A systemic growth regulator for shoot growth suppression of perennial landscape and container grown ornamental plants.

**Active Ingredients**
Flumet月中 methylthioyl(4 trifluoromethyl)phenyl pyrimidinemonium………………0.3%

Other Ingredients
99.67%

Total: 100.00%

**Precautionary Statements**

**Hazard to Humans and Domestic Animals**

**Keep Out of Reach of Children**

**CAUTION / PRECAUTION**

Si usted no entiende en español, busque a alguien que se le explique a usted en detalle. If you do not understand the label in English, see a fluent English speaker.

**Notes:** Fill in the entire label before using. Use only according to label directions. Before buying or using this product, read Terms and Conditions of Use. Warranty Disclaimer. Initial Rate of Use and Limitation of Remedy at the end of the label. If terms are unacceptable, return at once unopened. Specialty Chemical: Do not eat or store with food, drugs, or clothing. Harmful if swallowed or inhaled through the skin. Causes eye irritation. Avoid dusting wind or spray mist and contact with eyes, skin or clothing.

**PROMOTIVE PROTECTIVE (PPE)**
Some personal protective equipment (PPE) may be required to handle this product. If you want more options, follow the instructions for Category A on an EPA's personal protective equipment category chart.

**Category A - Use of protective clothing and other work practices.**

- Long-sleeved shirt and long pants
- Chemical-resistant gloves
- Chemical-resistant eyewear

**If Category A personal protective equipment is required for use of Cutless 0.33G, PPE is needed for each individual who:

- Follow manufacturer's recommendations for storage/PPE. For each individual who uses the product, wear dust mask and shoes.
- Know and use PPE separately from other contaminants.

**USER SAFETY RECOMMENDATIONS**

- Users should:
  - Remove all clothing/ PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
  - If the pesticide is swallowed, do not give anything by mouth to an unconscious person.
  - If breathing has stopped, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible.

**FIRST AID**

- If swallowed:
  - Give 1-2 cups of water if person is breathing. Call 911 or an ambulance if not breathing. Give artificial respiration, preferably mouth-to-mouth if possible.

- If inhaled:
  - Remove person to fresh air. Call 911 or an ambulance if not breathing. Give artificial respiration, preferably mouth-to-mouth if possible.

- If on skin:
  - Remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.

**DIRECTIONS FOR USE**

- It is essential of the label to use the product in a manner inconsistent with labeling. Read directions for use carefully before applying. Use only according to label directions. Use the product in accordance with the directions provided in this material safety data sheet.

**USE INFORMATION FOR GROWTH REGULATION OF ESTABLISHED PERENNIAL LANDSCAPE ORNAMENTALS**

**Application Timing**

Application
Cutless 0.33G is applied to a large number of plants.

**Application Rates**

Application
Cutless 0.33G is applied to a large number of plants.

**Use Precautions for Established Perennial Landscape Ornamentals**

**Other Ingredients**

- Use Cutless 0.33G only on plantings that are well-established and in vigorous growth condition.
- Avoid application when weather conditions favor movement of granules from target area.
- Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean low water mark. Do not contaminate water when applying this product. Avoid application near water loss and mass and height of woody stems. Duration of growth suppression ranges from 2 to 6 months, depending upon plant species, environmental conditions, root system, general health, mass and height of woody stems.
- Water loss and mass and height of woody stems. Duration of growth suppression ranges from 2 to 6 months, depending upon plant species, environmental conditions, root system, general health, mass and height of woody stems.

**Notes:** The amount of Cutless 0.33G required for optimum growth regulation response is dependent upon the height and mass of woody stems, duration of growth suppression ranges from 2 to 6 months, depending upon plant species, environmental conditions, root system, general health, mass and height of woody stems. Water loss and mass and height of woody stems. Duration of growth suppression ranges from 2 to 6 months, depending upon plant species, environmental conditions, root system, general health, mass and height of woody stems.

**Other Ingredients**

- Be sure to check and adhere to the directions for the plants that follow when applications are made at the onset of spring greenup when the plants are shaped and pruned to the desired size. If multiple applications are required, the plant should be shaped and pruned again prior to sequential applications.
- For single applications, do not apply more than 1.5 lbs a rate of Cutless 0.33G per acre.
- Do not apply to annual bedding plants or areas intended for annual bedding plants within 6 months of application of Cutless 0.33G.
- Use Cutless 0.33G only on plantings that are well-established and in vigorous growth condition.
- Avoid application when weather conditions favor movement of granules from target area.
- Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean low water mark. Do not contaminate water when applying this product. Avoid application near water loss and mass and height of woody stems. Duration of growth suppression ranges from 2 to 6 months, depending upon plant species, environmental conditions, root system, general health, mass and height of woody stems.
- Water loss and mass and height of woody stems. Duration of growth suppression ranges from 2 to 6 months, depending upon plant species, environmental conditions, root system, general health, mass and height of woody stems.

**STORAGE AND DISPOSAL**

- Do not apply to water, or to areas where surface water is present or to intertidal areas below the mean low water mark. Do not contaminate water when applying this product. Avoid application near water loss and mass and height of woody stems. Duration of growth suppression ranges from 2 to 6 months, depending upon plant species, environmental conditions, root system, general health, mass and height of woody stems.
