John Robbins could have inherited the Baskin-Robbins empire, but he walked away from the money and the power. Why? He simply didn't want to devote his life to selling ice cream after realizing it makes people unhealthy. So he decided to make a big change. Over the last 29 years, his books about healthy eating and healthy living (including bestsellers Diet for a New America and The Food Revolution) have sold millions of copies and been translated into more than 30 languages.

Ocean Robbins was born in a log cabin built by his parents, and grew up eating food they grew on the land together. He is co-author of Voices of the Food Revolution, and CEO of the 350,000+ member Food Revolution Network. Ocean has spoken in person to more than 250,000 people in 65+ nations. He is an adjunct professor at Chapman University and was selected by Time and Audubon as one of the heroes of the new millennium.
