Message

Hello Mr Heinisch,

Please find the enclosed text, which I have changed and partially abridged.

I had the feeling that if I adopt the text entirely as sent by you, I would write as an employee of a law firm, which would not be credible for me and which would not be compatible with my work here at the Library. 8-)

Apart from this, I hope that I support the proper side/party 8-) with my letter.

Sorry for both remarks above. I hope that overall, that this is helpful to you.

I see the whole issue already as an exception that we are replying in such great detail, for which perhaps you must thank the summer time. 8-)

BTW: The publication date of a dissertation or other publication is actually already sufficient if only the year is crucial. Even the most important US-American Library-Database has enlisted the book.

http://www.worldcat.org/search?qt=worldcat_org_all&q=Design+of+error-control+coding+schemes+for+three+problems+of+noisy+information+transmission%2C+storage+and+processing

(even if no inventories have been evidenced in the States).

I am always available for further queries.

Best regards from Hamburg
Thomas Hapke

> Thank you for the telephone conversation. As discussed, I am enclosing the draft of a letter, which contains the text, which you would ideally sign. The text can, of course, be modified and abridged, if the core information is still included. The same applies to the attachments referred to in the letter. Reference can be made to the E-mail correspondence.

Hallo Herr Heinisch,

anbei der Text, den ich aber verändert und teilweise gekürzt habe.

Ich hatte das Gefühl, dass ich, wenn ich den Text komplett so nehme, wie Sie ihn mir geschickt habe, dass ich dann als Mitarbeiter eines Rechtsanwaltsbüros schreibe, was für mich nicht glaubwürdig wäre und was ich nicht so ganz mit meiner Tätigkeit hier an der Bibliothek vereinbaren kann. 8-)

Außerdem hoffe ich natürlich, dass ich die richtige Seite 8-) unterstütze mit meinem Schreiben.

Sorry, für die obigen beiden Bemerkungen. Ich hoffe, dass das Ganze trotzdem so ist, dass Sie damit was anfangen können.

Ich sehe das Ganze auch schon als Ausnahme, dass wir in dieser Ausführlichkeit antworten, die Sie vielleicht der Sommerzeit zu verdanken haben. 8-)

BTW: Eigentlich sollte das Publikationsdatum einer Dissertation oder sonstigen Veröffentlichung schon reichen, wenn es nur auf das Jahr ankommt. Selbst die wichtigste US-amerikanische Bibliotheks-Datenbank hat das Buch gelistet: <http://www.worldcat.org/search?qt=worldcat_org_all&q=Design+of+error-control+coding+schemes+for+three+problems+of+noisy+information+transmission%2C+storage+and+processing> (wenn auch keine Bestände in den Staaten nachgewiesen).

Für Rückfragen stehe ich gern zur Verfügung.

Herzliche Grüße aus Hamburg,
Thomas Hapke

University Library
Subject Librarian for Chemical Engineering
Thomas Hapke

Letter of Declaration: Gils, Wil J. van, and Willibrordus Johannes van Gils. *Design of Error-control CodingSchemes for Three Problems of Noisy Information Transmission, Storage and Processing*. 1988. Eindhoven, Techn. Univ., Diss.

Dear Sirs!

As subject librarian for chemical engineering I am currently employed at the University Library of the Hamburg University of Technology (TUHH). The "Library" is located at Denickestr. 22, 21073 Hamburg, Germany. I have held the position since 1988.

The Library is accessible, free of charge, to the general public, especially for the students and scholars of the TUHH and of other universities in Hamburg. Based on my employment at the Library, I have access to and knowledge of the Library's current registration practices, including cataloging, indexing and shelving. These practices have remained consistent throughout my tenure at the Library until today.

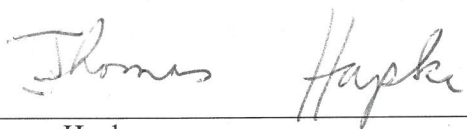

Already in 1988 there existed a digital cataloging system for all our holdings including theses, which was migrated later to the system of the GBV Common Library Network of the German States Bremen, Hamburg, Mecklenburg-Vorpommern, Niedersachsen, Sachsen-Anhalt, Schleswig-Holstein, Thüringen and the Foundation of Prussian Cultural Heritage, which is still used today. The date of the first cataloging of each item by the Library staff is still visible in its catalog entry (see also attachment). According to the Library's regular practices, which were in effect in 1988 and still are today, any item (books, theses, etc.) indexed in the Library's catalogue is searchable by subject, author, and title. After cataloging items in the Library, these are and have been available since 1988 for viewing, copying or borrowing by each of our registered users at the latest within 5 days normally, very often considerably earlier.

...

The thesis or dissertation by Willibrordus Johannes van Gils, published in 1988 under the name "Design of error-control coding schemes for three problems of noisy information transmission, storage and processing", was first received by the Library in 1988. Still today it can be borrowed by our users, see the entry in our catalog today at <https://katalog.tub.tuhh.de/Record/01676479X>. As you see in the attachments a further copy was catalogued the same year by another library of the GBV. The thesis by Van Gils has been cataloged by the date April 28, 1988 in the TUHH library. The thesis has been openly accessible for use to the public after a processing time of at the latest 5 days under the shelf call number "2108-5334" in our closed stacks, from which it can be ordered and borrowed at once until today. See as attachment a photo of the copy of the dissertation, which has been borrowed by me.

The following true and correct copies are furthermore attached to this letter: A screenshot from the cataloging system of the GBV Common Library Network of the catalog entry of the dissertation with the cataloging date and a screenshot of the entry of the dissertation in our catalog at TUHH today.

Kind regards,

Thomas Hapke
