A mating disruptant formulation for:

**ORIENTAL FRUIT MOTH** (Grapholita molesta).

**MACADAMIA NUT BORER** (Cryptophlebia ambrodelta)

**KOÁ SEEDWORM** (Cryptophlebia illepida)

**ACTIVE INGREDIENTS:**

- Z-8-Dodecen-1-yl Acetate* .......................................................... 4.65%
- E-8-Dodecen-1-yl Acetate* .......................................................... 0.30%
- Z-8-Dodecen-1-ol* ................................................................. 0.05%

**OTHER INGREDIENTS:** ............................................................ 95.00%

**TOTAL:** ............................................................................................. 100.00%

*250 mgs of pheromone/ dispenser

**NET CONTENTS:**

Dispensers per package: 360 units

EPA Registration No. 51934–8      EPA Establishment No. 51934–OK–1

**FIRST AID STATEMENT**

If on skin or clothing
- Remove contaminated clothing.
- Rinse skin immediately for 15-20 minutes with water.
- Contact a poison center or doctor for advice on treatment.

If in eyes
- Hold eyes open and rinse slowly and gently for 15-20 minutes. Remove contacts, if present, after the first 5 minutes, then continue rinsing eyes.

Hot line Number
- When calling a poison center or doctor, or when seeking treatment, have the product container or label with you. For additional information, you may also contact Trece Inc. at 1-866-785-1313.

**ENVIRONMENTAL HAZARDS**

For terrestrial use:
- Do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark.
- Do not contaminate water when disposing of product, wash water, or when cleaning equipment.

**WARRANTY AND LIMITATION OF DAMAGES**

All statements concerning the use of this product apply only when used as directed as stated on this product label. Trece Inc. warrants that the product conforms to this label and under normal conditions of use according to this label, is reasonable fit for the stated label purpose. The manufacturer makes no express or implied warranties of merchantability or fitness for a purpose concerning this product, or its use, extending beyond the label. Under no circumstance will Trece Inc. be liable for damage (special, consequential or incidental) that result from the handling, storage, or use of this product which is not in compliance with the label. Read all label directions carefully.

Buyer’s exclusive remedy, should this product be defective, is replacement of the product, or if this is impracticable, a purchase price refund.

**PESTICIDE DISPOSAL:** Wastes resulting from the use of this product must be disposed of on site or at an approved waste disposal facility.

**CONTAINER DISPOSAL:** Dispose of empty dispensers and foil envelopes in trash.

**APPLICATION**

Attach dispensers securely to lateral branches in upper one-third of tree canopy. Attach the dispensers from the ground or a moving trailer using a pole applicator.

**TREATMENT TIPS**

CIDETRAK® OFM-L suppresses mating of Oriental Fruit Moth. Immigration of mated female moths from adjacent, infested orchards can reduce the level of control. Area-wide treatment of the entire host plant block is the most effective strategy. To supplement CIDETRAK® OFM-L, use insecticides to control high populations of Oriental Fruit Moth. Monitor all pest populations to determine timely use of insecticides. To manage immigration and high population pressures, consider:

1. Treatment of external sources of infestation with CIDETRAK® OFM-L
2. Treatment of external sources of infestation with an insecticide
3. Treatment of pheromone treated orchard with insecticide

Consult your local extension specialist, certified crop advisor, or Trece representative for local field condition management strategies.

**STORAGE AND DISPOSAL**

Do not contaminate water, food, or feed by storage and disposal.

**PESTICIDE STORAGE:** Store unopened original package in a dry location at temperature below 40° C. To avoid contamination of food or feed items, only unopened product packages may be stored in cold storage facilities that are used for food storage.

---

**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

**READ ENTIRE LABEL BEFORE USING**

CIDETRAK® OFM-L disrupts the mating communication between adult male and female moths, reduces fertile egg laying, suppresses subsequent larval infestation, and reduces the need for applying insecticides.

For maximum effectiveness, growers remove and destroy infested fruit from trees and the ground. Growers maintain accurate records of OFM adult populations monitoring and larval damage within their orchards. Consult your local extension specialist, certified crop advisor, or Trece representative for assistance in designing the best CIDETRAK® OFM-L program for your orchard.

---

**Crop**

- Peaches, Nectarines, Apricots, Plums, Cherries, and other stone fruits.
- Apples, Pears, Quince, and other pome fruits.
- Almonds, Macadamia, and other tree fruit crops.

**Targeted Pest**

- Oriental Fruit Moth (Grapholita molesta).
- Macadamia nut borer (Cryptophlebia ambrodelta).
- Koa seedworm (Cryptophlebia illepida).
