Text Correspondence  3	
<p>There is no way this facility should be built without an overpass over the Union Pacific tracks on First Street at Market Street. I have spent a considerable amount of time in this area and between the trucks going into the scrap yard and the slow moving trains, the traffic in this area will be grid locked without a overpass on Market Street. Bicycles are at particular hazard due to the railroad tracks. When a freight train stops for an extended time, pedestrians do the craziest things and crawl under or climb over the train cars, not having any idea when it might start moving again. Train traffic, and in particular passenger train traffic, in this area will be increasing over the years making the situation on First Street even worse.</p>
