After some disassembly, we can look inside of the top half of the keyboard. This is where we find that all of the key caps are locked into the frame, and use stems that we have seen on mechanical keyboard offerings in the past. We also noted at this point that the wrist rest is removable, and one could make a new cover with the aid of a 3D printer.

Logitech G213 Prodigy RGB Gaming Keyboard Review 20 | TweakTown.com

The lower half of the keyboard looks like any other rubber dome keyboard we have seen. There is a PCB near the back with LEDs for the locks, a white plastic plate which carries the key LEDs across the keyboard, and there is the main PCB near the front that is the logic board.

Logitech G213 Prodigy RGB Gaming Keyboard Review 21 | TweakTown.com

The G213 does differ from many keyboards in the way the switches are activated. Rather than a metal pad on the bottom of each rubber dome making contact, the G213 uses a pair of trace layers, and the rubber tips force these to make contact with each other.

Logitech G213 Prodigy RGB Gaming Keyboard Review 22 | TweakTown.com

Even though the G213 Prodigy does not have a ton going on with its feature set, the software does allow for quite a bit of changing and whatnot. This is why Logitech employed the 32-bit ARM STM32L100 R8TG MCU to control this keyboard as well as offering onboard storage to save changes and various profiles.

We chose to show the G213 in Logitech blue coloring. There are quite a few preset color options to be used via the light button along the top, even a wave mode of color changing LEDs. If you download and install the software, you can customize the colors or set modes to use.

ABOUT THE AUTHOR - [Chad Sebring](#)

After a year of gaming, Chad caught the OC bug. With overclocking comes the need for better cooling, and Chad has had many air and water setups. With a few years of abusing computer parts, he decided to take his chances and try to get a review job.

As an avid overclocker, Chad is always looking for the next leg up in RAM, cooling, as well as peripherals.
