Water Conditioning Agent/ pH Adjuster for Glyphosate

PRINCIPAL FUNCTIONING AGENTS
Monocarbamide dihydrogen sulfate, tallow amine ethoxide, polyoxyethylene triecyl ether phosphate.............82%
Constituents Ineffective as Spray Adjuvants ....................... 18%
Total ........................................................................100%
All ingredients are approved for use under 40 CFR 180
WA Reg. No. 9349-14001

KEEP OUT OF REACH OF CHILDREN
DANGER / PELIGRO. CORROSIVE.
Si usted no entiende la etiqueta, busque a alguien para que le explique lo que se explica en detalle. (If you do not understand the label, find someone to explain it to you in detail.)

PRECAUTIONARY STATEMENTS
May be corrosive to metals. Harmful if swallowed. May be fatal if swallowed and enters airways. Causes skin irritation and serious eye irritation. If medical advice is needed, have product container or label at hand. Read label before use. Keep only in original packaging. Wash protective equipment and work clothes thoroughly after handling. Do not eat, drink or smoke when using this product. Wear protective gloves and eye protection. Specific treatment is given in the First Aid section on this label or on the SDS. Store in a corrosion resistant container with a resistant inner liner. Dispose of contents/container to disposal plant in accordance with federal, state and local regulations.

PERSONAL PROTECTIVE EQUIPMENT (PPE)
Applicators or other handlers of this product must wear chemical safety goggles or face shield, chemical resistant gloves, coveralls worn over long-sleeved shirt, long pants, socks and chemical resistant footwear when handling this product. When mixing and loading wear a chemical-resistant apron. Wear air purifying mask with appropriate canister when long-sleeved shirt, long pants, socks and chemical resistant footwear when handling this product. When mixing and loading wear a chemical-resistant apron. Wear air purifying mask with appropriate canister when used in a non-ventilated area. Consult the SDS for further information.

FIRST AID
If Swallowed: Call a POISON CENTER/doctor or Chemtrec if person feels unwell. Do not induce vomiting. Give person plenty of water to drink. Rinse mouth.
If In Eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical attention or advice.
If On Skin: Wash with plenty of water. Treat symptomatically. If skin irritation occurs: Get medical advice or attention. Take off contaminated clothing and wash it before reuse.
If Inhaled: Immediately move person to fresh air. Start artificial respiration if necessary. Oxygen may be administered. Call a physician.

GENERAL INFORMATION
IMPORT is a specialized utility modifier that acts as a pH adjuster and water conditioner with built in compatibility agents that widen the conditions under which glyphosate and other weak acid herbicides can be applied. IMPORT maintains the integrity of the spray diluent (water) and protects herbicides from deactivation by hard water cations and micronutrient based tank mix partners.

FOR USE WITH PESTICIDES REGISTERED FOR AGRICULTURAL, FORESTRY, INDUSTRIAL, MUNICIPAL, NON-CROPLAND, RIGHTS-OF-WAY AND OTHER APPROPRIATE USES. NOT FOR AQUATIC USE.

DIRECTIONS FOR USE
Always mix and apply this product in accordance with the instructions found on the pesticide label regarding adjuvants. In the absence of specific instructions follow the application and mixing guidelines below.

USE RATES
Using the guidelines below, apply IMPORT at 1–4 quarts per 100 gallons of spray solution (1–4 liters per 400 liters of spray solution) or 0.25–1.0% v/v.

0.25–0.5% v/v use rates:
• When replacing 8.5 lbs of ammonium sulfate per 100 gallons of spray solution.
• When used as an ammonium sulfate replacement for “loaded” glyphosate herbicides.

0.5–1.0% v/v use rates:
• When replacing 17 lbs of ammonium sulfate per 100 gallons of spray solution.
• When used as an ammonium sulfate replacement for “unloaded” glyphosate herbicides.

1% v/v use rate:
• When tank mixing with micronutrients, apply up to 2.5 lb. per acre of manganese sulfate. In a manganese and zinc sulfate combination, apply up to a total of 2 lb. per acre in a 3 to 1 (Mn:Zn) ratio.

MIXING
In the absence of specific mixing instructions found on the pesticide label, fill the spray tank with at least 50% of the desired finished carrier volume. When premixing in a mixing vessel or inducer, fill with at least 20% of the desired finished carrier volume. While the carrier is agitating, add tank mix ingredients in the following order:
1. Compatibility agent and/or antifoam, if needed
2. AMS, dry formulations (WP, DF, WDG, SP), and dry drift retardants
3. Dry soluble and suspension fertilizers / micronutrients
4. Liquid drift retardants and flowable formulations (F & FL)
5. Liquid concentrates, suspension concentrates, microencapsulated and capsule suspension (LC, SC, ME, CS)
6. Emulsifiable concentrates (E, EL or EC)
7. Solutions and soluble liquids (S or SL)
8. Liquid micronutrients and fertilizers
9. Water conditioners and other adjuvants (COC, HSO, MSO, NIS)
10. Finish filling to desired spray volume level and continue agitation

STORAGE AND DISPOSAL
This product must be stored above 32°F (0°C). Failure to do so will cause irreversible damage and render the product unfit for use. Keep containers sealed when not in use. Store in original container only. Do not reuse empty container. Triple rinse (or equivalent) during mixing and loading. Recycling decontaminated containers is the best option of container disposal. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. To contact your state and local ACRC recycler visit the ACRC web page at www.acrecycle.org. Decontaminated containers and materials must be disposed of in a manner allowed by local, state and federal laws and regulations.

CONDITIONS OF SALE
Note: Read the information contained herein before buying or using this product. If the stated terms are not acceptable, return the product at once, unopened. It is critical that this product be used and mixed only as specified on this label. Neither the manufacturer nor the seller makes any representation or warranty, expressed or implied, with respect to the results from the use of this material. Buyer and user assume all risks of use and handling. Precision Laboratories, LLC warrants that this material is reasonably fit for use as specified on this label. No agent or representative is authorized to make any other representations concerning this material. Unforeseen factors beyond Precision’s control prevent elimination of risks in connection with the use of its chemicals. Such risks include, but are not limited to, damage to plants and/or crops to which the material is applied, or lack of complete control and damage caused by drift to other plants or crops. Such risks may occur even though the product is reasonably fit for use as stated herein and even though label directions are followed. Follow directions carefully. Timing, mixture, method of application, weather and other conditions are influencing factors in the use of this product and are beyond the control of the seller. Except to the extent prohibited by applicable law, the exclusive remedy of the user or buyer and the limit of liability of the company or any other seller for any and all losses, personal injuries or damages resulting from the use of this product, shall be the purchase price paid by the user or buyer for the quantity of product involved.
