

AFFIDAVIT OF NATHANIEL E FRANK-WHITE

1. I am a Records Request Processor at the Internet Archive. I make this declaration of my own personal knowledge.
2. The Internet Archive is a website that provides access to a digital library of Internet sites and other cultural artifacts in digital form. Like a paper library, we provide free access to researchers, historians, scholars, and the general public. The Internet Archive has partnered with and receives support from various institutions, including the Library of Congress.
3. The Internet Archive has created a service known as the Wayback Machine. The Wayback Machine makes it possible to browse more than 450 billion pages stored in the Internet Archive's web archive. Visitors to the Wayback Machine can search archives by URL (i.e., a website address). If archived records for a URL are available, the visitor will be presented with a display of available dates. The visitor may select one of those dates, and begin browsing an archived version of the Web. Links on archived files in the Wayback Machine point to other archived files (whether HTML pages or other file types), if any are found for the URL indicated by a given link. For instance, the Wayback Machine is designed such that when a visitor clicks on a hyperlink on an archived page that points to another URL, the visitor will be served the archived file found for the hyperlink's URL with the closest available date to the initial file containing the hyperlink.
4. The archived data made viewable and browsable by the Wayback Machine is obtained by use of web archiving software that automatically stores copies of files available via the Internet, each file preserved as it existed at a particular point in time.
5. The Internet Archive assigns a URL on its site to the archived files in the format `http://web.archive.org/web/[Year in yyyy][Month in mm][Day in dd][Time code in hh:mm:ss]/[Archived URL]` aka an "extended URL". Thus, the extended URL `http://web.archive.org/web/19970126045828/http://www.archive.org/` would be the URL for the record of the Internet Archive home page HTML file (`http://www.archive.org/`) archived on January 26, 1997 at 4:58 a.m. and 28 seconds (1997/01/26 at 04:58:28). The date indicated by an extended URL applies to a preserved instance of a file for a given URL, but not necessarily to any other files linked therein. Thus, in the case of a page constituted by a primary HTML file and other separate files (e.g., files with images, audio, multimedia, design elements, or other embedded content) linked within that primary HTML file, the primary HTML file and the other files will each have their own respective extended URLs and may not have been archived on the same dates.
6. Attached hereto as Exhibit A are true and accurate copies of screenshots of the Internet Archive's records of the archived files for the URLs and the dates specified in the attached coversheet of each printout.

7. I declare under penalty of perjury that the foregoing is true and correct.

ONSITE REFUELLING

AFD Onsite Refuelling System

AFD's innovative refuelling system will increase worker safety by minimizing exposure time around the hot zones and high pressure lines through controlled fuelling. The self-contained unit has been built to meet and exceed fire code and hazardous location standards as well as include secondary systems to ensure that fuelling continues uninterrupted.

Huge Capacity

10,000 L fuel tank allows for seamless mobilization and demobilization as well as reducing start times. The main fuel tank has an internal pump to attach to an

Greater Flexibility

The main body of the trailer contains 24 fuel reels, each with 300 - 450' of 1" hose allowing for greater flexibility in tight locations. Each hose includes sensors

Intuitive Control Panel

The Control Room contains two touch screen display monitors that control and provide fuel status for each reel and the main tank. The color coded monitoring

alternative fuel source in addition to connections to the 24 fuel reels.

and transmitters that generate real time data to the control room. The unit is also equipped with perimeter lighting for night operations and fuel spill protection.

system allows for easy recognition of each individual reel, as well as a visual of all 24 reels at one time.

Canada's Best Managed Companies — 2014

March 10, 2015 – AFD Petroleum was named one of Canada's Best Managed Companies for 2014. Each year, hundreds of companies compete, and are evaluated by an independent judging panel in a rigorous and independent process that evaluates the calibre of their management abilities and practices.

Achieving such a prestigious award is a true testament to our employees, who demonstrate daily the highest levels of innovation, drive and leadership. We are also extremely thankful for our loyal customers and suppliers.

AFD will be privileged and proud to be among the 2014 Winners being honoured at the annual Canada's Best Managed Companies Gala in Toronto on March 31, 2015.

Canada's Safest Employer — 2014 Transportation Category

October 28, 2014 – AFD Petroleum was recently awarded the silver medal as Canada's Safest Employer in the Transportation Category. The reception which took place in Toronto was the culmination of the national competition which quantified the effectiveness of a company's safety protocols based on various categories, with a 12 member panel deciding the winners.

We would like to bring recognition to our entire team across Canada who made this award possible.

QUALITY. SOLUTIONS. DELIVERED.

AFD is proud to offer our customers quality products, innovative solutions and deliver outstanding service.

Established in 1989, AFD Petroleum is a leading independent supplier of bulk fuel, lubricants, and storage tanks across Western Canada, Alaska, and Texas.

Delivering superior customer service, combined with innovative technology and equipment, we have earned a reputation for exceeding our customers' expectations by understanding and overcoming the many challenges of the industries we serve.

With 25 years of experience, our vision is to be the most respected solutions provider, centric to our team members, our customers, and our community.

Specializing in custom tailored programs, we offer our customers:

- Independently sourced bulk fuel
- Heavy duty lubricants, grease, and fluids
- Efficient delivery systems with state of the art equipment
- Onsite equipment including fuel and oil tank storage systems
- Accurate online satellite tank level monitoring
- Real-time billing and reporting
- Technical support
- Toll free service, 24 hours / day
- A well-equipped management team to ensure your project runs smoothly
