GENERAL INFORMATION

BRONC TRIPLE® is specifically formulated to enhance herbicide performance by reducing mineral binding of various active ingredients and improving overall spray deposition. This triple action adjuvant system provides the water conditioning benefits of AMS, improved spreading and spray coverage of a nonionic surfactant combined with patented drift reduction technology. This unique blend has been shown to improve herbicide performance such as glyphosate and other active ingredients that benefit from the use of ammonium sulfate and a nonionic surfactant.

BRONC TRIPLE contains patented drift reduction technology that reduces the amount of driftable fines (<105 Microns) when used properly. BRONC TRIPLE's properties benefit the user by reducing drift and potential off target injury to sensitive crops and other vegetation. This ability results in maximizing the full potential of herbicides by depositing more chemical on targeted weeds.

NOT FOR AQUATIC USE

USE RATES

For Terrestrial Use Only

For use with products registered for agricultural, forestry, industrial, municipal, non-cropland, ornamental, rights-of-way and other uses. The addition of BRONC TRIPLE to a tank-mix should always be preceded by a review of herbicide(s) labels and their procedures, rates and application requirements. Before using BRONC TRIPLE, it is recommended that the user become familiar with potential crop sensitivity or conduct a field test to check for phytotoxicity of the herbicide-adjuvant combination.

Application Rates: The recommended use rate is 2 to 4 quarts per 100 gallons of spray solution.

The 3 quart rate is recommended in most situations. If water hardness is greater than 500 ppm, the higher rate should be used or additional water conditioning agents, such as BRONC® MAX, should be added.

Under stressful environmental conditions, such as hot and dry weather or if greater populations of hard to control weeds, such as velvetleaf, are evident, the higher rates of BRONC TRIPLE should be used. (Each gallon of BRONC TRIPLE contains 1.25 pounds of actual AMS.)

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage and disposal. To avoid product degradation and equipment corrosion, do not use iron, copper or aluminum containers or equipment.

STORAGE: Store in original container only and keep tightly closed. Store in closed storage area. Do not allow water to be introduced into the contents of this container. Do not store near heat or open flame. Do not store with oxidizing agents.

PRODUCT DISPOSAL: Dispose of contents in accordance with all government regulations. Improper disposal of excess pesticide, spray mixture or rinsate is a violation of federal law. Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility. Do not contaminate water sources by run off from cleaning of equipment, disposal of equipment washwater or spray waste.

CONTAINERHANDLING: Dispose of container in accordance with all government regulations. Triple rinse (or equivalent), then offer for recycling, if available, or reconditioning, if appropriate. Alternatively, puncture and dispose of the container in a sanitary landfill, or by other procedures approved by state and local authorities, by burning. If burned, STAY OUT OF SMOKE.

Recycling cleaned containers is the best option of container disposal. ACRC (Agricultural Container Recycling Council) operates the national recycling program. To contact your state or local ACRC recycler, visit the ACRC web page at www.acrecycle.org.
