Wayback Machine. The Wayback Machine makes it possible to surf more than 450 billion pages stored in the Internet Archive's web archive. Visitors to the Wayback Machine can search archives by URL (i.e., a website address). If archived records for a URL are available, the visitor will be presented with a list of available dates. The visitor may select one of those dates, and then begin surfing on an archived version of the Web. The links on the archived files, when served by the Wayback Machine, point to other archived files (whether HTML pages or images). If a visitor clicks on a link on an archived page, the Wayback Machine will serve the archived file with the closest available date to the page upon which the link appeared and was clicked.

4. The archived data made viewable and browseable by the Wayback Machine is compiled using software programs known as crawlers, which surf the Web and automatically store copies of web files, preserving these files as they exist at the point of time of capture.

5. The Internet Archive assigns a URL on its site to the archived files in the format [http://web.archive.org/web/\[Year in yyyy\]\[Month in mm\]\[Day in dd\]\[Time code in hh:mm:ss\]/\[Archived URL\]](http://web.archive.org/web/[Year in yyyy][Month in mm][Day in dd][Time code in hh:mm:ss]/[Archived URL]). Thus, the Internet Archive URL <http://web.archive.org/web/19970126045828/http://www.archive.org/> would be the URL for the record of the Internet Archive home page HTML file (<http://www.archive.org/>) archived on January 26, 1997 at 4:58 a.m. and 28 seconds (1997/01/26 at 04:58:28). A web browser may be set such that a printout from it will display the URL of a web page in the printout's footer. The date assigned by the Internet Archive applies to the HTML file but not to image files linked therein. Thus images that appear on a page may not have been archived on the same date as the HTML file. Likewise, if a website is designed with "frames," the date assigned by the Internet Archive applies to the frameset as a whole, and not the individual pages within each frame.

6. Attached hereto as Exhibit A are true and accurate copies of printouts of the Internet Archive's records of the HTML files or PDF files for the URLs and the dates specified in the footer of the printout (HTML) or attached coversheet (PDF).

7. I declare under penalty of perjury that the foregoing is true and correct.

DATE: 12/18/13

Christopher Butler

# Exhibit A

Thanks for visiting the NLB website.

We've created this site to tell you more about water jetting, and how we can help you use it to remove product build-up or prepare surfaces more productively. At high-pressure (2,000 to 20,000 psi or 140 to 1,400 bar) or ultra-high pressure (up to 40,000 psi or 2,800 bar), water jetting is the the most powerful, versatile method you can choose. And it exposes your personnel -- and the environment -- to nothing but water.

At NLB Corp., we've been helping contractors and industrial companies solve their toughest product removal and surface prep problems for nearly 30 years, with rugged pumps, hundreds of accessories, and unsurpassed customer support.

If you're looking for examples of water jetting at work, or NLB product information, you'll find it on our website.

If you'd like to request further information -- or tell us what you think - you can do so electronically.

***ULTRA-CLEAN 40<sup>®</sup>***

## **Model No. 4075D High-Pressure Liquid Jetting System**

The NLB model 4075D water jet system combines the power of 40,000 psi (2,800 Bar) waterblasting with the dependability of a plunger pump design that has been proven in countless applications over the past 28 years.

With pressures up to 40,000 psi and a flow rate of 3.0 gpm (11.4 lpm), the 4075D has the capability to perform a variety of water jetting applications. Among the jobs the *ULTRA-CLEAN 40<sup>®</sup>* can handle are surface preparation, cutting, cleaning and coating removal. Since the unit's power comes from a slow running 450 rpm crankshaft triplex plunger pump, wear and maintenance are minimized. You save money on parts and increase uptime.

Features include a compact design, which allows for high portability and ease of operation. Both skid and dolly mounting are available. Also standard on the unit is NLB's accessory manifold featuring an oil filled pressure gauge, safety rupture disk, and the state-of-the art BV40-010 By-Pass valve which makes setting and maintaining system pressure as easy as a turn of the handle.

Diesel-powered and electric-powered models are available. All units are factory tested before shipment. Call NLB today for a free demo of the *ULTRA-CLEAN 40*.

# ULTRA-CLEAN 40®

## Model No. 4075D

Model 4075D delivers 3.0 gpm (11.4 lpm) at 40,000 psi (2,800 bar)

### Industrial Engine:

A four cylinder diesel engine rated for 110 HP (82 kw) on a continuous duty basis, it includes a heavy duty clutch power take off unit, electric start 12 volt, fully shrouded engine, exhaust muffler and battery, trailer or skid mounted.

### Trailer Mounting:

- ☐ Dual axle design
- ☐ 14 inch wheels (355 mm)
- ☐ D.O.T. lighting package
- ☐ Fenders
- ☐ Electric brakes
- ☐ Acrylic enamel paint
- ☐ Size: 12' Long (3.66 m) includes tongue x 6'6" Wide (1.98 m) x 6'10" High (2.08 m)
- ☐ Weight: 4,900 lbs. (2223 kg)

### Skid Mounting:

- ☐ Size: 4'6" Wide (1.37m) x 8' Long (2.44m) x 5'4" High (1.63m)
- ☐ Weight 4500 lbs. (2041.2 kg)

### Engine Driven Pumping Assembly Complete:

- ☐ Slow running NLB Model 4075 reciprocating pump
- ☐ P.T.O./V-Belt Drive with guard
- ☐ 25 Gallon (95 l) fuel tank
- ☐ 15 Gallon (57 l) polypropylene water tank
- ☐ Water inlet filter-6 micron absolute
- ☐ Three plunger positive lubrication
- ☐ Accessory manifold and discharge pulsation dampener
- ☐ BV40-010 Pressure adjusting by-pass valve
- ☐ 20 cfm On-board air compressor
- ☐ Oil filled pressure gauge and rupture disc assembly

• Specifications subject to change without notice •

### Optional Accessories:

- ☐ NLB NCG8400 rotating cleaning lance and Bi-Mode valve
- ☐ SPIN JET® floor and grate cleaner & foot control valves
- ☐ Ultra-high pressure hose, fittings and accessories

**All Units Are Factory Tested Before Shipment**

(Above) The 4075D's power is controllable, making the removal of decals or single layers of paint possible.

(Below) The 4075D combines ultra-high pressure with low flow to quickly and efficiently clean this paint carrier.
