Welcome to Webvisum

WebVisum is a unique browser add on which greatly enhances web accessibility and empowers the blind and visually impaired community by putting the control in your hands! Its aim is to allow you to better enjoy surfing the net and be significantly less dependent upon outside help. Now available in English, German, Russian, Italian, Slovak, Bulgarian, Dutch, Croatian, Romanian, Portuguese, Turkish and Spanish! If you want to help, login into your account and visit the Community page!

Just a few exciting features that we already offer:

- **Community driven tagging and page enhancements.**
- **Automated and instant CAPTCHA image solving, sign up to web sites and make forum posts and blog comments without asking for help!**
- **Built in helper functions for easier page navigation and less confusion.**
- **Numerous under the hood page tweaks designed to help screen reader users.**
- **Visually Impaired users benefit from features such as high contrast page viewing, link and focus highlighting, and more.**

It is only available for the Firefox browser. If you have not used Firefox, or used an old version, we highly recommend that you

[Download the latest version of Firefox](#) which is probably the most accessible, fast and overall best web browser on the Internet. You won't regret it!

Start using the service straight away by first creating an account with us through the [Register](#) page and then installing the add on in your Firefox. Once you are running Firefox with Web Visum installed, you can press CTRL+F1 at any time for the quick help screen.

We have an extensive list of exciting features and enhancements and are planning to continue developing this product further to its fullest potential. In order to accomplish these goals we need to reach the entire blind and visually impaired Internet users community and need your help in spreading the word.

The web has just become much more accessible!
