NOTIFICATION DATE	DELIVERY MODE
-------------------	---------------

10/31/2014

ELECTRONIC

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Notice of the Office communication was sent electronically on above-indicated "Notification Date" to the following e-mail address(es):

mweipdocket@mwe.com

***Corrercted
Notice of Allowability***

Application No.

14/029,548

Examiner

ARVIN ESKANDARNIA

Applicant(s)

MATSUBARA ET AL.

Art Unit

2453

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address--

All claims being allowable, PROSECUTION ON THE MERITS IS (OR REMAINS) CLOSED in this application. If not included herewith (or previously mailed), a Notice of Allowance (PTOL-85) or other appropriate communication will be mailed in due course. **THIS NOTICE OF ALLOWABILITY IS NOT A GRANT OF PATENT RIGHTS.** This application is subject to withdrawal from issue at the initiative of the Office or upon petition by the applicant. See 37 CFR 1.313 and MPEP 1308.

1. ☒ This communication is responsive to communication filed on July 31, 2014.
2. ☐ An election was made by the applicant in response to a restriction requirement set forth during the interview on ____; the restriction requirement and election have been incorporated into this action.
3. ☒ The allowed claim(s) is/are 23-30.
4. ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
 - a) ☒ All b) ☐ Some* c) ☐ None of the:
 1. ☒ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. ____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this national stage application from the International Bureau (PCT Rule 17.2(a)).

* Certified copies not received: ____.

Applicant has THREE MONTHS FROM THE "MAILING DATE" of this communication to file a reply complying with the requirements noted below. Failure to timely comply will result in ABANDONMENT of this application.

THIS THREE-MONTH PERIOD IS NOT EXTENDABLE.

5. ☐ A SUBSTITUTE OATH OR DECLARATION must be submitted. Note the attached EXAMINER'S AMENDMENT or NOTICE OF INFORMAL PATENT APPLICATION (PTO-152) which gives reason(s) why the oath or declaration is deficient.
 6. ☐ CORRECTED DRAWINGS (as "replacement sheets") must be submitted.
 - (a) ☐ including changes required by the Notice of Draftsperson's Patent Drawing Review (PTO-948) attached
 - 1) ☐ hereto or 2) ☐ to Paper No./Mail Date ____.
 - (b) ☐ including changes required by the attached Examiner's Amendment / Comment or in the Office action of Paper No./Mail Date ____.
- Identifying indicia such as the application number (see 37 CFR 1.84(c)) should be written on the drawings in the front (not the back) of each sheet. Replacement sheet(s) should be labeled as such in the header according to 37 CFR 1.121(d).**
7. ☐ DEPOSIT OF and/or INFORMATION about the deposit of BIOLOGICAL MATERIAL must be submitted. Note the attached Examiner's comment regarding REQUIREMENT FOR THE DEPOSIT OF BIOLOGICAL MATERIAL.

/ARVIN ESKANDARNIA/
Primary Examiner, Art Unit 2453

Art Unit: 2453

1. The present application is being examined under the pre-AIA first to invent provisions.

Claims 1-22 have been cancelled.

Claims 23-30 have been newly added.

Claims 23-30 are allowed.

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Brian Seidleck on October 27, 2014.

The application has been amended as follows:

Claims 1-22 (Canceled)

23. (Currently Amended) A portable terminal, comprising:
a display unit which displays a video content;
a communication unit which performs wireless communication with an external device capable of executing video processing for displaying a video content on an external display which is different from the display unit of the portable terminal;
an user operation input unit to which a user operation is inputted; and

Art Unit: 2453

a control unit which controls the display unit and the communication unit, wherein:

during the displaying of video content on the display unit, if a first user operation instructing video content to be processed for displaying by the external device is inputted at a first point of time to the user operation input unit, then thereafter the control unit controls: (1) the communication unit to transmit identification information identifying the video content and state information of display state to the external device in order to let the same video content as the video content displayed on the display unit at the first point of time, start to be displayed on the external display; and (2) the display unit to terminate the display of the video content on the display unit and to display information on the display unit for inputting a second user operation to operate the video content which is displayed on the external display after the first point of time,

after the displaying of video content on the display unit is terminated, if ~~[[a]]~~ the second user operation to operate the video content is inputted at a second point of time to the user operation input unit, then thereafter the control unit controls the communication unit to transmit an instruction to the external device according to the second user operation, and

during the displaying of the video content on the external display, if a third user operation instructing video content to be displayed on the display unit is inputted at a third point of time to the user operation unit, then thereafter the control unit controls: (1) the communication unit to transmit information related to the third user operation to the external device; and (2) the display unit to display the same video content as the video content which is displayed on the external display at the third point of time.

Art Unit: 2453

24. (Previously Presented) The portable terminal according to claim 23, wherein:
the display unit displays a first indication for inputting the first user operation during the displaying of video content on the display unit, and
after the first point of time, the display unit replaces the first indication to a second indication for inputting the third user operation.

25. (Currently Amended) A portable terminal, comprising:
a display unit which displays a video content;
a communication unit which performs wireless communication with an external device capable of executing video processing for displaying a video content on an external display which is different from the display unit of the portable terminal;
an user operation input unit to which a user operation is inputted; and
a control unit which controls the display unit and the communication unit, wherein:
during the displaying of video content on the display unit, if a first user operation instructing video content to be processed for displaying by the external device is inputted at a first point of time to the user operation input unit, then thereafter the control unit controls: (1) the communication unit to transmit identification information identifying the video content and state information of display state to the external device without transmitting the video content to the external device, in order to let the same video content as the video content displayed on the display unit at the first point of time, start to be displayed on the external display; and (2) the display unit to terminate the display of the video content on the display unit and to display

Art Unit: 2453

information on the display unit for inputting a second user operation to operate the video content which is displayed on the external display after the first point of time,

after the displaying of video content on the display unit is terminated, if ~~[[a]]~~ the second user operation to operate the video content is inputted at a second point of time to the user operation input unit, then thereafter the control unit controls the communication unit to transmit an instruction to the external device according to the second user operation, and

during the displaying of the video content on the external display, if a third user operation instructing video content to be displayed on the display unit is inputted at a third point of time to the user operation unit, then thereafter the control unit controls: (1) the communication unit to transmit information related to the third user operation to the external device without receiving the video content from the external device; and (2) the display unit to display the same video content as the video content which is displayed on the external display at the third point of time.

26. (Previously Presented) The portable terminal according to claim 25, wherein:

the display unit displays a first indication for inputting the first user operation during the displaying of video content on the display unit, and

after the first point of time, the display unit replaces the first indication to a second indication for inputting the third user operation.

27. (Currently Amended) A portable terminal, comprising:

a display unit which displays a video content;

Art Unit: 2453

a communication unit which performs wireless communication with an external device capable of executing video processing for outputting a video content;

an user operation input unit to which a user operation is inputted; and

a control unit which controls the display unit and the communication unit, wherein:

during the displaying of video content on the display unit, if a first user operation instructing video content to be processed for outputting by the external device is inputted at a first point of time to the user operation input unit, then thereafter the control unit controls: (1) the communication unit to transmit identification information identifying the video content and state information of display state to the external device in order to let the same video content as the video content displayed on the display unit at the first point of time, start to be outputted by the external device; and (2) the display unit to terminate the display of the video content on the display unit and to display information on the display unit for inputting a second user operation to operate the video content which is outputted by the external device after the first point of time,

after the displaying of video content on the display unit is terminated, if ~~[[a]]~~ the second user operation to operate the video content is inputted at a second point of time to the user operation input unit, then thereafter the control unit controls the communication unit to transmit an instruction to the external device according to the second user operation, and

during the outputting of the video content by the external device, if a third user operation instructing video content to be displayed on the display unit is inputted at a third point of time to the user operation unit, then thereafter the control unit controls: (1) the communication unit to transmit information related to the third user operation to the external device; and (2) the display

Art Unit: 2453

unit to display the same video content as the video content which is outputted by the external device at the third point of time.

28. (Previously Presented) The portable terminal according to claim 27, wherein:
the display unit displays a first indication for inputting the first user operation during the displaying of video content on the display unit, and
after the first point of time, the display unit replaces the first indication to a second indication for inputting the third user operation.

29. (Currently Amended) A portable terminal, comprising:
a display unit which displays a video content;
a communication unit which performs wireless communication with an external device capable of executing video processing for outputting a video content;
an user operation input unit to which a user operation is inputted; and
a control unit which controls the display unit and the communication unit, wherein:
during the displaying of video content on the display unit, if a first user operation instructing video content to be processed for outputting by the external device is inputted at a first point of time to the user operation input unit, then thereafter the control unit controls: (1) the communication unit to transmit identification information identifying the video content and state information of display state to the external device without transmitting the video content to the external device in order to let the same video content as the video content displayed on the display unit at the first point of time, start to be outputted by the external device; and (2) the

Art Unit: 2453

display unit to terminate the display of the video content on the display unit and to display information on the display unit for inputting a second user operation to operate the video content which is outputted by the external device after the first point of time,

after the displaying of video content on the display unit is terminated, if ~~[[a]]~~ the second user operation to operate the video content is inputted at a second point of time to the user operation input unit, then thereafter the control unit controls the communication unit to transmit an instruction to the external device according to the second user operation, and

during the outputting of the video content by the external device, if a third user operation instructing video content to be displayed on the display unit is inputted at a third point of time to the user operation unit, then thereafter the control unit controls: (1) the communication unit to transmit information related to the third user operation to the external device without receiving the video content from the external device; and (2) the display unit to display the same video content as the video content which is outputted by the external device at the third point of time.

30. (Previously Presented) The portable terminal according to claim 29, wherein:

the display unit displays a first indication for inputting the first user operation during the displaying of video content on the display unit, and

after the first point of time, the display unit replaces the first indication to a second indication for inputting the third user operation.

REASONS FOR ALLOWANCE

Slotznick U.S. Publication No. 2005/0282582 A1 discloses a telephone device that is used to establish two-way communication with remotely located entity, or to transfer content from display screen for full viewing of the content. The two-way communication is initiated by an object emitting a signal containing a telephone number to the telephone device which in turn automatically dials the telephone number.

Walker et al. U.S. Publication No. 2004/0242304 A1 discloses a gaming system that includes a network server connected to a plurality of gaming devices that are adapted to provide a video payout on each play based on a set of payout parameters. Memory of each gaming device stores payout parameters that correspond to each possible gaming result or outcomes. When a play is initiated by a player, a gaming result is generated at a gaming device.

Goto U.S. Publication No. 2009/0030614 A1 discloses that in an information presenting apparatus, a frequency of usage of each term contained in one text or more is calculated for each user who has implemented an operation onto the text. Based on the frequency of usage of the terms, the frequencies of usage of each term are compared between a specific user and other users to find a difference there between, and terms for which the difference is equal to or larger than a predetermined value are presented. Applicant's remarks filed 12/8/11 are deemed persuasive over the prior art of record.

Prior arts taken alone or in combination fail to teach A portable terminal, comprising a display unit which displays a video content, a communication unit which performs wireless communication with an external device capable of executing video processing for displaying a video content on an external display which is different from the display unit of the portable terminal; an user operation input unit to which a user operation is inputted; and a control unit which controls the display unit and the communication unit, wherein: during the displaying of video content on the display unit, if a first user operation instructing video content to be processed for displaying by the external device is inputted at a first point of time to the user operation input unit, then thereafter the control unit controls: (1) the communication unit to transmit identification information identifying the video content and state information of display state to the external device in order to let the same video content as the video content displayed on the display unit at the first point of time, start to be displayed on the external display; and (2) the display unit to terminate the display of the video content on the display unit and to display information on the display unit for inputting a second user operation to operate the video content which is displayed on the external display after the first point of time, after the displaying of video content on the display unit is terminated, if a second user operation to operate the video content is inputted at a second point of time to the user operation input unit, then thereafter the control unit controls the communication unit to transmit an instruction to the external device according to the second user operation, and during the displaying of the video content on the external display if a third user operation instructing video content to be displayed on the display unit is inputted at a third point of

Art Unit: 2453

time to the user operation unit, then thereafter the control unit controls the communication to transmit information related to the third user operation to the external device; and the display unit to display the same video content as the video content which is displayed on the external display at the third point of time.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See form 892.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to ARVIN ESKANDARNIA whose telephone number is (571)270-3205. The examiner can normally be reached on Monday - Thursday, 8:00AM-6:00PM (EST),.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Krista Zele can be reached on (571)272-7288. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
