### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

Claim 1 recites a method for indexing a database for access using a device with overloaded keys; wherein the index is created by associating each item in the database with a string of unresolved keystrokes and upon receipt of a search request using said overloaded keys comparing the received unresolved keystrokes to the unresolved keystrokes mapped to the items in the database.

Thus, the prior art of record neither rendered obvious nor anticipated the combination of claimed elements in light of the specification, therefore claims 1-11 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

**AMENDMENT IN RESPONSE TO NON-FINAL OFFICE ACTION**

Mail Stop Amendment  
Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450

Dear Sir:

**INTRODUCTORY COMMENTS**

In response to the Office Action dated September 27, 2010, please amend the above-identified U.S. patent application as follows:

**Amendments to the Specification** begin on page 2 of this paper.

**Amendments to the Claims** are reflected in the listing of claims which begins on page 3 of this paper.

**Remarks/Arguments** begin on page 6 of this paper.

## **REMARKS**

In response to the Office Action mailed September 27, 2010, entry of the above-indicated amendments and reconsideration are requested. Claim 1 was pending. Claims 2-11 are added. Thus, claims 1-11 are pending, with claim 1 being the sole independent claim. No new matter has been added.

### **I. Specification**

The abstract stands objected to for initially including the title of the invention (see p. 2 of Office Action). The abstract has been amended as shown above to remove the title. Thus, withdrawal of the objection is requested.

### **II. Double Patenting Rejection**

Claim 1 stands rejected on the ground of nonstatutory double patenting over claim 36 of U.S. Patent No. 7,779,011. It is respectfully noted that Pat. 7,779,011 does not have 36 claims, so the Assignee assumes that the Examiner is referring to claim 36 as was pending in the application which issued as Pat. 7,779,011, and is proceeding on the basis of this assumption. Without conceding the appropriateness of this rejection, the Assignee is filing a terminal disclaimer herewith to address the rejection. Thus, withdrawal of the rejection is requested.

### **III. Allowable Subject Matter**

The Assignee thanks the Examiner for the indication that claim 1 is allowable (see p. 5 of Office Action). As no amendments have been made to the claim, it is still believed to be allowable.

### **IV. New Claims**

Claims 2-11 have been added. Each depends from claim 1 and is therefore believed to be allowable for at least the reasons stated above with respect to claim 1. Support for the claims can be found in the application as filed, such that no new matter has been added.

Support for claim 2 can be found at least in paragraph [0038] of the application as filed.

Support for claim 3 can be found at least in paragraph [0035] of the application as filed.

Support for claims 4-5 can be found at least in paragraph [0024] of the application as filed.  
Support for claims 6-10 can be found at least at paragraph [0022] of the application as filed.  
Support for claim 11 can be found at least at paragraph [0036] of the application as filed.

**CONCLUSION**

A Notice of Allowance is respectfully requested. The Examiner is requested to call the undersigned at the telephone number listed below if this communication does not place the case in condition for allowance.

If this response is not considered timely filed and if a request for an extension of time is otherwise absent, the Assignee hereby requests any necessary extension of time. If there is a fee occasioned by this response, including an extension fee, the Director is hereby authorized to charge any deficiency or credit any overpayment in the fees filed, asserted to be filed or which should have been filed herewith to our Deposit Account No. 23/2825, under Docket No. V0251.70000US02.

Dated: 12/22/2010

## DETAILED ACTION

### *Specification*

The abstract of the disclosure is objected to because the title of the invention should not be included in the abstract page. Correction is required. See MPEP § 608.01(b).

### *Double Patenting*

Claim 1 is rejected on the ground of nonstatutory double patenting over claim 36 of U. S. Patent No. 7,779,011 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows: a method for searching indexed items using a keypad with overloaded keys; wherein the indexed items have been mapped to the corresponding strings of unresolved keystrokes.

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

Providing access to an index of the items, the index having an association between subsets of the items and corresponding strings of one or more unresolved keystrokes for overloaded keys so that the subsets of items are directly mapped to the corresponding strings of unresolved keystrokes for various search query prefix substrings;	Indexing said items by associating subsets of said items with corresponding strings of one or more unresolved keystrokes for overloaded keys so that the subsets of items are directly mapped to the corresponding strings of unresolved keystrokes for various search query prefix substrings;

***Allowable Subject Matter***

The following is a statement of reasons for the indication of allowable subject matter: The claim recites a method for indexing a database for access using a device with overloaded keys; wherein the index is created by associating each item in the database with a string of unresolved keystrokes and upon receipt of a search request using said overloaded keys comparing the received unresolved keystrokes to the unresolved keystrokes mapped to the items in the database.
