Domestic Combo Primary Cartridge

At Snap-on Diagnostics, leadership means responsibility. That's why working automotive technicians continue to be an integral part of our scantool development team. They help us stay focused on what really counts when working on today's complex cars: speed, accuracy and ease of use. Together, we're able to give you the best mix of coverage and features available in any scantool.

It all started with a group of technicians where were fed up with the hard to read and difficult to use scantools. To them, the Snap-on Scanner was like a technicians dream come true. After ten years, the Snap-on Scanner is still the scantool of choice for working technicians just like you.

Features:

- The Broadest Coverage available: GM, Saturn, Ford, Chrysler, and Jeep, plus 15 Asian Import Manufacturers.
- The Deepest Coverage available: Domestic and Asian Imports way back to the early 80's, that's almost 20 years of coverage.
- The Most Extensive System Coverage available: Engine, Transmission and ABS, and in may cases Airbag and Body.
- The Only Scantool with VIN specific experience based Troubleshooting: Exclusive Fast Track Troubleshooter cartridges include Engine, Transmission, and ABS.
- The Easiest to use: Simple Point and Click operation with large easy to read display.
- The Greatest Value: 70% Discount on software updates. *
- The advanced PC board design combined with the OBD-II adapter and Personality Keys plus GM Bi-directional features make this the most technically advanced and versatile cartridge on the market today.
- Kit includes new cartridge, 5 new manuals, additional Personality Keys, Ford and Jeep adapters, OBD-II connector and other information.

Cummins Diesel Codes and Data

With this new Domestic "Combo" you can now read codes and look at live data on the Cummins Diesel found in 1998-99 Dodge Ram pickups. This new capability includes Codes and Data from the engine as well as the transmission. Plus, the new Chrysler VIN Programming feature lets you setup a newly installed PCM without taking the vehicle to a dealership.

New GM Data and Tests

Now you can also read codes and look at live data for the automatic transfer case found in many popular GM trucks and SUV's (2-spd driver selectable). Plus you can perform injector balance tests and CKP (Crank Position Sensor) relearn on many late model GM cars and Trucks.

Ford ABS coverage has been expanded to now include:

<https://web.archive.org/web/20010411032033/http://www.snapondiat.com/99combo.htm>

- Bosch Mecatronic system found on the 1996-1999 Contour
- Kelsey-Hayes 4WABS system found on the 1994-1996 Econoline
- Teves MKIV-Gi ABS system found on most 1996-1999 Crown Victoria, Grand Marquis, and Lincolns

These new systems will give you live ABS data as well as ABS self tests

Two Ways to ID Chrysler, Jeep and Ford Vehicles

To simplify vehicle identification, there are now two methods for identifying Chrysler, Jeep, and Ford Vehicles: VIN ID and Model ID

VIN ID lets you identify the vehicle by entering characters from the VIN plate while Model ID lets you scroll and select make, model, and year information.

Domestic "Combo" Primary Part Numbers:

Cartridge Kit	■ MT25001099
PROM Update Kit	■ MT20553099
Board Exchange Kit	■ MT25003099S
