**DISCLAIMER:**

Always refer to the label on the product before using Helena or any other product.
Cabbage: 1 to 2 quarts/acre applied from the 4 to 9 leaf stage. Repeat as necessary at 10 to 14 days intervals until one month before harvest. Water rate: 5 to 50 gallons/acre.

Carrots: 1 to 2 quarts/acre applied when sufficient leaf area is present to intercept the spray. Repeat as necessary at 10 to 14 day intervals. Water rate: 5 to 50 gallons/acre.

Cherries: Regular applications of 1 to 2 quarts/acre at 7 to 14 day intervals from petal fall to one month before harvest. Under conditions conducive to fruit russet (variety, weather conditions, etc.) delay applications until 6 weeks after petal fall. Water rate: 15 to 50 gallons/acre. For use in Wisconsin: Calcium FL can be applied to this crop in Wisconsin where supplemental calcium has been shown to be of benefit to plant storage organs and where soil test calcium is low. Also on crops where supplemental calcium has been shown to improve the resilience to physiological disorders.

Citrus: 1 to 2 quarts/acre from fruit set until one month before harvest at 10 to 14 day intervals. Water rate: 25 to 100 gallons/acre.

Conifers: 2 quarts/acre at start of new season leaf production and again in early autumn. Water rate: 50 to 100 gallons/acre.

Courgettes (Field Grown): Repeat applications of 1 to 2 quarts/acre at 7 day intervals during fruit development up to one month before harvest. Water rate: 20 to 50 gallons/acre.

Cranberries: 1 to 3 pint/acre at early bloom. Water rate: 50 gallons/acre. For use in Wisconsin: This product can be applied in Wisconsin where supplemental calcium has been shown to be of benefit to plant storage organs and where soil test calcium is low. Also on crops where supplemental calcium has been shown to improve the resilience to physiological disorders.

Cucumber (Field Grown): Repeat applications of 1 to 2 quarts/acre at 7 day intervals during fruit development up to one month before harvest. Water rate: 20 to 50 gallons/acre.

Cucurbits (Field Grown): Repeat applications of 1 to 2 quarts/acre at 7 day intervals during fruit development up to one month before harvest. Water rate: 20 to 50 gallons/acre.

Garlic: 1-1/2 to 2 quarts/acre applied when the crop is 6 inches tall. Water rate: 5 to 50 gallons/acre.

Ginseng: 1 to 2 quarts/acre once new season growth is well underway. Repeat if necessary at 10 to 14 day intervals. Water rate: 50 gallons/acre.

Groundnuts: 1 to 2 quarts/acre at the 4 to 6 leaf stage followed by a second application 10 to 14 days later. Water rate: 3 to 20 gallons/acre.

Lettuce (Field Grown): 1 to 2 quarts/acre applied at 10 to 14 days after transplanting or emergence. Repeat as necessary at 10 to 14 day intervals until one month before harvest. Water rate: 5 to 50 gallons/acre.

Melons (Field Grown): Repeat applications of 1 to 2 quarts/acre at 7 day intervals during fruit development up to one month before harvest. Water rate: 20 to 50 gallons/acre.

Nectaries: Regular applications of 1 to 2 quarts/acre at 7 to 14 day intervals from petal fall to one month before harvest. Note: Final application must be made at least one month before harvest. Under conditions conducive to fruit russet (variety, weather conditions, etc) delay applications until 6 weeks after petal fall. Water rate: 15 to 50 gallons/acre.

Nuts (Deciduous): 1 to 2 quarts/acre 7 days after petal fall. Water rate: 50 gallons/acre.

Onions (Field Grown): 1 to 2 quarts/acre applied at the 6 leaf stage. Repeat if necessary at 10 to 14 days later. Also, 2 quarts/acre at bulb swelling, repeated once or twice at 10 to 14 day intervals. Water rate: 3 to 20 gallons/acre.

Ornamentals: 1 to 2 quarts in 100 gallons water (0.625% v/v) as soon as there is sufficient leaf area to obtain thorough coverage. Repeat at 10 to 14 day intervals as necessary. Avoid application during flowering. Spray a maximum of three applications per crop per annum. Note: Do not apply within one month of picking/marketing. Maximum water rate: 20 gallons/acre.

Peaches: Regular applications of 1 to 2 quarts/acre at 7 to 14 day intervals from petal fall to one month before harvest. Note: Final application to be made at least one month before harvest. Under conditions conducive to fruit russet (variety, weather conditions, etc) delay applications until 6 weeks after petal fall. Water rate: 15 to 50 gallons/acre.

Peanuts: 1 to 2 quarts/acre at the 4 to 6 leaf stage. Water rate: 3 to 20 gallons/acre.

Plums: Regular applications of 1 to 2 quarts/acre at 7 to 14 day intervals from petal fall to one month before harvest. Note: Final application to be made at least one month before harvest. Under conditions conducive to fruit russet (variety, weather conditions, etc) delay applications until 6 weeks after petal fall. Water rate: 15 to 50 gallons/acre.

Potatoes: 2 to 3 applications of 1 to 2 quarts/acre commencing at tuber initiation (when 50% of the tip swellings are twice the diameter of the rest of the stolon) and following petiole analysis during tuber bulking with 10 to 14 day intervals between applications. Water rate: 5 to 50 gallons/acre.

Soybean: 1 to 2 quarts/acre at the 4 to 6 leaf stage. Repeat if necessary 10 to 14 days later. Water rate: 3 to 20 gallons/acre.

Squash (Field Grown): Repeat applications of 1 to 2 quarts/acre at 7 day intervals during fruit development up to one month before harvest. Water rate: 20 to 50 gallons/acre.

Sugar Beets: 1 to 2 quarts/acre at 4 to 6 leaf stage. Repeat if necessary at 10 to 14 day intervals. Water rate: 3 to 20 gallons/acre.

Sweet Potatoes: 2 to 3 applications of 1 to 2 quarts/acre commencing at tuber initiation with 10 to 14 day intervals between applications. Water rate: 5 to 50 gallons/acre.

Tobacco: 1 to 2 quarts/acre applied two to three weeks after transplanting (3 to 4 leaf stage) and again 10 days later. Water rate: 3 to 50 gallons/acre.

Tomatoes (Field Grown): Repeat applications of 1 to 2 quarts/acre from the 4 to 6 leaf stage up to one month before harvest. Allow 7 days between applications. Water rate: 5 to 50 gallons/acre.

Turf: 1.5 to 3 ft ozs per 1000 sq ft. as soon as growth commences in spring and/or following identification of need by analysis. Repeat sprays at 10 to 14 day intervals as necessary. Water rate: 0.5 gallons per 1000 sq ft.

Turf: DO NOT APPLY NEAR WATER, STORM DRAINS, OR DRAINAGE DITCHES. DO NOT APPLY IF HEAVY RAIN IS EXPECTED. APPLY THIS PRODUCT ONLY TO YOUR LAWN/GARDEN, AND SWEEP ANY PRODUCT THAT LANDS ON THE DRIVEWAY, SIDEWALK, OR STREET BACK INTO YOUR LAWN/GARDEN.

Turnips: 1 to 2 quarts/acre applied from the 4 to 9 leaf stage. Repeat as necessary at 10 to 14 day intervals until one month before harvest. Water rate: 5 to 50 gallons/acre.

Water Melons (Field Grown): Repeat applications of 1 to 2 quarts/acre at 7 day intervals during fruit development up to one month before harvest. Water rate: 20 to 50 gallons/acre.

Zucchini (Field Grown): Repeat applications of 1 to 2 quarts/acre at 7 day intervals during fruit development up to one month before harvest. Water rate: 20 to 50 gallons/acre.

Sweet Potatoes: 2 to 4 quarts per acre. Apply throughout the season. Repeat at 7 to 10 day intervals as required. Water rate: Use a sufficient water volume to ensure even application (5 gallons per acre minimum).

TANK MIXING/CO-APPLICATION

Read ALL labels carefully and adhere strictly to the instructions for use and advice regarding whether or not product(s) should be co-applied. Many variables can influence the performance of co-applied products and therefore co-application is entirely at the risk of the end-user. It is strongly recommended that a limited application is made initially when using unfamiliar product mixes. Before co-application of products you, or your advisor, must visit www.tankmix.com/elemax for important information or do a jar test.

CONDITIONS OF SALE–LIMITED WARRANTY AND LIMITATIONS OF LIABILITY AND REMEDIES

Read the Conditions of Sale–Warranty and Limitations of Liability and Remedies before using this product. If the terms are not acceptable, return the product, unopened, and the full purchase price will be refunded.

This label is believed to be reliable and must be followed carefully. Injury to the crop to which the product is applied may result from the occurrence of extraordinary or unusual weather conditions or the failure to follow the label directions or good application practices, all of which are beyond the control of Helena Chemical Company (the "Company") or seller. In addition, failure to follow label directions may cause injury to crops, animals, man or the environment. The Company warrants that this product conforms to the chemical description on the label and is reasonably fit for the purpose referred to subject to the factors noted above which are beyond the control of the Company. The Company makes no other warranties or representations of any kind, express or implied, concerning the product, including any implied warranty of merchantability or fitness for any particular purpose, and no such warranty shall be implied by law.

The exclusive remedy against the Company for any cause of action relating to the handling or use of this product shall be limited to, at Helena Chemical Company’s election, one of the following:
1. Refund of the purchase price paid by buyer or user for product bought, or
2. Replacement of the product used
To the extent allowed by law, the Company shall not be liable and any and all claims against the Company are waived for special, indirect, incidental, or consequential damages or expense of any nature, including, but not limited to, loss of profits or income. The Company and the seller offer this product and the buyer and user accept it, subject to the foregoing conditions of sale and limitation of warranty, liability and remedies.
