Prozap® Mole & Gopher Pelleted Bait
Kills Moles* and Gophers
For Control of Pocket Gophers and Moles* in Below-Ground Applications Only.
Intended for Residential Use
Do Not Sell In Individual Containers Containing More Than 1 Pound of Product.
*Not Approved for this Use Pattern in the Following States:
California, Hawaii, New Hampshire, and Indiana.
For use only against the eastern mole (Scalopus aquaticus) and the hairy-tailed mole (Parascalops breweri) in North Carolina. Not for use against the star-nosed mole (Condylura cristata) in North Carolina. Not for use against gophers in North Carolina.

ACTIVE INGREDIENT:
Zinc Phosphide ..............................................................2.0%
OTHER INGREDIENTS: .....................................................98.0%
Total.................................................................100.0%

KEEP OUT OF REACH OF CHILDREN
CAUTION

FIRST AID
HAVE PRODUCT LABEL WHEN OBTAINING TREATMENT ADVICE
Any person applying zinc phosphide products and experiencing signs and symptoms such as nausea, abdominal pain, tightness in the chest, or weakness, needs to be seen by a physician immediately.

TREATMENT FOR PET POISONING: If animal eats bait, call veterinarian at once.

NOTE TO PHYSICIAN OR VETERINARIAN: Contains the Phosphine-producing active Zinc Phosphide. Probable mucosal damage may contraindicate the use of gastric lavage. For animals ingesting bait and/or showing poisoning signs, induce vomiting by using hydrogen peroxide. Sodium bicarbonate can be given orally to neutralize the stomach acidity. The stomach and intestinal tract can be evacuated, oxygen administered and cardiac and circulatory stimulants given.

For 24-hour emergency information on this product, call 1-800-498-5743 (US & Canada) or 1-651-523-0318 (all other areas).

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
CAUTION: Harmful if swallowed, absorbed through skin, or inhaled. Avoid breathing dust. Avoid contact with skin or clothing. Wear pants, shoes, socks, and barrier laminate gloves. Wash hands thoroughly with soap and water before eating, drinking, and chewing gum, using tobacco or using the toilet. Remove contaminated clothing and wash clothing before reuse. Any person who retrieves carcasses or unused bait following application of this product must wear barrier laminate gloves.

ENVIRONMENTAL HAZARDS
This product is extremely toxic to birds, fish and other wildlife. Wildlife feeding on treated bait may be killed. Dogs, cats and other predatory and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten this bait. Do not apply directly to water.

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ THIS LABEL: Read this entire label and follow all use directions, use restrictions and precautions.

not approved for the control of Moles in the following states: California, Hawaii, Indiana, and New Hampshire
For use only against the eastern mole (Scalopus aquaticus) and the hairy-tailed mole (Parascalops breweri) in North Carolina. Not for use against the star-nosed mole (Condylura cristata) in North Carolina. Not for use against gophers in North Carolina.
USE RESTRICTIONS:
- This product may only be applied at the use sites and by the application methods indicated on this label.
- Bait must be applied directly into mole and pocket gopher burrow systems.
- Any person who retrieves carcasses or unused bait following application of this product must wear barrier laminate gloves.
- This product may only be used to control moles and pocket gophers in manual below ground applications.
- Do not apply in gardens where food or feed may become contaminated.
- Do not apply this product by use of an artificial burrow builder.
- Do not use this product for sod production.

Lawns

Specific Directions for Moles: The presence of moles may be indicated by a network of surface ridges in the turf, by a series of conical mounds of earth pushed up from deep burrows, or by damage to flower bulbs.

Surface Ridges: Prior to treatment, determine which burrows are active according to one of the following two methods. Either press down a small section of the tunnel or remove a one inch section of the tunnel’s roof. Mark these sections and recheck in 24 hours. The burrow is considered active if the flattened runway has been raised up or if the roof has been repaired. Only treat active burrows. Carefully, with a long-handled spoon, punch a hole in the top of each active tunnel, insert a teaspoon amount of this product and carefully close the hole with sod or stone. Do not collapse the runway again or allow loose soil to cover the bait. After a few days, check to see if the burrows are still active according to one of the two methods described above. If so, repeat treatment.

Conical Mounds: With a long handled spoon, carefully remove the center plug from each conical mound. Drop a teaspoon amount of this product into the underground tunnel. Close the opening with a rock or sod. Do not allow loose dirt to cover bait. If mole activity persists after one treatment, a second treatment may be made. If mole activity persists after two treatments, abandon use of this product and seek another method for controlling moles.

Follow-Up: Wearing barrier laminate gloves, collect and dispose of all dead, exposed animals and dispose of leftover bait in accordance with disposal instructions. Use detergent and hot water to wash spoon used for baiting. Do not use this spoon for mixing, holding or transferring food or feed. If reinestation does occur, repeat treatment.

Specific Directions for Pocket Gophers: Burrowing pocket gophers (Thomomys spp. and Geomys spp.) throw out low, fan-shaped mounds on either side of their underground tunnels. The lateral tunnels coming to the surface are on the flat sides of the fans and are plugged with soil. With a long-handled spoon, carefully remove the plug. Insert a teaspoon of this product as far down the lateral tunnel as possible. Reclose the opening, being careful not to cover bait with soil.

Follow-Up: Wearing barrier laminate gloves, collect and dispose of all dead, exposed animals and dispose of leftover bait in accordance with disposal instructions. Use detergent and hot water to wash spoon used for baiting. Do not use this spoon for mixing, holding or transferring food or feed. If reinestation does occur, repeat treatment.

STORAGE AND DISPOSAL
Do not contaminate water, food or feed by storage or disposal.
PESTICIDE STORAGE: Store in original container in a cool, dry place inaccessible to children and pets. Keep containers closed and away from other chemicals.
PESTICIDE DISPOSAL: Nonrefillable container. Do not refill this container.
