CAREER OPPORTUNITIES - Santa Barbara, CA

Manufacturing Engineer (Ref #1952-E)

Toyon is seeking a manufacturing engineer to assist in the manufacturing of complex antenna systems in a low-volume, high-value production environment. In this environment, tasks can range from high-level analysis to direct, hands-on assembly and inspection of high-value parts. Work involves the application of basic engineering principles to perform routine design, fabrication, modification and evaluation in support of manufacturing operations such as machining, metal forming, molded part fabrication, and assembly. Perform material handling tasks including ordering, receiving, inspecting and documentation. Prepare plans, process specifications, procedures, production aids and assembly fixtures. Conduct analyses or tests of a routine degree of complexity pertaining to the development of new methods, materials, processes or standards and provide recommendations accordingly. Perform data acquisition and analysis using Matlab, C++, and proprietary software. Must be able to support testing at contractor facilities requiring travel. Familiarity with quality and process control methodologies such as LEAN, AS 9000, or equivalent desired. Experience with Solidworks is desired.

Experience and Training: Bachelors or Masters Degree in Manufacturing Engineering or equivalent experience.

U.S. Citizenship Required. Ability to qualify for a US Department of Defense security clearance required.
