GENERAL INFORMATION
FertiClear™ MKP is a full water-soluble mono-potassium phosphate fertilizer, a highly efficient source of phosphorus and potassium for plants. MKP contains no nitrogen, which is ideal when nitrogen fertilization should be limited. The application of FertiClear™ MKP at the productive stages of sugar-rich fruit crops helps increase sugar content as well as improvement in the quality of the crops. FertiClear™ MKP is also highly pure and fully water soluble, making it an ideal fertilizer for fertigation and/or foliar application. It is also suitable for fertilizer blends as well as production of liquid fertilizers. FertiClear™ MKP is a safe product in open field for humans and plants.

DIRECTIONS FOR USE
FertiClear™ MKP is recommended for application at the beginning of growth season, when phosphorus availability is crucial for early establishment of the root system. FertiClear™ MKP can be applied through any irrigation system and on any growth medium. It can be diluted at 1.77 pounds of MKP to one gallon of water at 68°F.

SOIL APPLICATION
Field and Row Crops: Use 5 to 10 pounds per acre in 50 to 100 gallons of water. Consult your Mar Vista Representative and soil test for specific recommendations.

FOLIAR APPLICATION
Tree Crops: Apply in delayed dormant, pre-bloom, and post-bloom sprays at 3 to 5 pounds per 100 gallons of dilute sprays. Apply 10 to 15 pounds per acre in concentrate sprays. Grapes: Ground sprays: Use 5 to 10 pounds per acre in 50 to 100 gallons of water. Aerial application: Use 5 to 8 pounds per acre in 10 gallons of water. Multiple applications recommended from emergence of leaves to fruit set.

COMPATIBILITY
FertiClear™ MKP is compatible with most water-soluble fertilizers in common use. It should not be mixed with calcium or magnesium fertilizers for tank mixing. To apply in combination with calcium or magnesium fertilizers, use two tanks or apply those fertilizers at different times.Trace elements of Fe, Zn, Cu and Mn are only workable in a mix when they are chelated. Use in accordance with recommendations of a qualified individual or institution such as, but not limited to, a certified crop advisor, agronomist, university crop extension publication, or apply according to recommendations in your approved nutrient management plan. When tanks mixing other products, “Jar Test” proportionally mix components to confirm compatibility.

DISCLAIMER OF WARRANTIES
Mar Vista Resources, LLC (Seller) warrants that the chemical composition of this product conforms to the description given on the label. THIS WARRANTLY IS EXPRESSLY IN LIEU OF ALL OTHER WARRANTIES AND REPRESENTATIONS EXPRESSED, IMPLIED OR STATUTORY, INCLUDING WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR USE. Buyer further agrees in the event of damages arising from the use of this product to accept a replacement of the product or a refund of the purchase price of the products, at Buyer’s options, as full discharge of Seller’s liability. No one is authorized to make any other warranty, guarantee or directions concerning this product, and no such warranties, guarantees or directions shall be valid or binding upon Seller.
