

IMS Programs for International MBA

Compared to the vast pool of aspirants, the number of seats in Top-Notch B Schools in the country is fairly limited. As a result students eventually end up compromising on their career aspirations of pursuing a MBA from a premier B-School. They are forced to come down a rung in the ladder of institute hierarchy, if the results are not in tune with the expectations. But is it justified to let go off your dream and settle for a compromise? It's not. Hence, widen the cake and not the slice!

We at IMS heartily believe that students eyeing for an MBA should maximize their chances of fulfilling their career aspirations by proactively evaluating, if not pursuing international MBA options.

Advantages of an International MBA:

- ✦ Study in a truly international environment with access to quality education
- ✦ Avail employment opportunities with global and multinational corporations and organizations
- ✦ Exposure to international economics, business dynamics and work practices
- ✦ Gain multi cultural exposure for global networking opportunities from a business perspective
- ✦ Widen your career scope by becoming a 'global resource'
