

**FIFRA 24 (c) Special Local Need  
FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF ARIZONA**

**For Use on Cotton at a Higher Rate**

**This label is valid until December 31, 2023 or until otherwise amended, withdrawn, cancelled or suspended.**

**ACTIVE INGREDIENT: By Wt.**

Acetamiprid: (E)- N1 -[(6-chloro-3-pyridyl)methyl]-N2-cyano-N1-methyl acetamidine.....70.0%

**OTHER INGREDIENTS:** ..... 30.0%

**TOTAL:**..... 100.0%

**EPA Reg. No. 91234-15-5905**

**EPA SLN No. AZ-180001**

**DIRECTIONS FOR USE**

- It is a violation of Federal law to use this product in any manner inconsistent with its labeling.
- This state-specific Section 24(c) labeling must be in the possession of the user at the time of pesticide application.
- Read the "Limitation of Warranty and Liability" in the label booklet for Omni Brand Acetamiprid 70WP Insecticide before using.
- Follow all applicable directions, restrictions, and precautions on the EPA registered label for EPA Reg. No. 91234-15-5905.

PEST	APPLICATION USE RATE	USE INSTRUCTIONS
<b>Whitefly</b>	2.3 - 3.5 ozs. /A	Make applications when adult whiteflies first appear and before the development of nymphs. Apply prior to the establishment of heavy infestation. Do not apply more than 9.2 ounces (0.4 lbs. a.i.) per acre per calendar year of this product nor exceed 4 applications per calendar year. Apply in a minimum finished spray volume of 5 gals. per acre by aircraft and 15 gals. per acre by ground. The tendency for resistance development in whiteflies has been observed. To reduce the potential for resistance, rotate applications of this product with insecticides that have a different mode of action. Foliar absorption may be affected after cutout which could affect whitefly control. For best results after cutout, use a penetrating adjuvant (including oils) to increase contact or absorption.
<b>USE RESTRICTIONS</b>		
<ul style="list-style-type: none"> <li>• Do NOT apply this product more than 4 times per acre per calendar year regardless of application method.</li> <li>• Do NOT apply more than once every 7 days.</li> <li>• Pre-Harvest Interval (PHI) = 28 days</li> <li>• Do NOT apply more than 9.2 ounces (0.4 lbs. a.i.) per acre per calendar year regardless of application method.</li> </ul>		

**PRECAUTIONS:**

**ENVIRONMENTAL HAZARDS**

This product is toxic to birds and aquatic invertebrates. This product is toxic to bees exposed to direct treatment. Do not apply this product while bees are foraging in the treatment area. Do not apply directly to water, or to areas where surface water is present, or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwater or rinsate. Do not contaminate water used for irrigation or domestic purposes. Avoid accidental or intentional application of this product to ditches, swales, drainage ways or impervious surfaces such as driveways.

**THREATENED AND ENDANGERED SPECIES**

Special local need labels are important to states where economic loss due to economic pest problems can occur. Product stewardship is an important labeling process that must take into consideration potential off-target effects of any pesticide use in Arizona. This includes potential harm to threatened or endangered species in Arizona. Care must be taken to consider the use of the pesticide and obtain any information that will help minimize application impact on endangered species.
