WHAT OUR CLIENTS SAY...

"888 containers have supplied us with literally hundreds of containers over the past 8 years. They are currently our only container supplier and we have their containers at all 11 of our sites. We have found their lease purchase and rental options to be flexible & innovative and they have always shown a keen interest in our business and its needs. Containers have always been delivered on time and to the required standard. Finally they are nice people to deal with, which always helps"

Mark Hickman - Managing Director , Sentry Self Storage.

Containers for Storage - 20ft Double-door

Triple Eight offers these useful 20' containers are a good economic alternative to 10' individual boxes. They have doors at each end, with a fitted internal partition make two economic compartments. They are ideal for your storage requirements where you have access to both ends.

As with our standard 20's, they are built to the highest international specifications for marine use. We arrange for our new containers to be shipped into the UK with cargo to cover the cost of shipping and offer them from our UK wide depots. Like our standard 20's, these double doored containers are factory painted in our fleet colour, dark cobalt blue, technically listed as RAL5013.

Each container comes with ventilators fitted in each side to ensure against any risk of condensation. Doors, sides and roofs are made of rust resistance corten steel to ensure maximum in service life and the lowest maintenance costs. Floors of treated marine ply. Both sets of doors have locking bars which are made of galvanised steel with lockable handles and if you require we arrange to fit a lock box to each end to protect the locking mechanism for added security.
