SURRENDER® is an insecticide for control of pests in containing areas. The active ingredient in SURRENDER® is alphatic, a water-soluble insecticide readily absorbed by plant roots and foliage to give systemic control of feeding insects. Insect pests are generally controlled more effectively by SURRENDER® through ingestion than by contact. Application of SURRENDER® through ingestion should be repeated only as directed.

FURTHER USE INSTRUCTIONS
- Do not apply under conditions involving possible drift to food, forage or other plantings that might be damaged or the crops thereof rendered unsalable for sale, use or consumption.
- This product is sold by weight and package is full when packed, but due to the product’s nature, it is liable to occur.
