SureCall's Force5 Wins Commercial Integrator's BEST Award

User Rating: ○○○○○ / 0

Poor ○ ○ ○ ○ ● Best

Monday, 30 June 2014

Wilson v. Cellphone-Mate (SureCall)
IPR2018-01774
SureCall Exhibit 2010

SureCall's Force5 Wins Commercial Integrator's BEST Award for Cell Booster Technology

Judged by a panel made up of industry integrators, [SureCall's](#) patent pending [Force5](#) won the 2014 top award from Commercial Integrator for best cell booster technology, presented at the recent [InfoComm](#) Show. The Commercial Integrator BEST Awards program recognizes the highest quality solutions for integration businesses.

The winners were chosen by a panel of industry experts, integrators and the editors of CI and sister publication [TechDecisions](#). Judges based their decisions on innovation, functionality, competitive advantages and benefits to the installer.

Some of the determining factors in SureCall's win was the Force5's separate uplink and downlink lanes, which help eliminate signal collisions and allow for some of the fastest 4G data rates in the industry. Also, when it was first released in 2012, it was the first self-contained cell booster on the market to support 2G, 3G and 4G service for every major carrier. Due to this, the Force5 has become the leading choice of professional installers everywhere.

Unlike competing boosters, the Force5 is the only booster that offers:

- Modular design with each booster covering up to 80,000 square feet with the ability to cover more area with additional boosters
- Ability to support 100+ simultaneous users
- SureCall's highly linear design

Think the Force5 may help your business? Call the SureCall experts at 3Gstore.com for assistance in making the right decision!

Need a large SureCall Deployment? [Request a volume quote](#)
