CAREER OPPORTUNITIES – Santa Barbara, CA

Aerospace Design and Test Engineer (Ref #1848-H)

Toyon is seeking a Mechanical Engineer to join a team designing mechanical prototypes of reentry bodies and related configurations. This position requires a strong background in specifying, conducting, and analyzing development tests to support configuration design, as well as qualification/acceptance tests for flight hardware. This position will be responsible for test planning and execution and analysis of test data.

The ideal candidate will have the following experience, skills, and growth path ambitions:

- B.S. in Mechanical Engineering (M.S. preferred) with emphasis on heat transfer, mechanical design, and structural analysis.
- Experience with aerospace testing facilities and techniques, thermal and structural response instrumentation, and development and execution of test plans, including specialized instrumentation.
- Strong interpersonal skills required to interface effectively with test facility personnel.
- Ability to work independently at off-site test facilities, making decisions that can be critical to program success.

U.S. Citizenship Required. Ability to qualify for a US Department of Defense security clearance required.
