Licensing Our Technology to Medical Device Manufacturers

MIS Is Actively Seeking Licensees Of Our Technology

To date, MIS has embarked on the strategy to outlicense its technology in medical fields outside orthopedics and general surgery. The results have been very productive and serve to bolster the validation and strength of our intellectual property position.

2005: Co-exclusive license for reusable-only medical devices across all medical fields with a multi-billion (revenue) medical device market leader.

2007: Exclusive license for re-usable and disposable medical devices in a very specific endo-cardiovascular application with a privately-held medical device manufacturer

2008: Co-exclusive license for reusable-only medical, veterinarian and industrial devices across all fields with a privately-held, multi-billion (revenue) medical device market leader.

2010: Exclusive license for re-usable and disposable medical devices in a specific medical field with a privately-held, multi-billion (revenue) medical device market leader.

2011: Exclusive license for re-usable and disposable medical devices in specific medical fields with a privately-held, multi-billion (revenue) medical device market leader.

2013: Exclusive license with Fujikura Ltd (Japan) for re-usable and disposable medical fields.

2014: Non-Exclusive license (disposable applications) to a publicly-traded, US based multi-national medical device company in the gynecology space

2014: Non-exclusive sub-license to a German based multi-national medical device company

2016: Exclusive license (disposable applications) to a publicly-traded, US based multi-national medical device company in the urology space
