

## Clinical Research Initiative

### **Application Instructions**

Fill in the fields below describing your clinical research idea. You may include up to 1 figure. Please contact us directly if you need help with the application or if you have other research needs. This form is intended to be straightforward, but if you have another template you prefer, that is acceptable.

As a guide, include most of the following information and sections in your proposal where applicable:

Title of Project

### **Contact Information**

Clinician Name  
and Title  
(must be licensed)

NPI

Study Contact  
Name (if different)

Institution /Practice /  
Company Name

Specialty

Phone

Email

Condition(s) being studied

Intervention(s) being studied

Preliminary Data (if any)

Patient population(s) being  
studied (demographics)

### **Significance and Innovation**

Why is this an important study?  
How could this change clinical  
practice and outcomes?

### **Methods and Approach**

Briefly describe methods

Approximate sample size  
and number of microbiome  
samples needed

Ethical considerations,  
including whether you  
have your own IRB

Plan for analysis and  
whether you need help from  
uBiome bioinformatics team

Timeline highlighting key milestones  
through to publication Institutional

Resources available to you (if any)

Other personnel  
and their contributions

Other support for this project  
(in terms of funding)

References cited

Have you registered this study on  
ClinicalTrials.gov? If so, what is the  
registration number? If not, do you  
plan to register this study?

Email completed form to [clinicalresearch@ubiome.com](mailto:clinicalresearch@ubiome.com) and contact us with any questions.
