A look at some of the best applications for wireless Web subscribers

## Platform Services

Core technologies such as directory, portal, and provisioning software as well as location, notification and synchronization software bring intelligence to the network. These Openwave products enable operators to improve efficiency of customer and network management while providing permissions-based, private information to deliver more personalized services to subscribers.

### [Openwave™ M-Services Suite](#)

Openwave M-Services Suite is an end-to-end solution for carriers to deploy new and exciting mobile Internet services based on downloading, provisioning, and WAP technologies.

### [Openwave™ Download Fun](#)

Openwave Download Fun is powerful content delivery solution that provides a high performance platform for Communications Services Providers (CSPs) to offer subscribers services for downloading a wide variety of media objects to their mobile handsets.

### [Openwave™ Provisioning Manager - Mobile Edition](#)

Openwave™ Provisioning Manager - Mobile Edition is a flexible, extensible, centralized provisioning solution for over-the-air provisioning of wireless handsets, gateways and applications.

### [Openwave™ Provisioning Manager - Email Edition](#)

Openwave™ Provisioning Manager - Email Edition is a scalable, secure, standards-based and customizable administrative interface for Openwave Email.
