Subject: Re: A's Howard Terminal Transportation Meeting

Hi all,

As a follow up to various emails and discussions over the last several days, this email is to confirm the agendas for our upcoming transportation meetings.

This Friday's (July 12th) meeting is cancelled. We will be having a smaller group working session later on Friday afternoon focused on engineering issues related to the potential over and under-crossing options at Market Street. If you do not have a PE in your signature block, a deep and abiding interest in resolving utility conflicts, and most importantly, you have not yet received an invite from me to the later meeting, your Friday afternoon is now free.

Next Friday (July 19th), Rob will be back from his extended luau and ready to present proposed trip reduction, mode splits, and TDM scenarios to achieve 20 percent trip reduction. The goal of this meeting will be to reach consensus on the "preferred alternative" path to 20 percent, which will then underly the updated transportation, and by extension, GHG, Air Quality and Noise analyses in the EIR, with the understanding that the TDM approach will remain flexible and the actual suite of TDM measures to be implemented will likely evolve over the life span of project. This will be an "all hands" meeting, so plan to be there. Jill will provide vegan donuts. Maybe.

I need to coordinate with Andrea on a date to button up Rob's analyses specific to Port traffic; this will likely take place either Wednesday, July 24th at 9 a.m. or Friday, July 26th at 1 p.m. Stay tuned.

Thank you all!

Molly
