

BETA-GEST® DIGESTIVE AID

Digestion, the second of the Six Stages of Nutrition, is the process by which complex foods are broken down into simpler substances which the body uses for energy and tissue building. It begins with chewing and ends with absorption, the third stage of nutrition, when nutrients pass through the intestinal lining and directly enter the bloodstream. Without ample acid and enzymes, the digestive system can become stressed beyond capacity and unable to do its best job. NeoLife's Beta-Gest supports efficient digestion in the stomach with "controlled-release" hydrochloric acid and plant-sourced, acid-stable enzymes to assist digestion of protein and lactose. Its complete formula addresses the underlying causes of indigestion, not just the symptoms.

NeoLife Scientific

#3521 – 100 Tablets

Why Digestive Aids?

- **To improve the efficiency of digestion** by providing compounds that are necessary for effective stomach digestion but which may be deficient.
- **To relieve uncomfortable and painful symptoms of occasional indigestion.**
- **To maximize digestive potential and obtain the greatest nutritional value from the diet.**

Our Solution: Beta-Gest Digestive Aid

- **Natural-source digestive supplementation.** 100% plant-sourced enzymes function in the acidic environment of the stomach to support the body's natural digestive processes. The product contains no animal ingredients.

- **Complete formula.** Betaine hydrochloride, lactase, and protein-digesting enzymes supplement the normal body secretions required for healthy digestion.
- **Supports protein digestion.** Betaine hydrochloride and acid-stable, acid-activated proteases including papain improve protein digestion.
- **Assists lactose digestion.** The enzyme lactase aids the digestion of lactose (milk sugar).
- **Non-habit-forming.** Addresses *causes* of occasional indigestion in the stomach, not just symptoms!
- **Base of dried beet, licorice root, and lemon.**

SUGGESTED USE: 1 to 3 tablets daily, immediately before or with food.

Supplement Facts

Serving Size: 3 Tablets
Servings Per Container: 33

	Amount Per Serving	% Daily Value
Betaine hydrochloride	825 mg	†
Acid stable protease	120 mg	†
Lactase	24 mg	†
Papain	30 mg	†
Lemon pectin	9 mg	†

† Daily Value not established.

OTHER INGREDIENTS: Microcrystalline cellulose, magnesium silicate, hydroxypropyl methylcellulose, food glaze, beet root powder, silicon dioxide, triacetin, magnesium stearate, titanium dioxide, licorice root powder, natural mint extract, natural color and carmine.

#0321

Protease, hydrochloric acid (from betaine HCl) and lactase reinforce normal stomach digestive secretions compromised by age, stress, alcohol or antacid overuse. Hydrochloric acid readies protein for enzymatic digestion, activates natural gastric enzyme, pepsinogen, and is needed for absorption of phosphorus, iron, magnesium, calcium and B₁₂. Lactase assists digestion of lactose (milk sugar).*

Store in a cool, dry place, away from direct sunlight. Packaged with safety seal.

BETA-GEST® DIGESTIVE AID

La digestión, la segunda de las Seis Etapas de la Nutrición, es el proceso mediante el cual los alimentos son descompuestos en sustancias más simples que el cuerpo utiliza para obtener energía y crear tejidos. Comienza con la masticación y termina con la absorción, la tercera etapa de la nutrición, cuando los nutrientes pasan a través del revestimiento intestinal y entran directamente en el torrente sanguíneo. Sin una gran cantidad de ácido y enzimas, el sistema digestivo puede estresarse más allá de su capacidad, no pudiendo hacer su mejor trabajo. Beta-Gest de NeoLife contribuye a una digestión eficiente en el estómago con ácido clorhídrico y enzimas estables en ácido, de origen vegetal, con "liberación controlada" para ayudar a la digestión de las proteínas y la lactosa. Su fórmula completa aborda las causas subyacentes de la indigestión, no sólo los síntomas.

¿Por Qué usar Ayudas Digestivas?

- **Para mejorar la eficiencia de la digestión** aportando compuestos que son necesarios para la digestión estomacal eficaz, pero que podrían estar en cantidades deficientes.
- **Para aliviar los síntomas de la incomodidad y el dolor de la indigestión ocasional.**
- **Para aprovechar al máximo el potencial digestivo y obtener el mayor valor nutricional de la dieta.**

Nuestra Solución: Beta-Gest Digestive Aid

- **Suplemento digestivo de origen natural.** Las enzimas 100% de origen vegetal actúan en el medio ácido del estómago para apoyar los procesos digestivos naturales del cuerpo. El producto no contiene ingredientes animales.

- **Fórmula completa.** El clorhidrato de betaína, la lactasa y las enzimas digestivas de proteínas suplementan las secreciones corporales normales necesarias para una digestión saludable.
- **Contribuye a la digestión de las proteínas.** El clorhidrato de betaína y las proteasas estables en ácido y activadas en ácido, incluyendo la papaína, mejoran la digestión de las proteínas.
- **Ayuda a la digestión de la lactosa.** La enzima lactasa ayuda a la digestión de la lactosa (azúcar de la leche).
- **No crea hábito.** ¡Aborda las causas de la indigestión ocasional en el estómago, no sólo los síntomas!
- **Base de remolacha seca, raíz de regaliz y limón.**
