SUPPLEMENTAL LABEL

Extra Credit® 5
Systemic Herbicide

EPA Reg. No. 71368-43
01-11-2010

LABEL REVISIONS: Revised Glyphosate Drift Warning Statement, Revised Roundup Ready Crop Warning Statements and Add Use Instructions for Roundup Ready Alfalfa

READ AND FOLLOW THE ENTIRE LABEL BOOKLET FOR THIS PRODUCT BEFORE PROCEEDING WITH THE USE DIRECTIONS CONTAINED IN THIS SUPPLEMENTAL LABELING.

“Label” as used in this supplemental labeling refers to the label booklet for this product and this supplemental.

DIRECTIONS FOR USE
IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN ANY MANNER INCONSISTENT WITH ITS LABELING.
This label must be in the possession of the user at the time of application.
Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

ALL APPLICABLE DIRECTIONS, RESTRICTIONS AND PRECAUTIONS IN THE PRODUCT LABEL BOOKLET MUST BE FOLLOWED, INCLUDING STATEMENTS PERTAINING TO THE WORKER PROTECTION STANDARDS, ON THE EPA REGISTERED LABEL.

ATTENTION
AVOID DRIFT. EXTREME CARE MUST BE USED WHEN APPLYING THIS HERBICIDE TO PREVENT INJURY TO DESIRABLE PLANTS AND CROPS. This product may kill, seriously injure or reduce yields of many desirable forms of vegetation including flowers, fruits, grapes, tomatoes, ornamentals, vegetables, cotton, soybeans, tobacco, beans and other desirable nontarget plants including, where applicable, target crop species not containing a glyphosate tolerant gene. Minute quantities of spray may cause severe plant response. Read and follow Spray Drift Management section of label. It is suggested to use a smoke generator or other means at or near the application site for the detection of air movement, air stability, or temperature inversions.

Note: Use of this product in any manner not consistent with this label may result in injury to persons, animals or crops, or other unintended consequences. When not in use, keep container closed to prevent spills and contamination.

ROUNDUP READY® CROPS
The following instructions or those separately published on Nufarm [manufacturer] supplemental labeling include all applications which can be made onto the specified Roundup Ready crops during the complete cropping season. DO NOT combine these instructions with other instructions for crops that do not contain a Roundup Ready gene listed on the label. USE THIS PRODUCT FOR POSTEMERGENCE APPLICATION ONLY ON CROP VARIETIES DESIGNATED AS CONTAINING A ROUNDUP READY GENE.

Applying this product to crop varieties that are not designated as Roundup Ready will result in severe crop injury and yield loss. Avoid contact with foliage, green stems, or fruit of crops, or any desirable plants that do not contain a Roundup Ready gene, since severe injury or destruction will result.
The Roundup Ready designation indicates that the crop variety contains a patented gene that provides
tolerance to this product. Information on Roundup Ready crop varieties may be obtained from your seed
supplier. Roundup Ready crop varieties must be purchased from an authorized licensed seed supplier.

**For Ground Applications:** Use the required rates of this product in 5 to 20 gallons of spray solution per
acre as a broadcast spray. Carefully select correct nozzles and spray pressure to avoid spraying a fine
mist. Check for even distribution of spray droplets.

**For aerial applications:** Use the required rates of this product in 3 to 15 gallons of spray solution per
acre. See “Application Equipment and Techniques” section of this label for procedures to avoid spray drift
that may cause injury to any vegetation not intended for treatment. Use of appropriate buffer zones will
help prevent injury to adjacent vegetation.

**AVOID DRIFT. EXTREME CARE MUST BE USED WHEN APPLYING THIS PRODUCT TO PREVENT
INJURY TO DESIRABLE PLANTS AND CROPS WHICH DO NOT CONTAIN THE ROUNDUP READY
GENE.**

See the "Mixing, Additives and Application Instructions" sections of the label for additional directions and
restrictions on the application of this product.

Tank mixtures with other herbicides, insecticides, fungicides, micronutrients or foliar fertilizers may result
in reduced weed control or crop injury and are NOT for over-the-top applications of this product unless
otherwise noted on this product label, supplemental labeling or fact sheets published separately.

Ammonium sulfate may be mixed with this product for applications to Roundup Ready crops. Refer to the
“Mixing” section for use instructions for ammonium sulfate.

**Sprayer Preparation:** It is important that sprayer and mixing equipment be clean and free of pesticide
residue before making applications of this product. Follow the cleaning procedures specified on the label
of the product(s) previously used. THOROUGHLY CLEAN THE SPRAY TANK AND ALL LINES AND
FILTERS TO ELIMINATE POTENTIAL CONTAMINATION FROM OTHER HERBICIDES PRIOR TO
MIXING AND APPLYING THIS PRODUCT.

**Note:** The following directions are based on a clean start at planting by using a burndown application or
tillage to control existing weeds before crop emergence. In no-till and stale seedbed systems, a replant
burndown treatment of this product may be needed to control existing weeds prior to crop emergence.
Some weeds, such as black nightshade, broadleaf signalgrass, sicklepod, Texas panicum, sandbur,
anual morningglory, woolly cupgrass, shattercane, wild proso millet, burcucumber, and giant ragweed
with multiple germination times or suppressed (stunted) weeds may require a second application of this
product for complete control. The second application should be made after some regrowth has occurred
and at least 10 days after a previous application of this product.
ROUNDUP READY ALFALFA

TYPES OF APPLICATIONS: Preplant, At-planting, Preemergence, Post-emergence (In-crop)

USE INSTRUCTIONS: Refer to the following table for the maximum application rates of this product.

<table>
<thead>
<tr>
<th>Maximum Application Rates</th>
</tr>
</thead>
<tbody>
<tr>
<td>Combined total per year for all applications, including Preplant during year of establishment</td>
</tr>
<tr>
<td>Combined total per year for in-crop applications for newly established and established stands</td>
</tr>
<tr>
<td>Preplant, At-Planting and Preemergence single applications</td>
</tr>
</tbody>
</table>

PRECAUTIONS AND RESTRICTIONS: See label for general precautionary instructions for use in Roundup Ready crops. Refer to other applicable sections of the label for more information on Maximum Application Rates.

Preplant, At-Planting, Preemergence
USE INSTRUCTIONS: This product may be applied before, during or after planting Roundup Ready alfalfa.

Postemergence (In-crop)
USE INSTRUCTIONS: Applications of this product may be made over the top of Roundup Ready alfalfa (in-crop) from emergence until 5 days prior to cutting. To maximize crop yield and quality potential of forage and hay, applications of this product should be made after weeds have emerged but before alfalfa growth or re-growth interferes with spray coverage of the target weeds.

Refer to the “Annual Weeds Rate Section” and “Perennial Weeds Rate Section” in the label for specified rates for specific weeds. When applied as directed, this product will control these annual and perennial grasses and broadleaf weeds. In addition to those weeds listed in these sections, this product will suppress or control the parasitic weed Dodder (Cuscuta spp) in Roundup Ready alfalfa. Repeat applications may be necessary for complete control.

New Stand Establishment (Seeding Year): Due to the biology and breeding constraints of alfalfa, up to 10 percent of the seedlings may not contain a Roundup Ready gene and will not survive after the first application of this product. To eliminate the undesirable effects of stand gaps created by this loss of plants, a single application of at least 25 fluid ounces per acre of this product should be applied at or before the 4-trifoliate growth stage. Refer to the following table for application rates during stand establishment (seeding year).

<table>
<thead>
<tr>
<th>NEW STAND ESTABLISHMENT (Seeding Year) Application Rates</th>
</tr>
</thead>
<tbody>
<tr>
<td>Prior to First Cutting</td>
</tr>
<tr>
<td>From emergence up to 4 trifoliate leaves</td>
</tr>
<tr>
<td>From 5 trifoliate leaves before first cutting</td>
</tr>
<tr>
<td>After First Cutting</td>
</tr>
<tr>
<td>In-crop application, per cutting up to 5 days before cutting</td>
</tr>
</tbody>
</table>

Established Stands (Non-seeding Year): Refer to the following table for directions and application rates for in-crop applications to established stands of alfalfa non-seeding year.
ESTABLISHMENT (Non-Seeding Year)

Application Rates

| In-crop applications, per cutting, up to 5 days before cutting | Up to 51 fluid ounces per acre |

PRECAUTIONS, RESTRICTIONS: Where Roundup Ready alfalfa is grown with a companion or cover crop, or is overseeded with a second species, in-crop (over-the-top) applications of this product will eliminate the non-Roundup Ready (non-glyphosate tolerant) species. Any single in-crop application of this product should not exceed 51 fluid ounces per acre. Sequential applications of this product should be at least 7 days apart. The combined total per year for all in-crop applications in both newly established (seeding year) and established stands (non-seeding year) must not exceed 4.8 quarts (153 fluid ounces) per acre. Remove domestic livestock before application. Wait a minimum of 5 days after last application before grazing, or cutting and feeding of forage and hay.

NOTICE

Read the "WARRANTY DISCLAIMER" and "LIMITATION OF LIABILITY" in the label booklet for this product before using this product. Those terms apply to this supplemental labeling and if those terms are not acceptable, return the product unopened at once.
