

It has long been known and proven that omega-3 fatty acids play critical roles in the human diet. In particular, two omega-3 fatty acids found in fish oil, EPA (eicosapentaenoic acid) and DHA (docosahexaenoic acid) have been well researched.

Today the latest scientific research not only continues to validate the important roles of EPA and DHA in human health, but it has also shown that there is a whole family of omega-3 fatty acids, which contribute to optimal human nutrition. This critically important chain of dietary omega-3 fatty acids starts with ALA (alpha linolenic acid) and ends with DHA (docosahexaenoic acid), taking six important steps along the way. Each is now known to have its own unique biochemistry and supporting “synergistic” role in human omega-3 nutrition.

The United States Department of Agriculture suggests that all adults eat 2-3 servings of fish each week for optimal health. Unfortunately, the problem for many adults is that they eat very little fish on a consistent basis and rarely meet this important nutritional need. Large portions of the population go without getting any broad spectrum omega-3 supplementation for weeks, sometimes months. Not to mention the fact that much of the fish supply is suspect due to environmental contamination. Pregnant women, who have the highest dietary needs for omega-3 fatty acids, ironically are instructed to limit their fish intake to one serving per week, due to contamination risk.

NeoLife solves the problem of inadequate omega-3 fatty acid intake with Salmon Oil Plus. Pure and potent, Salmon Oil Plus provides a complete omega-3 profile of salmon oil with eight members of the omega-3 fatty acid family, assuring complete omega-3 supplementation in every dose.

Why Supplement With Fish Oil Rich In Omega-3 Fatty Acids?

- Fatty fish is the richest source of healthful omega-3 fatty acids, but most of us do not eat the 2-3 servings per week that experts recommend for optimal health.
- Supplementation has been proven to be an effective means of increasing dietary omega-3 fatty acids.
- Omega-3 fatty acids support optimal function of body tissues and organs, notably the heart, blood vessels, brain, nerves, eyes, skin and joints.
- Omega-3 fatty acids, crucial to the development of infant brain and eyes, are naturally present in mother's milk. Infants, whose mothers consume foods rich in omega-3 fatty acids, have higher omega-3 fatty acid levels compared to those whose mothers do not consume omega-3-rich foods.
- Omega-3 fatty acids may slow aging of the brain. Older adults who supplement their diets with EPA and DHA have demonstrated greater cognitive function when compared to those who don't.

- Omega-3 fatty acids may prevent asthmatic mothers from passing it on to their offspring.
- People who do not like fish can get the omega-3 fatty acids they need for optimal health from fish oil supplements.

PROPRIETARY MOLECULAR DIFFERENTIATION PROCESS

CONCENTRATES 8 BENEFICIAL OMEGA-3S IN HIGH POTENCY

Our Solution: Salmon Oil Plus

- Salmon Oil Plus is based on pure, natural salmon oil, providing all the benefits of one of nature's richest sources of omega-3 fatty acids.
- It includes UHPO3 –Ultra High Potency Omega-3 fatty acids—an exclusive NeoLife technology that boosts, stabilizes, and standardizes specific, health-promoting omega-3 fatty acid levels while maintaining the whole food goodness of natural salmon oil.
- It's the first supplement of its kind to assure a standardized amount of eight nutritionally important omega-3s.

- It's derived by "molecular differentiation" –leading edge technology that selects specific nutrient molecules from tuna, sardines, and anchovies, while eliminating or reducing others, delivering unsurpassed potency, purity, and consistency.
- It's safe, with no risk of accumulated toxins. Only the finest, top quality, health-screened, disease-free fish selected for human consumption are used. All sources are screened for over 200 potential contaminants, such as mercury and lead, and exceed even the most rigorous global safety standards, with a zero tolerance philosophy.
- Potency guaranteed to deliver 460mg EPA, 480mg DHA, 50mg DPA, and 80mg mixed omega-3 fatty acids with every 3-capsule serving.
- No hidden vitamins A or D.

SUGGESTED USE: 3 softgels daily with meals.

Supplement Facts

Serving Size: 3 Softgels
Servings Per Container: 30

	Amount Per Serving	% Daily Value
Calories	20	
Total Fat	2 g	3%**
Total Omega-3 fatty acids	1070 mg	
EPA (Eicosapentaenoic acid)	460 mg	†
DHA (Docosahexaenoic acid)	480 mg	†
DPA (Docosapentaenoic acid)	50 mg	†
Stearidonic, eicosatrienoic, eicosatetraenoic, heneicosapentaenoic, and alpha-linolenic acids	80 mg	†

** Percent Daily Values are based on a 2,000 calorie diet.

† Daily Value not established

OTHER INGREDIENTS: Salmon oil, UHPO3 omega-3 fatty acid concentrate (tuna, sardines, anchovies), gelatin, glycerin and water.

Contains fish (salmon, tuna, sardines and anchovies).

#0321

Each serving of Salmon Oil Plus provides 8 nutritionally important omega-3 fatty acids equivalent to approximately one serving of fresh salmon.

Research shows omega-3 fatty acids play critical roles in the health and function of the: heart and cardiovascular system; brain, central nervous system and vision; joints and connective tissue and the cellular inflammatory/anti-inflammatory balance of the body.*

Provides 8 members of the family of omega-3 fatty acids naturally part of the human food chain, including EPA and DHA. Natural salmon oil is derived by cold processing of health screened, disease free fish selected for human consumption and confirmed free of pesticides, herbicides or toxic heavy metals. **NeoLife's exclusive UHPO3 omega-3 fatty acid concentrate**, derived by "molecular differentiation", delivers purity and potency to maximize safety, comfort and benefits. Store in a cool, dry place, away from direct sunlight.

Packaged with safety seal.

NeoLife products use only GMO-free ingredients.

Durante mucho tiempo se ha sabido y comprobado que los ácidos grasos omega-3 desempeñan papeles críticos en la alimentación humana. En particular, se han realizado grandes investigaciones en dos ácidos grasos omega-3 que se encuentran en el aceite de pescado, EPA (ácido eicosapentaenoico) y DHA (ácido docosahexaenoico).

Hoy en día, las últimas investigaciones científicas no solo continúan validando los importantes papeles de EPA y DHA en la salud humana, sino que también han demostrado que hay una familia completa de ácidos grasos omega-3, un grupo de ocho en su totalidad, que contribuyen a la Nutrición humana óptima. Esta cadena críticamente importante de ácidos grasos omega-3 alimenticios comienza con ALA (ácido alfa linolénico) y termina con DHA (ácido docosahexaenoico), dando seis pasos importantes a lo largo del camino. Ahora se sabe que cada una de ellas posee su propia bioquímica única y respalda el papel "sinérgico" de los omega-3 en la nutrición humana.

El Departamento de Agricultura de los Estados Unidos sugiere que todos los adultos consuman de 2 a 3 porciones de pescado cada semana para una salud óptima. Desafortunadamente, el problema para muchos adultos es que comen muy poco pescado de manera constante y raramente satisfacen esta importante necesidad nutricional. Grandes porciones de la población no reciben ningún suplemento de omega-3 de amplio espectro durante semanas, a veces meses. Por no mencionar el hecho de que gran parte de las fuentes de pescado son dudosas debido a la contaminación ambiental. Las mujeres embarazadas, que tienen las mayores necesidades alimenticias de ácidos grasos omega-3, irónicamente reciben instrucciones de limitar su consumo de pescado a una porción por semana, debido al riesgo de contaminación.

NeoLife le resuelve el problema de la ingesta inadecuada de ácidos grasos omega-3 con Salmon Oil Plus. Salmon Oil Plus, puro y potente, proporciona un perfil completo de omega-3 de aceite de salmón con los ocho miembros de la familia de ácidos grasos omega-3, asegurando la suplementación completa de omega-3 en cada dosis.

¿Por qué consumir un suplemento de Omega-3 de Aceite de Pescado Rico en Ácidos Grasos?

- El pescado graso es la fuente más rica de ácidos grasos omega-3 saludables, pero la mayoría de nosotros no come las 2-3 porciones por semana que los expertos recomiendan para una salud óptima.
- La suplementación ha demostrado ser un medio eficaz para aumentar los ácidos grasos omega-3 en la dieta.
- Los ácidos grasos omega-3 son compatibles con la función óptima de los tejidos y órganos del cuerpo, especialmente el corazón, los vasos sanguíneos, el cerebro, los nervios, los ojos, la piel y las articulaciones.
- Los ácidos grasos omega-3, cruciales para el desarrollo del cerebro y los ojos del bebé, están naturalmente presentes en la leche materna. Los bebés, cuyas madres consumen alimentos ricos en ácidos grasos omega-3, tienen niveles más altos de ácidos grasos omega-3 en comparación con aquellos cuyas madres no consumen alimentos ricos en omega-3.

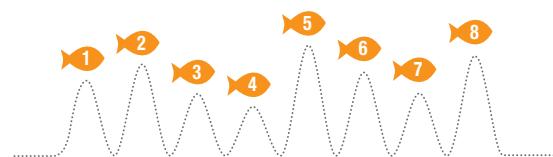

NeoLife Scientific Advisory Board

#3502, 90 Softgels

- Los ácidos grasos omega-3 pueden retrasar el envejecimiento del cerebro. Los adultos mayores que suplementan sus dietas con EPA y DHA han demostrado una mayor función cognitiva en comparación con aquellos que no la consumen.
- Los ácidos grasos omega-3 pueden evitar que las madres asmáticas lo transmitan a su descendencia.
- Las personas a las que no les gusta el pescado pueden obtener los ácidos grasos omega-3 que necesitan para una salud óptima a partir de los suplementos de aceite de pescado.

PROCESO DE DIFERENCIACIÓN MOLECULAR PATENTADO

CONCENTRA 8 OMEGA - 3S BENEFICIOSOS EN ALTA POTENCIA

SALMON OIL PLUS™

Nuestra Solución: Salmon Oil Plus

- El Salmon Oil Plus se basa en aceite de salmón puro y natural, que brinda todos los beneficios de una de las fuentes más ricas de ácidos grasos omega-3 de la naturaleza.
- Incluye ácidos grasos omega-3 de Ultra Alta Potencia UHPO3 – una tecnología exclusiva de NeoLife que aumenta, estabiliza, y estandariza los niveles de ácidos grasos específicos de omega-3, que promueven la salud, manteniendo toda la bondad de aceite de salmón natural de alimentos enteros.
- Es el primer suplemento de este tipo que garantiza una cantidad estandarizada de los ocho miembros de la familia omega-3 involucrados en la nutrición humana.

- Se deriva por “diferenciación molecular” – tecnología de avanzada que selecciona moléculas de nutrientes específicos de atún, sardinas, y anchoas, al mismo tiempo que elimina o reduce otros, garantizando una consistencia, pureza y consistencia sin igual.
- Es seguro, sin riesgo de toxinas acumuladas. Solo se utilizan los peces de la mejor calidad, analizados para el control de enfermedades y libres de enfermedades, seleccionados para el consumo humano. Todas las fuentes se examinan en busca de más de 200 posibles contaminantes, como mercurio y plomo, y superan incluso las normas de seguridad más rigurosas a nivel mundial, con una filosofía de tolerancia cero.
- Potencia garantizada para administrar 460mg de EPA, 480mg de DHA, 50mg de DPA y 80mg de ácidos grasos omega-3 mezclados por cada dosis de 3 cápsulas.
- Sin vitaminas A o D ocultas.
