**FIRST AID**

**CALL A POISON CONTROL CENTER OR DOCTOR IF YOU FEEL UNWELL**

If **in eyes:** Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

If **on skin or clothing:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

If **swallowed:** Immediately call a poison control center or doctor. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give any liquid to the person. Do not give anything by mouth to an unconscious person.

If **inhaled:** If not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if not breathing, call 911 or an ambulance, then give any liquid to the person. Do not give anything by mouth to an unconscious person.

**PRECAUTIONARY STATEMENTS**

Wash thoroughly with soap and water after handling. Read and follow all precautionary statements on the accompanying pesticide label(s).

**DIRECTIONS FOR USE**

Prior to use read all directions on this label and on the label of the product used. The product label for specific usages and restrictions have precedence over directions for uses referred to on this label.

Use rates may be adjusted to compensate for environmental conditions or mechanical factors. Lower dosages may be used when spraying under calm winds, slow application speeds, low pressures, and lower boom heights with nozzles closer to the target. The greater the shear on the spray boom nozzle head the greater the spray droplet fragmentation which produces fine droplets which may drift to non-targeted areas or evaporate into the atmosphere. For best results in aerial application, use state-of-the-art techniques, such as pressure less than 45 psi and nozzles oriented 45 degrees back to straight back.

**MIXING INSTRUCTIONS**

**SHAKE WELL OR RECIRCULATE BEFORE USE** AFFECT GC is very concentrated and performs effectively at ultra low use rates; as low as 1-2 oz per 100 gal of water. Start with low dosage rates and increase as needed. A thickened or "stringy" solution indicates that too much AFFECT GC has been used.

1. Select proper dosage for the spraying operation
2. Fill sprayer 1/3 to 1/2 full of water
3. Add dry flowables or dispersible granules
4. Add emulsifiable concentrates
5. Continue to agitate until tank is 3/4 full
6. Either (1) inject AFFECT GC liquid into the suction side of the feeder or recirculating pump to obtain adequate dispersion of the polymer throughout the pesticide solution, or (2) slowly (4 oz. per 100 gal

**CONDITIONS OF SALE AND WARRANTY**

The Directions for Use of this product are based on field use and tests. The directions are believed to be reliable and should be followed carefully. However, it is impossible to eliminate all risks inherent associated with the use of this product. Crop injury, ineffectiveness, or other unintended consequences may result because of such factors as weather conditions, presence of other materials, or the manner of use or application all of which are beyond the control of manufacturer or the Seller. All such risks shall be assumed by the Buyer. THE MANUFACTURER OR SELLER MAKES NO OTHER EXPRESS OR IMPLIED WARRANTY OF FITNESS OR MERCHANTABILITY OF ANY OTHER EXPRESS OR IMPLIED WARRANTY. IN NO CASE SHALL THE SELLER BE LIABLE FOR CONSEQUENTIAL, SPECIAL, OR INDIRECT DAMAGE RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT. The manufacturer and the Seller offer this product, and the Buyer and User accept it, subject to the foregoing Conditions of Sale and Warranty, which may be varied only by agreement in writing signed by a duly authorized representative of the manufacturer.
