USE PRECAUTIONS

DIRECTIONS FOR USE

NOT FOR AQUATIC USE

NOTE: This product is extremely concentrated and effective in mixing as low as 1 oz. Per 100 gallons. Start with lower dosage and increase as needed. A thickened or "stringy" solution indicates that too much POINTBLANK® has been used.

- Step 1. Select correct dosage from chart below.
- Step 2. Fill mix tank with water, pesticide and other additives and begin to agitate.
- Step 3. SHAKE POINTBLANK® BOTTLE WELL BEFORE USING.
- Step 4. For best mixing results, either (1) inject POINTBLANK® liquid into the suction side of the feeder or recirculating pump to obtain adequate dispersion of the polymer throughout the pesticide solution, or (2) slowly add POINTBLANK® liquid to the rapidly agitating tank mix in the area of highest turbulence by pouring a very thin stream.
- Step 5. Continue to agitate mix tank for at least 2 minutes before spraying.
- Step 6. Follow all cleanup precautions on label of pesticide used. Follow governmental procedures for disposal of pesticide spray solution.
