For MEDICAL, TRANSPORTATION or other EMERGENCY call: 1-800-334-7577 (24 hours/day)
For Product Information call: 1-866-99BAYER (1-866-992-2937)

SECTION 2. HAZARDS IDENTIFICATION

NOTE: Please refer to Section 11 for detailed toxicological information.

Emergency Overview
Caution! Harmful if swallowed, inhaled or absorbed through the skin. Avoid contact with skin, eyes and clothing. Avoid breathing spray mist. Remove and wash contaminated clothing before re-use.

Physical State
suspension

Odor
characteristic

Appearance
white to beige

Exposure routes
Ingestion, Inhalation, Skin contact

Immediate Effects

Eye
May cause eye irritation. Avoid contact with eyes.

skin
Harmful if absorbed through skin. Avoid contact with skin and clothing.

Ingestion
Harmful if swallowed. Do not take internally.

Inhalation
Harmful if inhaled. Avoid breathing spray mist.

Chronic or Delayed
Long-Term
This product or its components may have target organ effects. This product or its components may have long term (chronic) health effects.
Potential Environmental Effect
Toxic to fish and aquatic invertebrates. This product may impact surface water quality due to runoff.

SECTION 3. COMPOSITION/INFORMATION ON INGREDIENTS

SECTION 4. FIRST AID MEASURES

General
When possible, have the product container or label with you when calling a poison control center or doctor or going for treatment.

Eye
Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a physician or poison control center immediately.

Skin
Take off contaminated clothing and shoes immediately. Wash off immediately with plenty of water for at least 15 minutes. Call a physician or poison control center immediately.

Ingestion
Call a physician or poison control center immediately. Rinse out mouth and give water in small sips to drink. DO NOT induce vomiting unless directed to do so by a physician or poison control center. Never give anything by mouth to an unconscious person. Do not leave victim unattended.

Inhalation
Move to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a physician or poison control center immediately.

Notes to physician Treatment
Appropriate supportive and symptomatic treatment as indicated by the patient's condition is recommended. There is no specific antidote.

SECTION 5. FIRE FIGHTING MEASURES

Flash point
No flash point - Determination conducted up to the boiling point.

Autoignition temperature
560 °C / 1040 °F

Lower Flammability Limit
no data available
Upper Flammability Limit: no data available

Explosiveness: Not explosive

92/69/EEC, A.14 / OECD 113

Fire and Explosion Hazards:
In the event of fire the following may be released:
- Hydrogen cyanide (hydrocyanic acid)
- Carbon monoxide (CO)
- Nitrogen oxides (NOx)

Suitable extinguishing media:
Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide.

Unsuitable extinguishing media:
High volume water jet

Fire Fighting Instructions:
Contain the spread of the fire-fighting media. Do not allow run-off from fire fighting to enter drains or water courses.

In the event of fire and/or explosion do not breathe fumes. In the event of fire, wear self-contained breathing apparatus.

SECTION 6. ACCIDENTAL RELEASE MEASURES

Personal precautions:
Keep unauthorized people away. Isolate hazard area. Avoid contact with spilled product or contaminated surfaces.

Methods for cleaning up:
Soak up with inert absorbent material (e.g. sand, silica gel, acid binder, universal binder, sawdust). Collect and transfer the product into a properly labelled and tightly closed container. Clean contaminated floors and objects thoroughly, observing environmental regulations.

Additional advice:
Use personal protective equipment. Do not allow to enter soil, waterways or waste water canal.

SECTION 7. HANDLING AND STORAGE

Handling procedures:
Use only in area provided with appropriate exhaust ventilation.

No special precautions required.

Storing Procedures:
Store in a cool, dry place and in such a manner as to prevent cross contamination with other crop protection products, fertilizers, food, and feed. Store in original container and out of the reach of children, preferably in a locked storage area. Protect from freezing.

Keep away from food, drink and animal feedingstuffs.
Work/Hygienic Procedures
Avoid contact with skin, eyes and clothing. Keep working clothes separately. Wash hands before breaks and immediately after handling the product. Wash hands immediately after work, if necessary take a shower. Remove soiled clothing immediately and clean thoroughly before using again. Garments that cannot be cleaned must be destroyed (burnt).

SECTION 8. EXPOSURE CONTROLS / PERSONAL PROTECTION

General Protection
Train employees in safe use of the product. Follow all label instructions. Follow manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions for washables, use detergent and warm/tepid water. Keep and wash PPE separately from other laundry.

Eye/ Face Protection
Safety glasses with side-shields

Hand protection
Chemical resistant nitrile rubber gloves

Body Protection
Wear long-sleeved shirt and long pants and shoes plus socks.

Respiratory protection
When respirators are required, select NIOSH approved equipment based on actual or potential airborne concentrations and in accordance with the appropriate regulatory standards and/or industry recommendations.

SECTION 9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance white to beige
Physical State suspension
Odor characteristic
pH 5.0 - 9.0 (100 %) at 23 °C
Vapor Pressure no data available
Vapor Density (Air = 1)  no data available

Density  ca. 1.11 g/cm³ at 20 °C

Evaporation rate  no data available

Boiling Point  no data available

Melting / Freezing Point  no data available

Water solubility  no data available

Minimum Ignition Energy  no data available

Partition coefficient: n-octanol/water  no data available

Viscosity  150 - 300 mPa.s at 20 °C
Velocity gradient 20 /s

SECTION 10. STABILITY AND REACTIVITY

Conditions to avoid  no data available

Incompatibility  no data available

Hazardous Decomposition Products  Thermal decomposition can lead to release of:
Nitrogen oxides (NOx)
Hydrogen cyanide (hydrocyanic acid)
Carbon monoxide

Hazardous reactions  No hazardous reactions when stored and handled according to prescribed instructions.

Chemical Stability  Stable under recommended storage conditions.

SECTION 11. TOXICOLOGICAL INFORMATION

Only acute toxicity studies have been performed on the formulated product. The non-acute information pertains to the technical-grade active ingredients, fluopyram and pyrimethanil.

Acute oral toxicity  rat: LD50: > 2,000 mg/kg
Acute dermal toxicity  
rat: LD50: > 2,000 mg/kg

Acute inhalation toxicity  
rat: LC50: > 1.973 mg/l  
Exposure time: 4 h  
Determined in the form of liquid aerosol.  
Highest attainable concentration.  
rat: LC50: > 8.0 mg/l  
Exposure time: 1 h  
Determined in the form of liquid aerosol.  
Extrapolated from the 4 hr LC50.

Skin irritation  
rabbit: No skin irritation

Eye irritation  
rabbit: No eye irritation

Sensitisation  
mouse: Non-sensitizing.  
OECD Test Guideline 429, local lymph node assay (LLNA)

Chronic toxicity  
Fluopyram caused specific target organ toxicity in the liver in experimental animal studies. The effect is due to an overwhelmed metabolic capacity of the liver at high dose levels.

Pyrimethanil did not cause any significant specific adverse effects or target organ toxicity in subchronic toxicity studies.

Assessment Carcinogenicity  
Fluopyram caused an increased incidence of tumours in the liver of rats at high dose levels.  
Fluopyram caused an increased incidence of tumours in the thyroid of mice. The tumours seen with Fluopyram were caused through a non-genotoxic mechanism, which is not relevant at low doses. The mechanism that triggers tumours in rodents and the type of tumours observed are not relevant to humans.  
Pyrimethanil was not carcinogenic in lifetime feeding studies in mice. Pyrimethanil caused an increased incidence of tumours in the thyroid of rats at high dose levels. The mechanism that triggers tumours in rodents and the type of tumours observed are not relevant to humans.

ACGIH  
None.

NTP  
None.

IARC  
None.

OSHA  
None.

Reproductive toxicity  
Fluopyram caused reproduction toxicity in a two-generation study in rats only at dose levels also toxic to the parent animals. The reproduction toxicity seen with Fluopyram is related to general toxicity.
Pyrimethanil did not cause reproductive toxicity in a two-generation study in rats.

**Developmental Toxicity**
Fluopyram caused developmental toxicity only at dose levels toxic to the dams. The developmental effects seen with Fluopyram are related to maternal toxicity.
Pyrimethanil did not cause developmental toxicity in rats and rabbits.

**Mutagenicity**
Fluopyram was not mutagenic or genotoxic in a battery of in vitro and in vivo tests.
Pyrimethanil was not mutagenic or genotoxic in a battery of in vitro and in vivo tests.

---

**SECTION 12. ECOLOGICAL INFORMATION**

**Toxicity to fish**
Rainbow trout (Oncorhynchus mykiss)
LC50: 10.56 mg/l
Exposure time: 96 h
The value mentioned relates to the active ingredient pyrimethanil.

Rainbow trout (Oncorhynchus mykiss)
LC50: > 2 mg/l
Exposure time: 96 h
The value mentioned relates to the active ingredient fluopyram.
No acute toxicity was observed at its limit of water solubility.

**Toxicity to aquatic plants**
Pseudokirchneriella subcapitata
Growth rate
EC50: 8.9 mg/l
Exposure time: 72 h
The value mentioned relates to the active ingredient fluopyram.

Pseudokirchneriella subcapitata
IC50: 1.2 mg/l
Exposure time: 96 h
The value mentioned relates to the active ingredient pyrimethanil.

**Acute Toxicity to Aquatic Invertebrates**
Water flea (Daphnia magna)
EC50: 2.9 mg/l
Exposure time: 48 h
The value mentioned relates to the active ingredient pyrimethanil.

Water flea (Daphnia magna)
EC50: > 20 mg/l
Exposure time: 48 h
The value mentioned relates to the active ingredient fluopyram.
No acute toxicity was observed at its limit of water solubility.
Environmental precautions

Do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate surface or ground water by cleaning equipment or disposal of wastes, including equipment wash water. Do not apply when weather conditions favor runoff or drift. Drift and runoff from treated areas may be hazardous to aquatic organisms in adjacent sites. Apply this product as specified on the label.

SECTION 13. DISPOSAL CONSIDERATIONS

General Disposal Guidance

Pesticide wastes may be toxic. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

Container Disposal

Not completely emptied packagings should be disposed of as hazardous waste.

RCRA Information

Characterization and proper disposal of this material as a special or hazardous waste is dependent upon Federal, State and local laws and are the user’s responsibility. RCRA classification may apply.

SECTION 14. TRANSPORT INFORMATION

49CFR

Not dangerous goods / not hazardous material
