CAREER OPPORTUNITIES - Santa Barbara, CA

Devices/RF Engineering Intern (Ref #1843-E)

Toyon Research Corporation is a nationally recognized, employee-owned, small business engaged in research and development of systems to support our national defense. We have an immediate opening in our Santa Barbara headquarters for a Devices/RF Engineering Intern with experience in both the theory and practice of RF devices and microwave circuits. Join a dynamic team of creative engineers working on state-of-the-art device problems for tunable filters, frequency multipliers, and local oscillators across the entire electromagnetic spectrum. The position requires a minimum of a Bachelor's or Master's Degree in Electrical Engineering, Physics or a related discipline. Excellent verbal/written skills are a must; laboratory experience is a strong plus. Experience with Schottky diodes, HEMTs, Gallium Nitride processing techniques, wafer-level testing with needle/RF probes, or Silvaco Atlas is highly desirable.

U.S. Citizenship Required. Ability to qualify for a US Department of Defense security clearance required.
