CAREER OPPORTUNITIES – Santa Barbara, CA

Security Information Systems Manager (Ref #1853-I)

Toyon is seeking a Security Information Systems Manager with 5+ years of experience for our fast-paced Department of Defense environment. Applicant should have experience working under National Industrial Security Program Operating Manual (NISPOM), Joint Special Access Program Implementation Guide (JSIG), DoD Directive 5205.07 Manuals (Volumes 1-4), and the ICD standards.

At Toyon, we pride ourselves on functioning as a cooperative and professional security team based on trust. The successful candidate will continually work to develop positive and productive relationships as they support all aspects of the security program and ensure business needs are met. Resourcefulness, good work ethic, mature judgment, and the ability to discreetly handle sensitive information are essential, along with experience in developing positive internal and external customer relationships. Team members must have the ability to react quickly and provide authoritative guidance to employees on matters related to security. Excellent interpersonal skills are required.

In addition to creating mission critical technical documents and maintaining RMF artifacts, this person will generate and present computer security educational materials, carry out all phases of the Information Systems Security program, and conduct investigations of computer security violations and incidents.

Functions include:

- Interpretation of Government Regulations relating to IA management of certification and accreditation of computer networks and standalone information systems
- Ensuring systems are being operated securely and computer security policies and procedures are implemented
- Developing and coordinating business continuity plans (COOP and CP)
- Monitoring of systems in accordance with JSIG, DAAPM and NIST 800-53 (via NIST 800-171)
- Monitoring and resolving Plan of Action and Milestones (POA&Ms) to mitigate system vulnerabilities
- Developing, reviewing, and evaluating best practices, policies, procedures and processes
- Technical support of PC hardware and software

Qualifications:

- Minimum of 5 years Security Information Assurance
- Experience with administering enterprise class computing, networking, and storage hardware
- Experience with DoD security practices, system hardening and DISA STIG procedures
- Thorough understanding of JSIG, NIST 800-53 and NIST 800-171 controls
- Excellent verbal and written communications skills

U.S. Citizenship Required. This position requires a final TOP SECRET clearance with a favorable SSBI within the past five years. Candidate must be SAP and SCI program eligible.
