DIRECTIONS FOR USE

NResponse™ can be used anywhere nitrogen is recommended. It is specially formulated to allow for foliar sprays and planter time applications.

NResponse can be applied:

- by planter placement in a band away from the seed (ex: 2" x 2")
- as a topdress or sidedress application
- as part of a foliar fertility program
- through fertigation

If applied with other crop production or protection products, please consult your AgroLiquid representative for the best application method.

Directions For Use General Guideline:

For proper agronomic application rates suitable for your geographical area or the maximum allowable non-nutrient application rate per acre, consult a trained soil specialist at AgroLiquid or call or write to AgroLiquid with the address provided.

NResponse™ performs well on all crops. This premium nitrogen product provides more flexibility in application than other nitrogen fertilizers. Specifically formulated for effective foliar and soil applications, NResponse is quickly assimilated into the crop, providing a fast nitrogen response. It contains the same dynamic forms of nitrogen found in other AgroLiquid nitrogen products. NResponse has proven, in situations where a quick nitrogen response is needed, to improve yields and quality compared to conventional nitrogen sources.
