**FERTILIZER ADDITIVE FOR NITROGEN STABILIZATION**

**ACTIVE INGREDIENT:** 26.7% N-(n-butyl) thiophosphoric triamide (NBPT)

**CAS No:** 94317-64-3

**KEEP OUT OF REACH OF CHILDREN**

**WARNING**

INNVICTIS CROP CARE, LLC warrants only that this product conforms to the product description on the label and is reasonably fit for the purposes stated in the Directions For Use. The Directions for Use of this product are believed to be adequate and must be followed carefully. It is, however, impossible to eliminate all risks associated with this product. Crop injury, ineffectiveness, or other uninsured consequences may result due to factors such as weather conditions, presence or absence of other materials, or the manner of use or application, all of which are beyond the control of INNVICTIS CROP CARE, LLC. All such risks must be assumed by the buyer or user. Except as warranted on the label, INNVICTIS CROP CARE, LLC makes no representation, warranty or guarantee, whether express or implied, including, but not limited to, warranty of merchantability, fitness for a particular purpose, or otherwise. No agent or representative of INNVICTIS CROP CARE, LLC or the seller of the product is authorized to amend the terms of this Warranty declaration or the product’s label to make a representation or recommendation different or inconsistent with the label of this product. To the extent consistent with applicable law, INNVICTIS CROP CARE, LLC’s maximum liability for breach of its warranty or for use of this product, regardless of the form of action, shall not exceed the purchase price of this product. To the extent permitted by applicable law, INNVICTIS CROP CARE, LLC shall not be liable for consequential, special or indirect damages resulting from the use, handling, application, storage, or disposal of this product or for damages in the nature of penalties, and the buyer and the user waive any right that they may have to such damages. If the warranty and liability limitations or disclaimer are not acceptable, return the unopened container to the place of purchase for full refund. To the extent permitted by applicable law, the buyer and the user waive any right that they may have to recover damages for breach of warranty, breach of contract, or the seller’s sales policy for this product.

**DIRECTIONS FOR USE**

**WARNING:** Read the entire label before use. Use according to label directions. Read the entire Warranty declaration and Limitation of Liability before buying or using this product. Always wear proper personal protection, use Neoprene gloves (Ansell Edmont Neox Number 9-912) or equivalent, long sleeves, long pants, and chemical splash goggles when handling N-VEIL Urease Inhibitor.

**GENERAL INFORMATION**

N-VEIL Urease Inhibitor is a fertilizer additive for urea and UAN fertilizers to inhibit the activity of urease enzyme, which results in the reduced loss of ammonia by volatilization when properly applied. The application of N-VEIL Urease Inhibitor is commonly made in conjunction with urea or urea containing fertilizers during pre-plant, side-dress or other surface applications for a wide range of items associated with crop, turf and forestry.

**APPLICATIONS WITH UREA BLENDING**

**Preliminary**

Ensure proper personal protection (see above). Blend area must be well ventilated with large volumes of air exchange. NESHAP/OSHA approved organic/mist respirators may be required if there is insufficient ventilation. Allow adequate temperature and humidity to pass when blending. Extreme variation in urea particle sticking together creating problems with uniform coverage. Small amounts of drying agents may be used at a deemed appropriate for local conditions; use of such products is based upon the blenders experience with such items.

**Equipment**

Fertilizer blender or other blending device suitable for uniform blending of urea with the N-VEIL Urease Inhibitor. Accurately weigh all materials in the blend formula. Ensure that all surfaces of the blender and contact with materials are dry and rust free. N-VEIL Urease Inhibitor is supplied as a 26.7% by weight active ingredient solution.

**Procedure**

App. 1.0-1.5 lb A/Tone to be blended with the urea before introducing other fertilizer components. Note: treated urea can be stored up to six weeks without degradation.

**N-VEIL USE RATE**

General recommendations based on standard industry conditions as follows:

1. Soil pH - Values less than 7.0 pose risk of higher potential for volatility
2. Urea. Control Height - 0.75 inches of rain or irrigation are required to move urea into the soil.
3. Residue Level - Residues in excess of 30% contain higher levels of urea and higher volatility can be expected. Days of control based on average conditions of pH 7.0 and 30% residue level.
